ROSE HULMAN INSTITUTE OF TECHNOLOGY

TERRE HAUTE, IND.

FRIDAY, OCT. 10, 1975

## Hulbert to Succeed Logan in 1976

Dr. Samuel F. Hulbert, dean of the school of engineering at Tulane University, Friday was named the eleventh president of Rose-Hulman Institute of Technology.

The announcement was made by Benjamin G. Cox, chairman of the board of managers and head of the presidential search committee, following a vote of confirmation by the board at its annual meeting.

Dr. Hulbert, 39, succeeds Dr. John A. Logan, who will retire August 31, 1976, following 14 years as president of the 101-year-old college of engineering and science for men.

In making the announcement, Cox said, "Dr. Hulbert meets a real challenge in following in the footsteps of Dr. Logan in view of the substantial contributions Dr. Logan has made in the development and stature of Rose-Hulman.

"We are indeed fortunate in Dr. Hulbert's coming inasmuch as his career to date and outstanding accomplishments in a relatively short period of time indicate that he will serve with distinction. He is most enthused with the Terre Haute community and the impression it has made on him, and is looking forward to becoming an integral part of the community."

Dr. Hulbert, who has been dean at Tulane since July, 1973, is an internationally-recognized authority on the engineering aspects of developing artificial body parts and the use of plastics and ceramics as implant materials for replacement of bone and teeth.

A native of Adams Center, New York, he received a bachelor of science degree in ceramic engineering at Alfred University in 1958. He earned a doctor of philosophy degree in ceramic science from Alfred in 1964,

where he served as an instructor in mathematics and physics from 1960 to 1964.

Following completion of the Ph. D., Dr. Hulbert moved to Clemson University where he received international acclaim for his research involving the application of ceramics engineering in the fields of orthopedics and dentistry.

Rising from assistant professor of ceramic and metallurgical engineering to associate dean for engineering research and interdisciplinary studies in a period of six years, Dr. Hulbert helped to develop one of the largest and best equipped bioengineering programs in the country.

In 1971 Dr. Hulbert was awarded medals by three Italian medical groups for his research. Two of the medals—one from the Italian Orthopedic Society and the other from the Rizzoli Institute—were given in recognition of Dr. Hulbert's contributions to orthopedic research. The third medal, given by the Bologna Medical Society, recognized outstanding contributions to the general field of medicine.

He is listed in several directories devoted to those outstanding in their field. These include "American Men of Science," "Outstanding Educators of America," "Dictionary of International Biography," "Who's Who in the South and Southwest," "Outstanding Young Men of America," and "Personalities of the South."

Dr. Hulbert is married to the former Joy Elinore Husband who is a graduate of Alfred University where she majored in English Literature. The couple has three children, Gregory, age 14; Samantha, age 13; and Jeffrey, age 7.

### Graduate Studies At Rose

By Choi Wong

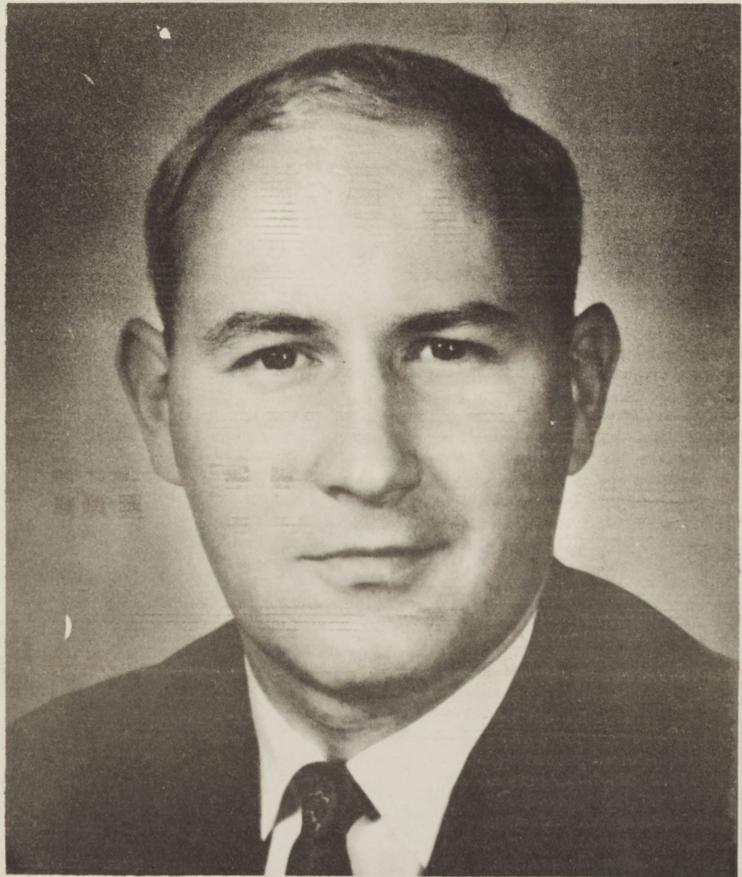

If you are a senior and you are not sleeping overnight in front of Templeton Administration Building, you are probably considering graduate school. Although Rose emphasizes excellence in its undergraduate program, a limited graduate program does exist here at Rose. Rose offers a Masters degree in electrical and mechanical engineering. A Bachelor of Science degree in EE or ME is not absolutely required for graduate study in EE or ME.

Limited financial aids are available here at Rose. Graduate assistantships are available and pay a stipend of \$800 per quarter in addition to a full tuition grant. One advantage of graduate study here at Rose is that the student is already familiar with the Institute's staff, faculty and programs. Lack of exposure to a new environment can be a disadvantage.

Seniors interested in graduate school here at Rose or other schools should get in touch with

Dr. Noel Moore IMMEDIATELY. One of the requirements for graduate school is the Graduate Record Exam, which is given six times a year. The next test date is December 13, 1975. The application deadline for the December test date is November 12, 1975. Seniors interested in full time graduate school next fall should take the Graduate Record Exam in December. Applications are available from Dr. Noel Moore. He also has application for Law and Business School tests.

There is disagreement among the Rose faculty members as to the value of a graduate program at Rose. According to Dr. Noel Moore, Director of Graduate Studies, a graduate program enriches the undergraduate program here at Rose. It provides the foundation for advanced courses or programs. The professors involved in the graduate program tend to keep in touch with what's happening in their respective fields.

### Coming Events at Rose

Oct. 15, Wednesday, Fall Honors Convo.

Oct. 17, Friday, Hayride at St. Mary's — sponsored by Saga of St. Mary's and Rose-Hulman and organized by the students of St. Mary's and the Rose-Hulman Inter-Dorm Council. FREE

Oct. 18, Calendar Girl Dance 1975 — sponsored by Lambda Chi Alpha featuring "Malachi," 9-12 p.m. Hulman Union - FREE

Oct. 18, Football game — Rose-Hulman vs. Illinois College (away)

Oct. 19, Inter-Dorm Council presents "Cat Ballou" starring Jane Fonda and Lee Marvin. FREE

Oct. 23, 24, 25, the Rose-Hulman Student Activities Board presents: A three-day series of folk concerts featuring a lively new musical group that is yet to be announced. St. Mary's is invited to attend, the concerts are FREE and the talent presented is bound to be exciting and entertaining.

Oct. 25, Football game — Rose-Hulman vs. Bluffton (Ohio) Home Game

Nov. 1, Dance at St. Mary's for all St. Mary's and Rose-Hulman students. A semi-formal dance. The St. Mary's students will be distributing FREE tickets to the dance in the Hulman Union the week before the dance.

### Rose Delegation Unique to Chatham Symposium

Among the eighteen liberal arts colleges represented at Chatham College for a symposium entitled "Where Have All the Heroes Gone?" was Rose-Hulman Institute of Technology. The symposium, conducted at the Chatham campus in Pittsburgh, Pa., on October 3 and 4, was addressed by such distinguished people as Dan Rather, CBS newscaster; Gale McGee, U.S. Senator from Wyoming; Tom Wolfe, author, and Lesley Stahl, also of CBS.

History professor Dr. William Pickett, along with Rose students Gerry Dail and Randy Ridgway, were selected by Dr. Logan to represent the institute, which is a member of the Continuing Conference of the Liberal Arts. Their transportation, room, and board were funded through the Lilly Endowment as were the expenses of other students of the conference.

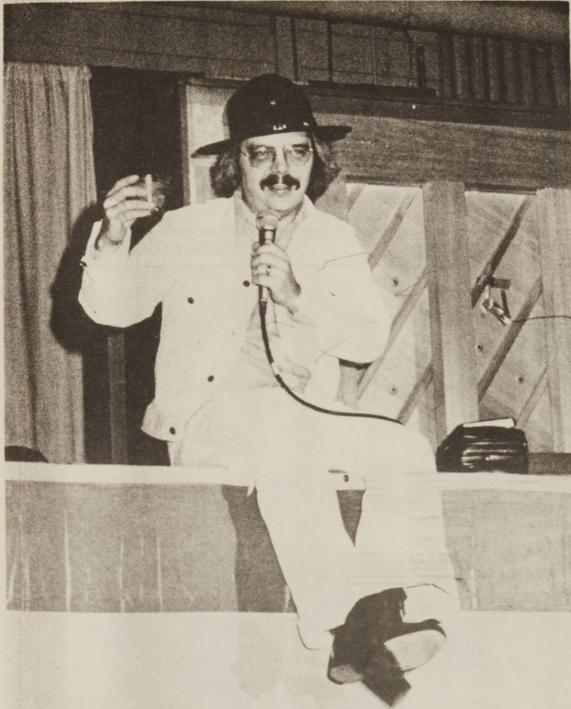

The symposium began Friday afternoon, October 3, with three workshops to discuss psychological aspects of the hero, the hero role of the computer, and the hero in education. The first general session was then held in the evening. Addressing the session was Senator McGee and Dan Rather, both of whom fielded questions at the conclusion of their addresses.

The symposium resumed Saturday morning with a panel discussion of the influence of the media on the making and breaking of heroes. Marie Torre of KDKA-TV was the moderator and she was joined by William Block, publisher of the Pittsburgh Post-Gazette; Senator McGee, John B. Oakes, editor of the editorial page of the New York Times; Joseph Rhodes, Jr., of the Pennsylvania House of Representatives, and Lesley Stahl of CBS News.

Following the panel was a workshop on the political hero. Lesley Stahl and Joseph Rhodes led the discussion.

The last workshop dealt with heroes in science and medicine, and author Tom Wolfe was among the moderators. The closing general session was addressed by Tom Wolfe as he gave his reply to "Will the Hero Return?"

The representatives from Rose found Chatham to be interesting from the fact it is an all female school and that all other participants were liberal arts majors. They felt they made a significant contribution to the symposium by being from an engineering college, and at the same time got a lot out of it by being so exposed to the views of the liberal arts students.

## WRTR/1550

There will be a public meeting of the WRTR general staff this Monday, Oct. 13. If anyone is interested in joining WRTR, please come; also any questions will be answered concerning station operations.

If any group or club has any public event they would like announced on WRTR, please send it

to Box 296/Campus Mail. We will try to get a response back to you as soon as possible. If you have any comments on our programming, send them to Box 296 and they will be considered.

Again, that's the WRTR general staff meeting, Monday, October 13, at 4:20. BE THERE!

## Patti Wins Homecoming Crown, Bonfire Burns

Pretty Patti Burkdoll, a freshman at Indiana State University, began her reign as queen of Homecoming '75 at Rose-Hulman Institute of Technology during the traditional coronation, pep rally and bonfire Friday night.

The 18-year-old Evansville beauty was crowned by Dr. John A. Logan, president of the college.

The 1975 Rose-Hulman homecoming queen is a graduate of Evansville Central High School where she was active in Student Council, Class Council Musicals, and was assistant captain of the Honey Bears, a girls marching corps. She recently became a pledge of Chi Omega sorority at Indiana State.

Serving as her court are fellow Indiana State coeds Diana Laurens, Cincinnati, a sophomore physical education major; Nancy Marsh, Lafayette, a junior medical technology major; Dottie Uselton, Terre Haute, a junior education major; and Marianne Eberhardt, Greensburg, a sophomore nursing major at Ball State University.

The pep rally and igniting of perhaps the largest ceremonial bonfire in the country capped Friday evening's activities. And as the hundreds of man-hours of work on the part of the freshman class went up in flames, Rose engineers, young and old, were "fired up" for homecoming.

Patti Burkdoll receives crown from Dr. John. Photo by Chaney.

## SGA NEWS

by Jeff Shants

**Admission Committee:** The applications for membership on this committee are available in the SGA office. I hope any interested students will apply. Deadline is October 15.

**Freshmen:** Good job on the Bonfire! It was difficult to get everything done in time, but you met the challenge and you are to be commended on a job well done. Just don't let your enthusiasm fall.

**Terre Haute Symphony Tickets:** The symphony tickets will now be available ONE MONTH before the performance. We don't wish to give the tickets

out any sooner, so please do not ask the SGA secretary for tickets more than one month in advance. The Symphony schedule is on the SGA door and on the class bulletin board by the old library.

**The Pink Elephant Club:** For those of you who decided not to attend the concert Saturday night, you really missed it. The comedian wasn't so great but Timberlane gave the best performance that Rose-Hulman has had in the past five years. Everyone won't agree with me, I'm sure, but almost everyone there had a good time.

## The fever that won't break: THE RISING COST OF A MEDICAL EDUCATION.

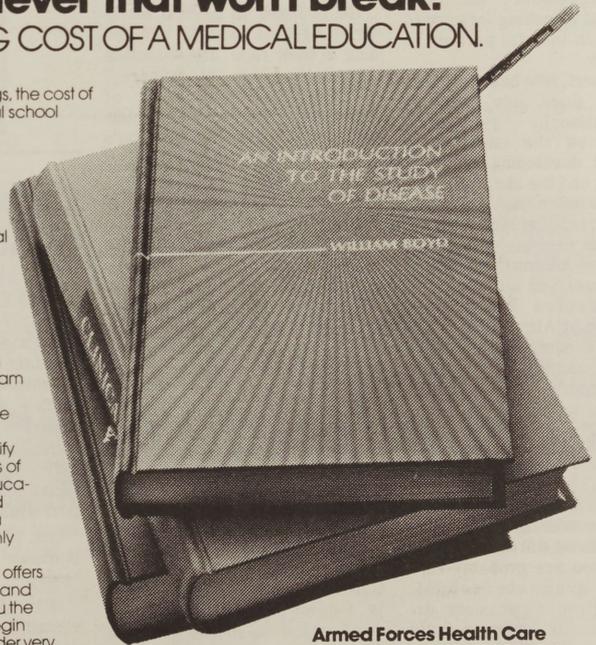

Like most things, the cost of attending medical school has risen sharply over the last decade. To many medical students that cost represents a heavy burden, a financial problem that can affect your concentration.

It needn't be that way. The Armed Forces Health Professions Scholarship Program was originated to free you from those worries. Men and women who qualify will have the costs of their medical education covered, and will also receive a substantial monthly allowance.

The program offers more than tuition and salary; it offers you the opportunity to begin your practice under very favorable conditions. As a health care officer in the military branch of your choice, you'll find yourself with responsibilities fully in keeping with your training, and with the time and opportunity to observe a full spectrum of medical specialties.

When you decide on the specialty you wish to pursue, you may find yourself taking those graduate medical studies at one of our many large and modern medical centers. If so, you can count on that training being second to none. Both the clinical and research work being done in them have made Army, Navy and Air Force hospitals a major new national medical resource.

It's a long road, but the first step is simple. Just send in the coupon. The details we send you may make the whole way a little smoother.

## The uncompromising ones.

The Hewlett-Packard  
HP-21 Scientific  
\$125.00\*

The Hewlett-Packard  
HP-25 Scientific Programmable  
\$195.00\*

## The calculations you face require no less.

Today, even so-called "non-technical" courses (psych, soc, bus ad, to name 3) require a variety of technical calculations—complicated calculations that become a whole lot easier when you have a powerful pocket calculator.

Not surprisingly, there are quite a few such calculators around, but ours stand apart, and ahead. We started it all when we introduced the world's first scientific pocket calculator back in 1972, and we've shown the way ever since.

The calculators you see here are our newest, the first of our second generation. Both offer you technology you probably won't find in competitive calculators for some time to come, if ever.

Our HP-21 performs all arithmetic, log and trig calculations, including rectangular/polar conversions and common antilog evaluations.

Its display is fully formatted, so you can choose between fixed decimal and scientific notation.

Our HP-25 does all that—and much, much more. It's programmable, which means it can solve automatically the countless repetitive problems every science and engineering student faces.

With an HP-25, you enter the keystrokes necessary to solve the problem only once. Thereafter, you just enter the variables and press the Run/Stop key for an almost instant answer accurate to 10 digits.

Before you invest in a lesser machine, by all means do two things: ask your instructors about the calculations their courses require; and see for yourself how effortlessly our calculators handle them.

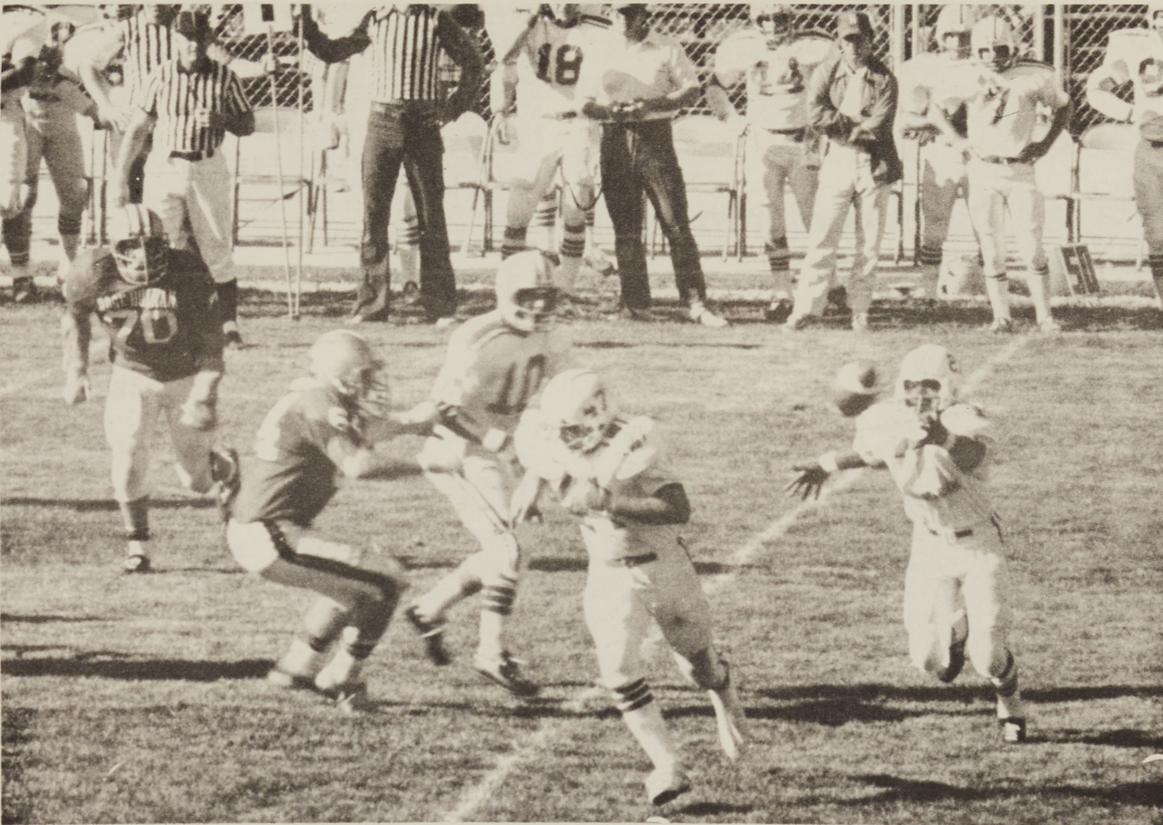

Both the HP-21 and HP-25 are almost certainly on display at your bookstore. If not, call us, toll-free, at 800-538-7922 (in Calif. 800-662-9862) for the name of an HP dealer near you.

Larry Riggen and Phil Audet prepare to handle a Hanover pitchout.

# Hanover Spoils Engineer Homecoming

After an even first half of play, Hanover's Panthers gained momentum and snuffed out the Engineer threat in the second half of last Saturday's homecoming football game.

Rose-Hulman played inspired ball the first half, scoring first blood and leading 12-10 at the intermission. However, Hanover's superior size and speed took its toll in the second half.

Hanover received the kick at the start of the game, but were forced to punt by a tough Engineer defense. After a good Hanover punt, Rose took over on their own 8. The offense then took over, driving the 92 yards in just 13 plays. All but one play was on the ground, Kevin Kingery going the last nine yards for the score.

Hanover then drove, missing one field goal and converting another. After an intercepted pass and freak clipping penalty put the Panthers on the Rose 26, Hanover scored their first

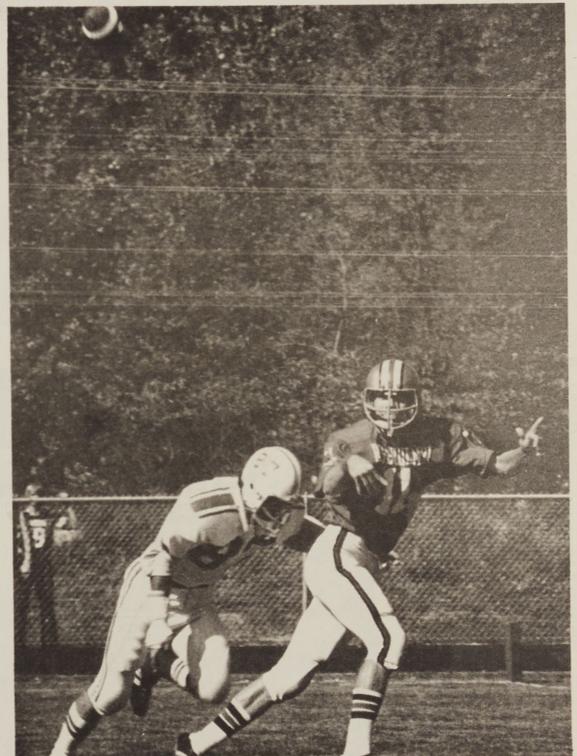

Defensive End Phil Audet makes the Hit of the Day on the Hanover Quarterback. Photo by Greg Keck.

touchdown of the day. The Engineers came right back with only 3:38 left in the half, aided by a 33-yard kickoff return by Bob Burwell. Gary Lee hit Jim Gidcumb with a 29-yard toss with just over a minute left in the half.

Hanover gained important momentum mid-way through the third stanza, driving 46 yards after Rose had to punt from their own 17. Rose again drove into Panther territory but were halted by an interception. Hanover took over and again drove for a score. Rose drove inside the Hanover 20 before they were stopped and lost the ball on downs. Hanover took over and drove for their final score.

The game was a very physical one, Kingery receiving a bruised shoulder. Several good hits by Phil Audet, Tony O'Neill, Tim Lockery, and John Schroeder were made on the Hanover ball carriers. Hanover's excellent running back Anthony Brantley was taken out early in the game with bruised ribs, and their quarterback was sent to the bench on more than one occasion.

Tomorrow will see Rose being entertained by the Wilmington Quakers. The Quakers are big and very good. They are presently 1-1.
