News Briefs

Haggerty new SGA Vice President

by Tom Tyson

Jeff Haggerty, a sophomore mechanical engineering major, will be the next Student Body Vice President according to Student Government Association (SGA) Business Manager Ryan Hawk.

Haggerty is running uncontested for the vice president spot of SGA, since he was the only student to return a petition to Hawk by the deadline of Jan. 14.

Haggerty is currently a congressman representing Deming Hall. He serves on Congress's new Coeducation Committee and represents the Student Affairs student/faculty committee in the SGA Committee Council.

According to SGA President Chad Taylor, numerous individuals were originally planning to run for the position, but most decided that they would be unable to make the significant time commitment.

Haggerty, a sophomore adviser in Deming basement, a varsity wrestler, and a member of Triangle fraternity, will be replacing outgoing Vice President Adam Griner.

Haggerty's duties will include chairing the fifty member Congress, appointing all congressional committees, chairing and setting the agenda for the SGA Club Council, serving on the SGA Executive Committee, and representing the student body in the Board of Managers' Academic Affairs Committee.

"I'm really excited about the office," stated Haggerty on Tuesday, "and I hope to make this the most effective Student Government Association that Rose has yet seen."

More valuable prizes to be given away at Las Vegas Night

The Student Activities Board will be holding its annual Las Vegas Night tomorrow night from 7 p.m. until 9 p.m. in the Hulman Union. As usual, some very valuable prizes will be given away, including a 20 inch Color TV/VCR with remote control, a portable CD player, a video game system, and many other prizes donated by local businesses such as Camelot Music and the Terre Haute

Bowling Center.

This year there are more prizes to be won than ever before, so come to Las Vegas Night on Saturday and win "big bucks" at blackjack, roulette, craps, and other games. Use this money to buy chances in the raffle to be held at 9 p.m. for all of the prizes on hand.

Las Vegas Night is open to all Rose-Hulman students.

Two vie for SGA President

by Tom Tyson

Student Government Association (SGA) Business Manager Ryan Hawk announced this week that juniors Jody Snodgrass and Mike Keeney will be running for SGA President.

Both candidates are active in SGA. Snodgrass, a junior chemical engineering major, is a congressman representing commuters. He is the chairman of the SGA congressional Long-Range Planning Committee and is a member of the SGA Finance Committee.

Keeney, a junior mechanical engineering major, is presently a congressman from Mees Hall. He serves on the SGA Programming Committee, Congress's Coeducation Committee, the Admissions Advisory Board, Judicial Council, and the SGA Student Affairs student/faculty committee. He is a resident assistant in Mees Hall.

Each candidate is funded up to \$10 for campaign expenses. Elections will be held Feb. 5.

Coats for Kids, a big success

by Matthew Ruehlen

The Rose-Hulman Chapter of the Alpha Phi Omega service fraternity would like to thank Dale Long, assistant director of college relations, and all of the faculty and staff for their help in making our Coats for Kids drive such a

success.

With the help of Terre Haute North and South High Schools, Krogers, and the Meadows over 1000 articles of clothing were collected and donated to the Salvation Army before Christmas break.

Rose-Hulman to work with Gallagher

by Jim Ockers
Staff Reporter

The popular comedian Gallagher has commissioned Rose-Hulman to create gadgets to be used in his shows.

In order to spark interest, James Eifert, dean of faculty, hosted students for lunch on Dec. 18 during 5th and 6th periods. The students were asked to submit ideas after Christmas break for some devices for Gallagher to use.

A contest was started with ideas that were due on Jan. 9, at noon. A \$100 prize will be presented to the winner or winners who submit the most creative ideas. According to William Owens, professor of mechanical engineering, additional ideas will

be accepted at any time, and he is sure that the submitters of the best of the ideas will receive compensation even after the official contest is over.

Owens has agreed to assign the design of the ideas to four of his students as part of their work during the spring quarter.

The program will be mentioned in the introductory ME design class, and they may be mentioned in the senior ME Systems Design class, but most of the participation is expected from the Special Projects class.

Students who volunteer for this program will design the "gadget," create production and testing schedules, and develop verification and reliability test-

Rose prof expects more violence in Lithuania

A Rose-Hulman professor who was in Vilnius, Lithuania earlier this month, said he was surprised at last weekend's Soviet crackdown in Vilnius that left 13 persons dead.

"During my visit there was no hint of any impending use of force by Soviet government," said Peter Priest, professor of Russian, who completed his third trip in less than a year to Lithuania on Jan. 3. "I'm surprised the Soviet government moved with such violence so quickly," he says.

"Lithuanians are determined to fight for freedom," Priest stated. "They regret not defending their country during World War II against the Germans.

"Since my last trip three months earlier, it was obvious the desire for independence from the Soviet Union had grown even stronger," he explained.

According to Priest, the mood in the Lithuanian capital earlier this month was peaceful.

"The people were optimistic that the new year would bring about solutions to many of their problems," he said.

Priest has been a frequent visitor to Lithuania and the Soviet

Vladas Domarkus, Rector (President) of Kaunas University of Technology located in Lithuania, discusses exchange programs with Peter Priest.

Union, most recently to establish student and faculty exchange programs.

According to Priest, Soviet President Mikhail Gorbachev may use world concern regarding the Persian Gulf crisis as, "a cover to establish a puppet government in Lithuania.

"That would be one of the worst things that could happen.

The Lithuanian people are making progress toward independence in a peaceful manner," he explained.

Priest said during his visit it was obvious the Lithuanians were moving rapidly toward independence.

A 1990 graduate of Rose-Hulman, John Holtz, is studying in Kaunas, Priest said.

Blackburn to speak on Martin Luther King Day

by Jim Ockers
Staff Reporter

Walter Scott Blackburn and his wife Alpha, both well-known black entrepreneurs, will come to Rose-Hulman on Martin Luther King day. According to Rose-Hulman President Sam Hulbert, the Blackburns will share their perceptions of what it's like to be black and live in Indiana in the 1990s.

Hulbert said that this seminar is especially appropriate as we try to diversify our faculty and student body. He said that whether or not people think that Martin Luther King was a great hero, at this time "I think it's appropriate for us to reflect on that." Hulbert expressed that we should have a greater appreciation for diversity in our society, and that lack of education is a

poor excuse for racism in 1991.

Hulbert said that the purpose of the seminar, which begins at 11 a.m., is to raise consciousness about the importance of diversity in our society. He anticipates that the presentation will be "an excellent intellectual experience." After they speak, the Blackburns will serve as resources for the afternoon in a US

Strassman to present Schmidt lecture

by Jim Ockers
Staff Reporter

For almost 40 years, the Oscar C. Schmidt Memorial Lecture has brought national leaders of business, industry and government to the Rose-Hulman campus to discuss the free enterprise system. Paul Strassman is one of the nation's foremost information scientists. His lecture will be entitled "The Business Value of Computers," and will be presented at 11 a.m. on Jan. 23, 1991, in the Moench Hall Auditorium.

According to Rose-Hulman President Sam Hulbert, students who attend the lecture will hear Strassman's interpretations of communications and its relevance to civilization, and the des-

tiny of our civilizations. They will hear his predictions for the future: where computers will take us.

Strassman is a frequent speaker at business schools and is a member of the faculty of several universities. Among his writings is a book entitled *The Business Value of Computers: An Executive Guide*.

He graduated with an engineering degree from Cooper Union in New York, and received a master's degree in industrial management from the Massachusetts Institute of Technology.

Currently, Strassman is President of Strassman, Inc., a man-

agement consulting firm, President of The Information Economics Press, and principal of Management Tools and Information Services, Inc., a research consortium in Boston. Prior to forming his own company, Strassman was Vice President of strategic planning for the Information Products Group of Xerox until he retired after 16 years there. Prior to joining Xerox in 1969, he held the job of chief information systems executive for the General Foods Corporation and later for the Kraft Corporation.

As a young man, Strassman earned military decorations for his 1944-45 actions in a military commando unit.

Rose prof's effort to spark interest in math

by Joseph Batt
Staff Reporter

Elton Graves, professor of mathematics, was honored for his efforts to increase the participation of junior high school students in the American Junior High School Mathematics Examination.

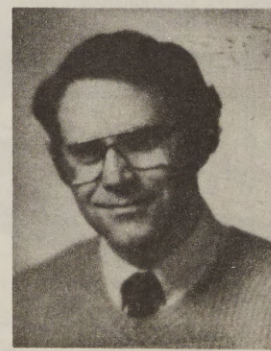

Indiana increased the number of participants by 2,000, although nationally 20,000 fewer junior high school students signed up. The examination was sponsored by the Mathematical Association of America, Society of Actuaries, Mu Alpha Theta, National Council of Teachers of Mathematics, Casualty Actuarial Society, American Statistical Society, American Mathematical Association of Two Year Colleges, and American Mathematical Society.

The forty minute exam consisted of twenty-five problems. The questions were designed to test the problem solving capabilities of the students.

"The purpose of the test was to get kids fired up about mathematics," Graves said.

Awards were given to those scoring the highest in the nation and in their individual schools. Graves said that the competitions were organized to spark interest in mathematics as football and basketball games spark interest in athletics.

Graves was cited by the executive director of the Mathematical Association of America committee for the American Mathematics Competitions for his hard work to increase the student interest in this state.

Elton Graves

James Eifert, dean of faculty, noted that Graves' work has also resulted in a considerable amount of visibility for Rose-Hulman with an important student audience.

Opinion

A former cadet speaks out

I had the pleasure of talking to Berenda on the phone the other night. Berenda was a friend of mine in high school, an anomaly in his right-wing activism. Sure, a lot of young men are fanatic militarists, but how many of them try to organize missions to Nicaragua?

Everyone knew Berenda was a little gung-ho. The guy searched out and provoked physical conflict. He used to make fun of jacked-up trucks in front of the overmuscled and underbrained guys who were driving them. He thrived on the subsequent beatings.

To Berenda, all US military actions were justified, and the US had every right to take complete control of the world by military force. Those politicians who cut defense funding and protested military action were gutless wimps. To him, two forces dominated in the world, black and white, the black of which being everyone who wasn't the United States.

Berenda's organized mission to the "Freedom Fighters" in Nicaragua fell through when he found no support in his friends and his Mexican border-smuggling connections reneged. And, unfortunately for him, the US wasn't openly engaged in a major military conflict while he was in high school. So he left during his senior year and attended a military school to get a head start on the military career he

I Don't Even Want To Think About It!

by Kevin Neilson
Staff Columnist

was pursuing. It was a place of strict discipline, of martial law, a place where punishment included swimming across muddy pits lined with barbed wire. And Berenda loved it.

Unfortunately, Berenda's chances in the military were so severely reduced by a knee injury that he had to try to find a less noble route in life. You may imagine his disappointment. A career in police work was abandoned for the same reason. I had little idea of what he was doing until he called me up.

"So, Berenda," I asked rhetorically, "are you all ready to go to Saudi?" I was ready for a deluge of curses against the Iraqis and his strategem for most quickly eliminating them off the face of the earth. I idly

wondered if he would suggest using air power and troops to take control of the country, or simply converting its desert into one large piece of obsidian through a few fission reactions.

He answered simply. "I don't want to get my butt kicked over there."

I proceeded to clean out my ear with a series of Q-tips and asked again to verify the answer. "Why should I risk myself over there? Most of my friends from the military school are already over there and they're excited about it. They can stay there if they want to. They'll change their minds when the bombs start coming in."

I listened in disbelief. "Well," I asked, "shouldn't we be over there defending freedom?"

"No one defends freedom for the US anymore," he returned. "They only defend economic and political interests. Maybe we fight for corporational interests, or for the stock market, or even for the benefit of the members of the United Nations, but we don't fight for freedom."

Needless to say, I was still more than a little surprised at this seemingly liberal talk. Berenda went on. "This deal in the Middle East is blown way out of proportion. I don't really want to mess with it myself. But if it were up to me, I'd pull out and let Iraq have Kuwait. It belonged to Iraq in the first place, and we're only fighting for its resources. This is just way too big."

"Well, at least it will be over quickly," I offered.

"Yeah, all my friends over there think they'll have control in no time with no trouble. After the first attack they'll realize this isn't going to be any six-day war. These computer predictions don't mean anything. If people think there are only going to be a few thousand casualties, they're wrong."

I ventured a risky question. "So, if you get drafted, is Canada looking pretty nice?" I surely couldn't expect a positive answer for this.

"No, I'll go if I get drafted. I just wouldn't like being used like that. I know this all sounds like I've made a 180 degree turn in my thinking, but I look back to

when I was in the military and I realize that I was just a machine and the military was doing my thinking for me. My knee injury was one of the best things that could happen to me. I want to have a family some time, and being a soldier wouldn't be fair to them or me. I would never know if I was coming home or not, and I would never know what I was fighting for."

"So what are you studying at school, anyway?" I asked him. Not criminology or political science. He was in medical science. He wanted to be a paramedic. "And after my schooling," he added, "I might just leave this country. America just isn't the place it used to be."

I called up another philosophically intense right-wing ROTC friend of mine and told him about Berenda's conversion. He was as amazed as I and mourned the loss of his ideological colleague. I told him something else. "There will always be liberal sissy journalists like myself complaining about military actions such as this, but when Rambo himself lays down his arms, that's an indicator that something is seriously wrong."

"No," my friend replied, "It means that I have to be the bastion of rational thinking around here."

I can't possibly at press time know what will be happening on the 15th and thereafter. But I find solace in the rational done for my benefit.

Is Mikhail Gorbachev losing his grip?

All eyes are glued on the Middle East. The entire world is holding its breath, waiting to see what breaking the United Nation's deadline will bring down upon Saddam Hussein. You could probably hear a pin drop, if it weren't for all the screaming of the political analysts. And as everyone stares intently at the line in the sand, the Soviet disunion grows.

Yes, Moscow is quietly dispatching troops to the small country of Lithuania. In the initial scramble, shots were fired and thirteen people were killed. It would seem that this is a very convenient time for the Soviet Union to have to deal with its internal strife, (if such a time exists).

With all of the attention elsewhere, the Red Army won't seem so noisy. In fact, this high-profile Gulf Crisis is providing a very suitable diversion for China, too. (The protesters, or "rebels", of the 1989 Tiananmen Square massacre are currently being tried.) Yes indeed, it is time for the world to do it's unpleasant and embarrassing laundry.

The USSR has taken this opportunity to put the squeeze on Lithuania, who declared independence from the Soviet Union only a few months ago. Lithuania, in response, has confirmed it's determination to fight for it's freedom if necessary.

They mean it! This fiery attitude has inspired other Soviet states to be a little more vocal in their protests. It would appear that Lithuania has it's foot in the door and will not kindly remove it.

I question the judgement of Gorbachev in sending the army to Lithuania. I see this as only throwing grease onto the fire. The Lithuanian people now have a concrete and specific target at which to aim their frustrations. The harder Gorbachev pulls, the more ferociously Lithuania will struggle to get away.

I think the only hope at preserving the union without economic destruction larger than that which the Soviet Union could probably withstand lies in compromise and discussion. We need only look at our own Civil War to understand the magnitude of destruction to the fiber of the entire nation that is possible.

I fear that either Gorbachev is making an uncharacteristic mistake, or that he is no longer in complete control of the actions of his country. Perhaps Gorbachev is too conservative to maintain his power and this is part of a desperate attempt to bring down the iron fist. Perhaps he is trying to re-assert himself and force his decisions to be respected.

If the Soviet officials think that they can now reduce freedoms for their own convenience, they will probably lose their union to a civil war. The people are cry-

The Moral Kiosk

by Chester Ogborn

ing for more freedom and independence, while the army offers only an imposition on what freedoms they already have. Violence is sure to follow this type of diplomacy.

I would not be surprised to see a more liberal president in power in the Soviet Union soon. If Lithuania stands up to the Red Army, as they almost certainly will, then other states will follow. Gorbachev already endures fantastic criticism and the liberal portion of the USSR feel that he is moving much too slowly.

Now that the silence has been broken, the people are more bold and more aware of their own power. Since it is obvious that change is inevitable in order to salvage their country, the people want it NOW! Amid so many examples of overnight change in Eastern Europe, it is difficult for the conservatives, like Gorbachev, to maintain influence for

very long. We may be witnessing the straw that breaks the camel's back in Lithuania's insubordination. There was a time when Gorbachev's ideas were revolutionary and exciting, but now they are too slow and unsubstantial to keep the people content. With the taste of freedom so real, there will be no compromises on Lithuania's part. Of course, whatever the outcome in the USSR, it will not be headline news. The headlines, for the time being, are reserved for the US and Iraq. With so many wars going on, who has time to keep track of them all?

Engineers survive Wabash, look next to tough Hanover

by Ken Koziol
Sports Editor

The Engineer basketball team will be eagerly awaited in Hanover tomorrow afternoon, as the Panthers are in search of defeating one of the Midwest's best teams. Just this week Coach Fenlon's team was ranked third in the region in front of DePauw and behind Illinois Benedictine and Wisconsin-Platteville.

The young Hanover team has made the most of its season so far. At press time the squad was 12-5 with an even 1-1 in the conference. The starting line-up features two freshmen, but the real scoring threats are found in 6-9 forward Hudson Heidbreder and 6-6 center Tim Kessling. Both are averaging over 16 points per game. John Carter, a 5-9 guard, is adding to the totals with an average of 10.9 points. Two of the team's players are coming off the bench averaging 10 points each.

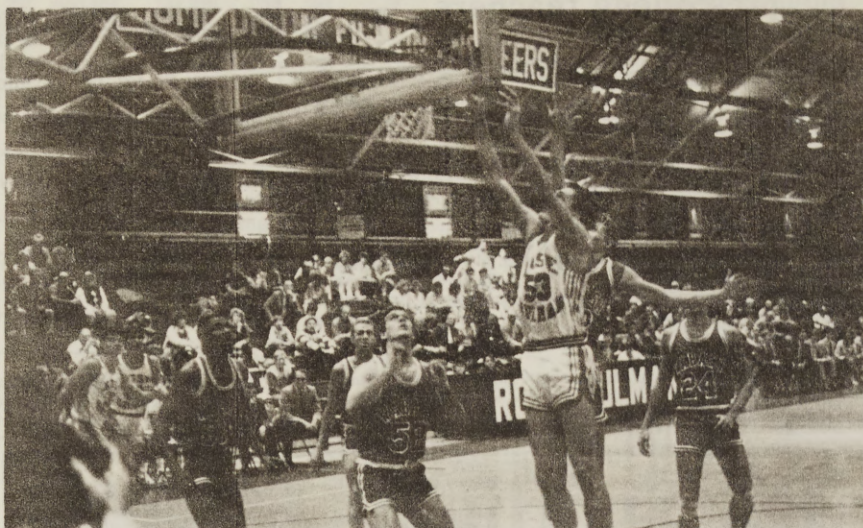

Fenlon gives a lot of credit to the Panther team saying, "John Carter may be the best shooter

in the league. Tim Kessling may be the best player, and Hudson Heidbreder isn't far behind."

The Engineers had more on their minds Tuesday night as they faced off against the Little Giants of Wabash College, and closed in on first place with a 63-61 victory. Trailing by five points at the half, Rose fans were surprised to see Wabash shooting at will in the last five minutes. Fenlon's team slowly battled back in the second half to tie the game with nine minutes remaining, but fell behind by two with 1:39 to play.

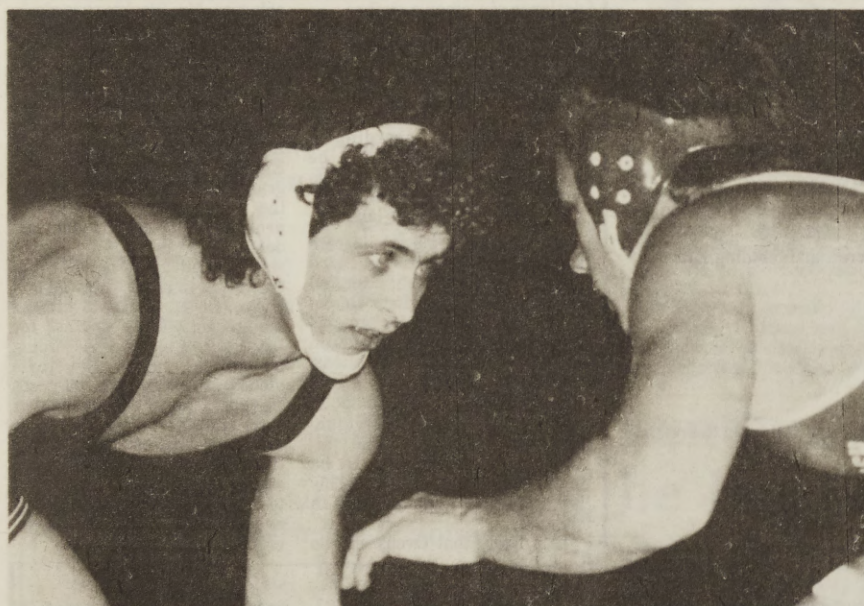

Rodney Adams scored to tie the game, and Scott Beach awed the crowd with a 3-pointer to go up by three. On the miss by the Panthers Adams then was found downcourt with no defenders to add two more. Chris Schrepferman of Hanover answered a trey to quiet the crowd. A desperation foul gave Britt Petty two free-throws, and Schrepferman put in an insignificant lay-up at the buzzer to finish the scoring.

Come out to support the Engi-

Just as in the past, Rose-Hulman defeated rival Wabash, 63-61, in a big game

neers on Saturday January 26 at 3 p.m. as Rose will host the current ICAC leader, Taylor University.

The Engineers hope to end their tough times with a victory at the Elmhurst Tournament in Chicago.

Wrestlers grapple with lack of numbers

by Jim Broskow
Sports Reporter

The wrestling team suffered a pair of disappointing losses Wednesday to two tough teams — Wabash College and Upper Iowa. The Engineers dropped the decision to Wabash 33-15 and lost to the Iowa team 30-21.

The team had several strong individual performances highlighted by two pins by junior Matt Morin (6-0). Sophomore Jeff Haggerty chipped in with two wins of his own including one pin. With the wins he raised his record to 3-2.

Matt Murphy at 134 pounds and freshman Darby Klein at 167 added victories to the total. An unfilled line-up accounted for the bulk of Rose's team score shortcomings.

To make matters worse for the

Engineers, senior Jim Winkley will not be returning this season due to a knee injury. Morin also had some surgery done in December, but has come back to lead the team once again.

Rose will travel to Chicago Friday for the Elmhurst Tournament where Morin will be in search of a repeat as last year's

champion, and others hope to continue their improving performance.

Nominations sought for outstanding pre-college teachers

The Honors and Awards Committee has extended the deadline for nomination of outstanding junior and senior high school teachers to Jan. 28, to permit additional students an opportunity to honor those teachers who "made a difference" in their lives.

Those selected will be participants in our Parent's Weekend Activities and will be recognized at the Honors and Awards Banquet this spring. Prior recipients of this honor have included teachers from many academic fields.

The nomination should be in the form of a letter which describes the teacher's qualifications for recognition. It should be accompanied by the name, school, address and telephone number of the nominee and three others qualified to write letters of recommendation on behalf of the nominee.

All correspondence and questions about this program should be directed to Frank A. Guthrie, secretary of the Honors and Awards Committee, box 69.

1991 Outstanding Secondary Teacher Award Nomination Form

Please submit your nomination, no later than January 28, 1991, to Frank A. Guthrie, Box 69, FL-107, by providing the following:

Nominee's name/address/phone: _____

School name/address/phone/subjects: _____

* PLEASE ATTACH YOUR OWN BRIEF LETTER OF RECOMMENDATION TO THIS FORM *

Your name/class/campus address: _____

Finally, please submit the names, addresses and phone number of three people who are in a position to write informative letter in support of your nominee. The Committee will contact these references to seek letters from them.

RA Spotlight

NAME: Steve VanZale.

HOMETOWN: Medina, Ohio.

MAJOR: Electrical Engineering.

ACTIVITIES: Lambda Chi Alpha, RHA, Blood Drive Chairman, Judicial Committee, RA, Cheerleader, Intramurals.

WHY DID YOU COME TO ROSE-HULMAN: It is a small school, the student to faculty ratio, and the atmosphere.

WHY DID YOU BECOME AN RA: I really enjoy being with the freshmen and helping them adjust to college life. I want to have a positive effect on the freshmen. Plus the atmosphere of the Resident Halls.

BEST PART OF BEING AN RA: Roaming the halls visiting with the freshmen.

ADVICE TO FRESHMEN: There is no such thing as a perfect answer in life; everything has its pros and cons.

HOBBIES: Snowboarding, water skiing and barefooting, sports in general, and building lofts.

FAVORITE CLASS: Microcomputers.

FAVORITE PROFESSOR: Art Western, because of his enthusiasm.

CAREER INTERESTS: Electrical Controls Engineer/Management.

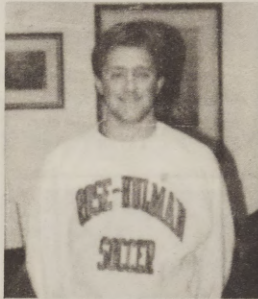

MENTOR: Ken Swank.

MOTTO OF LIFE: Do what you like; money will follow.

LIFETIME GOAL: Live in a place where I can snowboard half of the year and water ski the rest of the year.

FAVORITE ARA ENTREE: Grilled cheese sandwich.

FAVORITE CARTOON CHARACTERS: Bugs Bunny, Road Runner, and Scooby Doo.

BLACKBURN

Continued From Page 1

History Since 1945 class taught by Bill Pickett, and a Comparative Management class taught by Barbara Ito.

Walter Blackburn is owner and President of Blackburn Associates Architects Inc., and Alpha is a nationally known designer of women's clothes.

Walter graduated from Howard University School of Archi-

ecture and Engineering in 1963, and has owned his firm and been continuously in business for twenty years. During this period he has been commissioned to design a wide range of projects including high-rise buildings shopping centers, churches, schools, complex housing developments, public buildings, and private residences. Mr. Blackburn is also a member of the Rose-Hulman Board of Managers.

ROSE-HULMAN

Continued From Page 1

ing techniques. According to Owens, this program will be shared between the departments and disciplines. The details for this will be worked out later.

Ovens is intending to integrate students projects into the curriculum. These will not be limited to ideas for Gallagher. He intends to solicit ideas for projects from companies with which Rose-Hulman has good relations, and get students working on these projects.

Participation will be voluntary, and Owens hopes that students who participate will be highly motivated. He said, "This is a chance for the good guys to shine."

It is likely that Owens will be

the faculty member in charge of this "new" program. It is not a completely new idea, because Rose-Hulman does have an Entrepreneur-in-Residence program, which is currently without the entrepreneur. This type of program will be new for students.

Eifert and Owens had flown to California to meet with Gallagher on Jan. 11. They will present the students' ideas, and ask for any ideas of his own. According to Owens, Gallagher may create videos for educational purposes in return for the gadgets that Rose students will produce. The videos may not necessarily be on the college level, but may be aimed at high-school students, to show them that engineering can be fun and should be considered as a career.
