## Ballet continues series

The Indianapolis Ballet Theatre Company, a professional troupe of 15 dancers, will appear at 7:30 p.m. Tuesday, Jan. 22, in Moench Hall Auditorium on the Rose-Hulman Institute of Technology campus.

The performance is the fourth in a series of seven fine arts offerings scheduled for the 1979-80 academic year.

The Indianapolis Ballet Theatre, sponsored by the Civic Ballet Society of Indianapolis, Inc., was originally formed to bring live ballet to Indianapolis elementary school children. The program began as an experiment with several inner-city schools and has evolved to include public audiences. In its third subscription season, the company tours throughout the state.

Under the direction of George Verdak, the dancers choreograph, teach, design costumes, drops, and scenery, as well as work in public relations and booking.

The company includes Artistic Director George Verdak, Richard Betz, Heather Brocks, Lauren Cookson, Dace Dindonis, Terrye Freeman, Michael Stephenson, Joseph Kerwin, Virginia Holte, Marsha Hooks, Tim Hubbard, Dale Shields, Diane Downes and Randall Penn.

Tickets to the Indianapolis Ballet Theatre and other fine arts performances will be available to Rose-Hulman students three days prior to and on the night of the performance. The public may purchase tickets in Moench Hall (on the Rose-Hulman campus) or at Paige's Music Stores, 642 Wabash Ave. or Honey Creek Square, two days prior to the performance. Tickets also will be sold at the auditorium office on the evening of the performance.

Tickets are free with a valid Rose-Hulman ID and are \$2 to the general public. A reduced \$1 fee is available to area students and senior citizens. Further

information can be obtained by calling 877-1511.

The Indianapolis Ballet Theatre Company and other fine arts performances are planned by the Rose-Hulman Commission on the Visual and Performing Arts, headed by Benjamin S. Benjaminov, professor of chemistry and president of the Terre Haute Symphony Association for the last seven years. This event is coordinated with the help of Jack Kinney, a Rose-Hulman mathematics professor. The series is supported in part by the Indiana Arts Commission and the National Endowment for the Arts.

## Arts series detailed

Rose-Hulman's Commission on the Visual and Performing Arts was created during the 1977-78 school year to "explore different avenues for supplementing the college experience of our students," says commission Chairman Dr. Benjamin Benjaminov.

"In addition to the usual academic and extracurricular activities, we feel we have a great need to provide the arts as an aid to students in developing a broader and more meaningful awareness of the world in general," he said.

The 1979-80 Fine Arts Series has featured the Indiana University Jazz Orchestra; the Opera Factory (chamber opera); and The Singing Hoosiers (including Broadway, folk, and jazz music). Later,

there will be ballet, comedy, piano, and other arts.

Although some students may not be familiar with the arts presented, there is "something for everyone," says Dr. Benjaminov. "There is always emphasis on selections that will enrich and broaden the cultural appreciation of the students; a great deal of care goes into the planning and selection of artists to ensure a diverse series of events."

The public has supported the Fine Arts Series, says Dr. Benjaminov, but student attendance has been disappointing. However, he said, "those who do take advantage are delighted and come back."

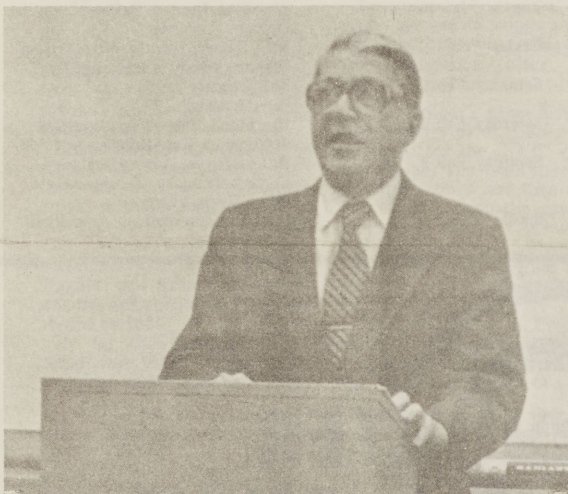

Attendance is free for Rose students with valid ID's. Other students and senior citizens pay one dollar; all others pay two

dollars.

The series is supported in part by the Indiana Arts Commission and the National Endowment for the Arts. Some performances may have additional sponsors; for example, CBS Records sponsored the Opera Factory in October and will sponsor the Second City Touring Company, a Chicago-based comedy and satire group, on March 18 (former members include Gilda Radner, John Belushi, and Dan Ackroyd).

The next performance, January 22, will be the Indianapolis Ballet Theatre Company, a professional troupe of fifteen dancers. Now in its third season, it tours in Indiana.

Comments concerning the Fine Arts Series are encouraged and may be sent to Box 112.

Dr. Thomas L. Martin was the keynote speaker for the Herman A. Moench Symposium on Engineering Education. Martin, President of Illinois Institute of Technology, spoke on the opening day of the January 11 and 12 program in recognition of the fifty years of educational activities of Dr. Moench. Following Martin was a panel discussion of engineering education today, moderated by Dr. Tom Roper. Included on the panel were David Cochran, former Vice-President of General Electric; Dr. Archie Thom, University of Glasgow; and H. C. Wyeth, duPont. A panel discussion on the future of engineering education closed out the symposium on Saturday. Moderated by Dr. Glen Richardson, panel members included Paul Benning, Pfizer, Inc.; John Logan, former RHIT President; and W. Schindel, President Applied Computing Devices.

## Mason to speak at Wabash

Dr. Thomas Mason, professor of economics and chairman of the Department of Humanities, Social, and Life Sciences at Rose, will be a featured speaker at Wabash College next Wednesday. He will be part of a panel discussing the economics of energy.

The economics discussion takes place on the third day of a four-day seminar on energy problems, which was announced January 4 by Wabash College Lecture Series chairman William Doemel.

The seminar opens on Monday, January 21, when Wabash's debaters will present the arguments for and against the use of nuclear power in a public debate.

A five-member panel will lead a public discussion on future energy sources and on alternative ways of pricing and providing energy on Jan. 22. The panelists will be Larry Wallace of the Indiana Public Service

Commission; Richard Stein, vice president of Public Service Indiana; Ken Goodpastor, professor of philosophy at the University of Notre Dame; Fritz Eiking of the Citizen's Action Coalition; and Nancy Doemel, a member of the Indiana League of Women Voters state board.

Three economists will conduct a public panel discussion on the economics of energy on Jan. 23. Joining Mason are Stephen Schmutte, professor of economics at Wabash; and Thomas Tiemann, assistant professor of economics at Wabash.

Michael Gallagher, associate director of the World Coal Study, will lecture on the 24th about world energy in the 1980s. The World Coal Study is an international energy study conducted by the Massachusetts Institute of Technology under the auspices of the United Nations Educational, Social and Cultural Organization.

## Summer jobs overseas

Which summer job would you rather have—waiting tables in Indianapolis or a forestry job in Denmark? The American European Student Service (A.E.S.) sponsors jobs in Europe for American students who wish to spend a summer abroad.

The A.E.S. Service is a non-profit, twenty-year-old organization which places American students in jobs in Germany, Scandinavia, England, Austria, Switzerland, France, Italy, and Spain. The occupations consist of forestry work, child care, farm work, hotel work, construction work, and some other more qualified

jobs requiring more specialized training.

The purpose of this program is to afford the student an opportunity to get into real living contact with the people and customs of Europe. In this way, a concrete effort can be made to learn something of the culture of Europe.

In return for his or her work, the student will receive his or her room and board, plus a wage. However, the student should keep in mind that they will be working on the European economy and wages will naturally be scaled accordingly. The working conditions (hours, safety, regulations, legal

protection, work permits) will be strictly controlled by the labor ministries of the countries involved.

In most cases, the employers have requested especially for American students. Hence, they are particularly interested in the student and want to make the work as interesting as possible.

They are all informed of the intent of the program, and will help the student all they can in deriving the most from his trip to Europe.

For further information and application forms, write to: American-European Student Service, Box 70, FL 9493 Mauren, Liechtenstein (Europe).

## Pistol safety clinic held

by Gary Meier

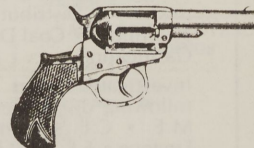

The Rose-Hulman Rifle Club sponsored its first annual handgun shooting clinic December 18 and 19 on the Rose rifle range.

The clinic was intended to provide an introduction to plinking and informal target shooting with both the revolver and the semi-automatic pistol.

The primary emphasis was on handgun safety, with each shooting session preceded by a brief seminar on safe gun handling practices.

The response of students and faculty members was found to be greater than the facilities could handle, as some 70 shooters burned more than 5,000 rounds of ammunition during the clinic. The supply of targets and target clips was also severely depleted during the shooting spree.

The clinic was especially beneficial for students from

states where restrictions on handguns limit the opportunities for target shooting with pistols and revolvers.

The Rifle Club does not currently own any handguns, but the range facilities are open for use with any privately-owned .22-caliber handgun.

The varsity rifle team will be at the University of Middle Tennessee tomorrow, and will compete against Loyola of Chicago and Illinois Institute of Technology the next weekend.

In addition, the Student-Faculty Rifle Club Championship will be held next week.

# New Scholarship Service offered

by Alan Yarcusko

A new service for all high school and college students has been established. Designed to find all of the scholarships, loans, grants and work-study opportunities for students at the high school, undergraduate and graduate levels, the new service guarantees that each applicant will receive at least \$100.00 in aid.

According to Steve Danz, Director of the Scholarship Bank, the average student applicant received thirty-two 'leads' on scholarship information on those sources for which they are potentially

eligible. The student then decides which sources to actually apply for.

An analysis of the more than 15,000 individual entries in the data bank indicates that about 30% are based on need, about 30% on merit and the remainder on a combination of factors. The Scholarship Bank is the only source for all aid sources, including graduate students.

The key to the data bank is the questionnaire that each student fills out. Requested information concerns age, sex, marital status, year in school, schools attending, major, occupational goals, jobs held, religion,

parents union, employment and military information, and a variety of other factors. Cost of the service is twenty-five dollars.

Interested students should send a stamped, self-addressed envelope to the Scholarship Bank, 10100 Santa Monica Blvd., \$750, Los Angeles, California 90067. The Bank also has a toll-free number: 800-327-9191.

## Essay topic: Exploitation of animals

Students who feel a deep-seated, compelling need toward expressing dismay at society's exploitation of animals and natural resources now have the chance to make these views known. The Friends of Animals, Inc. is sponsoring the 1980 Regina Bauer Frankenberg Essay Competition, a contest which deals with such a topic.

The essay must respond to the statement: "Humanity's self-serving exploitation of animals and natural resources is destroying the intricate pattern of life on earth."

The essays will then be judged on knowledge of the subject, persuasive effect, quality of language, clarity of reasoning, and ability to translate empirical evidence to moral and philosophical concepts.

The first prize will be a cash award of \$1,000, with second and third prizes of \$500 and \$250, respectively.

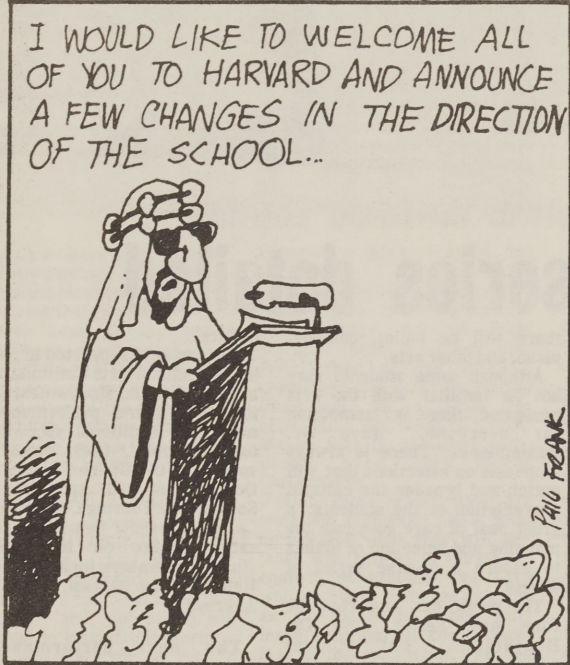

For further information, all interested students may write to: The Regina Bauer Frankenberg Essay Competition, Friends of Animals, Inc., 11 West 60th Street, New York, New York 10023.

Ed Sudlow goes up for a shot against Earlham last Thursday night. Sudlow threw in 20 points to lead the team to an 84-60 triumph which dropped Earlham's record to 1-12.

## Engineers up mark to 7-4

by Paul Curtin

The Rose basketball team came up with two wins last week to raise their season mark to 7-4, not including the European games. In addition, they won their initial C.A.C. encounter on the road against Principia.

Last Thursday the Engineers took on a poor team from Earlham, and sent them to their twelfth loss in thirteen outings. The squad showed the effects of their tiring European swing in the first half, and their lackluster play gave them only a 36-32 lead at the half.

The first half was highlighted by the return of Jim Baske, the 6-0 junior guard who has been forced to sit out the first half of the season with an ankle injury. Although he committed several turnovers in limited playing time, he looked to be in fine shape to get the Rose fast break back in gear.

Rose came out fired up for the second half, and wasted little time in showing the sparse crowd why Earlham came into the game with a 1-11 record. With balanced scoring from Strange, Givan, Oehlman, Wagner, and Sudlow, the game was in hand halfway through the second period.

By far the highlight of the game was Paul Wagner's in-your-face slam dunk with about

seven minutes left. When he got the ball on a breakaway seconds later, the sparse crowd rose to its feet in anticipation, but this dunk nearly missed, and had Coach Mutchner slumping in his chair.

The final score was 84-60, and could have been much worse had not Rose hit on only eight of 19 free throws in the game. Sudlow led all scorers with 20 points, Wagner had 17, and Oehlman and Givan also hit in double figures.

Saturday afternoon the Engineers took to the road for an encounter with C.A.C. for Principia, and came out on top 81-73.

The win gave Rose a 1-0 C.A.C. mark, and set up tonight's home match with Sewanee, also 1-0 in the conference after their victory over Centre.

Thus, tonight's game becomes very important if Rose is to challenge for the C.A.C. crown this season. The team must win its home games and then do as well as it can on the road. In addition to Friday's game, the Engineers traveled to Blackburn Tuesday, and has another home game versus Illinois College Saturday night.

The ballgame with Principia was close throughout, and Rose fought to a 44-40 half-time lead. The team then got off to a good

start in the second half using the fast break effectively, and held on in the last going by hitting on key free throws.

In contrast to the Earlham game, the Engineers were outstanding from the charity stripe in this contest, converting 25 of 29 changes.

Rose shot 49% from the field on 28 of 57 shooting, and was actually outscored from the floor by the Indians, who hit 30 field goals. Rose won the game at the free throw line, where Principia made only 13 shots.

In the rebounding department, Paul Wagner led Rose with eleven boards, followed by Ed Sudlow with eight and Dave Strange with six. Eric Retzlaff led all rebounders with thirteen for Principia, and the other also added 22 points.

Dave Strange led Rose with 22 points, including ten free throws. The evenly divided scoring had Sudlow with 16, Baske with 14, and Givan with 13. Wagner and Oehlman had eight points.

The return of Jim Baske to the attack has made Rose a much-improved team, allowing Coach Mutchner to use Keith Oehlman as a swingman between forward and guard as needed. The team plays two important home games this weekend, and a large crowd to encourage the players would be nice.

## IM Sports Round-Up

by Randy Braker

Indoor soccer begins this Saturday, January 19, with eight teams tied for the lead in their respective leagues. There are four independent teams and two teams from ATO, 4-0, and Independents # 8, 3-0, are sharing the lead in ATO and Fiji. Fiji's two teams are Fiji # 1 and George's major basketball. Independents Garage, the second of which is affectionately named after ATO is idle. guess who, George. Each team will play the other seven teams once during the season. Indoor soccer will be played every Saturday and Sunday for the next seven weeks.

ATO is showing the way in In-

| MAJOR BASKETBALL STANDINGS |     | DOUBLE A BASKETBALL STANDINGS |     |

| Fiji                       | 0-3 | Fiji                          | 0-4 |
|                            |     | Speed 12                      | 0-4 |

ATO # 4 and Mees # 4 are currently tied at 3-0 for the lead in Minor G. LCA # 5 has a tough schedule as they must play two undefeated teams this week. They play Mees # 4 January 15 and they play 1-0 Fiji on January 16.

Three teams are tied for the lead in Minor E. Sigma Nu # 1 and Sharpenberg are 3-0 and LCA # 1 is 2-0. This week Speed has the chance to be the spoiler as Speed # 2 plays LCA and Speed # 3 takes on Sharpenberg.

A battle of undefeateds occurs this week in Minor D when 4-0 Independents # 7 takes on 3-0 LCA # 3. Apartments # 1, also undefeated at 2-0, may have it easy as they play 0-4 ATO # 2.

Independents # 9, 3-0, is all alone in first place in Minor C. After this week they may be 4-0 as they take on 0-3 Independents # 20. ATO # 1 and Theta XI were both 3-1 at presstime.

BSB # 2 and Blumberg # 2 are tied for first at 3-0 in Minor B.

Electrical Engineers  
 Mechanical Engineers

# Engineer Beer ?

It's a question we hear sometimes because many people do not associate our product with engineering. However, we can provide a world of engineering challenge in such fields as: continuous process manufacturing, high speed packaging, aluminum can manufacturing, glass bottle manufacturing, new plant construction and existing plant modernization.

We can also provide you with a world of career advancement potential that is matched by very few companies. Miller engineers are engaged in modernization and expansion programs that are backed by a billion dollar commitment. We welcome new ideas and provide the resources and management support to turn them into reality. If it sounds exciting to you...

# Notes from Kanadu

By Jeff Koechling

Well, gee, as I sit here writing with my pen and drinking from our new wineglass, the stereo is playing intense classical music ("Tales from Topographic Oceans"), as if anyone cared.

Tonight and tomorrow, the Community Theatre will be showing the film "The Innocent." The film was directed by Italian Luchino Visconti in 1977. Showings are at 8:00 p.m.

The Rose-Hulman Fine Arts Series continues on Tuesday, when the Indianapolis Ballet Theatre will perform. Pick up your free tickets on Monday in Moech Hall. The show will start at 7:30.

The Terre Haute Symphony will next perform a week from Wednesday, on January 30th. Orcenith Smith will conduct the Symphony in a program which includes the

Tannhauser Overture, by Richard Wagner; Joseph Haydn's "Military Symphony;" and "The Planets," composed by Gustare Holst.

On February 1st, 2nd, and 3rd, the Community Theatre's Musical for this year, "Brigadoon," will be playing in the Talley memorial Playhouse, at 25th Street and Washington Avenue.

The musical, set in the Scottish Highlands, will begin at 8:00 each evening.

Auditions for Rose-Hulman's spring play, "Godspell," will be in February. The date has tentatively been set for Sunday, the 17th, at 7:00 p.m. in the auditorium.

Wabash College has announced its winter and spring concert schedule.

Glenn Siebert,, a tenor from Indiana University, will present a recital at 3:00 p.m. on January 20.

## Headline's implication disputed

To the Editor,

I protest the grossly distorted caption to Mr. Krehely's letter to the editor of January 11. Your caption read "Tech. Trans. program rapped." The caption was misleading, deceptive, and false.

The lack-brain who wrote the caption (it was not Mr. Krehely) should be fired and sent back to grade school to learn how to read. Mr. Krehely's letter was not "rapping" the technical translation program. It said in plain English "The Tech. Trans. Program is something special."

For the benefit of the thickwit who captioned the letter I will summarize Mr. Krehely's main points: The program is special. It is so good that it should be easily accessible to others, but, the three extra Hum courses

make it almost impossible to take the Russian program. And therefore changes ought to be made in the requirements.

The program requires four years of language study plus three extra Hum courses. Students who have studied the language in high school can test out of one or two years.

The catch is that while many students have studied German in high school (about 12,000 this year in Indiana alone) and can test out of the lower courses, few have studied Russian (47 in all of Indiana!) and cannot test out of it.

Mr. Krehely was complaining that the three extra Hum courses discriminates against and places obstacles in the path of the intellectually courageous student who wants to begin the study of a difficult, challenging and valuable subject, one which he could not get in his high school, one which is of vital importance to our nation's economic and military well-being.

Mr. Krehely was also suggesting changes in the program (drop the three extra Hum burden) to make this "special program" more accessible to the gifted Rose-Hulman student. Even with the changes he suggests the program will still require more Hum courses than are required for any other program!

It should be noted that Mr. Krehely has completed the program in Russian and does not stand to gain anything from his suggestion. His motivation is simply to correct, as he says, "one of the most grotesque injustices." He is acting out of concern for other students.

In doing this Mr. Krehely displays the highest of moral and intellectual virtues; without any hope or chance of gain for himself, he is raising a cry against a vicious injustice to his brothers in the community.

For this reason I claim your caption was a lie.

Sincerely yours,  
 Peter F.H. Priest

## Editor's Reply

I would like to apologize if the headline on Mr. Krehely's letter misled anyone (Mr. Priest's reference to "caption" should be "headline.") Such an error was not intended.

However, Mr. Krehely does indict the additional humanities requirement, which is part of the Technical Translator's program. Thus, although he does not "rap" the classes or the purpose, he does "rap" the program as a whole.

On the subject of the Technical Translator's program, several people have commented on Mr. Krehely's recommendations. Although they admit that the program is difficult with the 15

course requirement, they point out that if the student were required to take merely 12 Russian classes, he would hardly be the well-rounded student Rose claims to produce.

A student who has taken no college humanities and has thus failed to develop an appreciation of his society is hardly desirable, and in fact Rose would probably lose its accreditation if such a program were permitted.

Once again, please accept my apologies for any mistaken impression our headline may have caused.

**At Republic,  
 you're not just another number.  
 Of course,  
 a shot at number one isn't bad.**

We're looking for individuals with freewheeling imagination. With initiative. Not just another corporate number. At Republic, we have room for your ideas. And they can take you far. Even to number one, if that's your ambition. We'll provide training, so that you can develop your interests and talent. On your part, we'd like a commitment of genuine interest.

**You should be an engineering graduate,** interested in positions in production supervision, maintenance supervision, and industrial engineering.

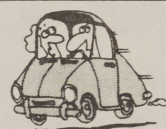

**Or an accounting major** with supervisory ability, to join our accounting staffs.

**Or a metallurgist** with the talent to contribute to maintaining and improving our precise quality control standards.

We offer good, competitive salaries. An outstanding benefit program. And involvement in an energetic, constantly-growing company in an industry vital to everyone.

We'd like to meet you and hear your ideas. So see your Placement Officer to sign up for an interview when we visit your campus soon. Or write Supervisor, College Relations and Recruitment, Department 406, Republic Steel Corporation, Cleveland, OH 44101.
