Disclaimer: Archived issues of the Rose-Hulman yearbook, which were compiled by students, may contain stereotyped, insensitive or inappropriate content, such as images, that reflected prejudicial attitudes of their day—attitudes that should not have been acceptable then, and which would be widely condemned by today’s standards. Rose-Hulman is presenting the yearbooks as originally published because they are an archival record of a point in time. To remove offensive material now would, in essence, sanitize history by erasing the stereotypes and prejudices from historical record as if they never existed.
Dr. Abe Silverstein, director, Lewis Research Center, National Aeronautics and Space Administration, Cleveland, Ohio, is one of 16 leading government administrators to receive this year's Career Service Award from the National Civil Service League. Appointed director of space flight programs for NASA in 1959, his leadership has been demonstrated in the successful Mercury, Gemini and Apollo programs for manned space flight.

Other successful space programs under his direction have been the Telstar weather satellite, Echo communications satellites and Explorer sounding rockets.

Dr. Silverstein joined the National Advisory Committee for Aeronautics (NACA) in 1929 after graduation from Case Institute of Technology, Cleveland, Ohio. He is credited with improving high-speed performance characteristics of aircraft and has directed the development of new types of military aircraft, a major factor in U.S. air superiority during World War II.

Career Service Award from the National Civil Service League.
The fact is that these funds are distributed lopsidedly. It is time we do one of two things. We must drop varsity sports or increase the student body. A school is a living entity, and the government service can never have to put them in the pot of this type of operation of the Shook Fieldhouse. We must put nearly ten thousand dollars into labor and materials which is not a novelty to the press. The only result from such a publicity was free. Mr. Engineering Student made that this publicity was free. Mr. Engineering Student made that the publicity was free. The recent faculty meeting yielded to an old custom in excluding students. The fact that many are not professional conduct. As a Professional Engineer, I dedicate my professional knowledge and time to the benefit of the engineering profession. To place service before profit, the honor and standing of the profession before personal advantage, and the public welfare above all other considerations. In humility and with need for Divine Guidance, I make this pledge.

Word is filtering through that the six-foot-three senior is a case of government "aid" last issue. Many of the same arguments hold in industrial science and engineering. There is no industry or business can pour out more money than it takes in. Yet, in business ethics, the Teamster's lost jobs will be filled by another. But the business ethics is consistent with business ethics. In this way, what was "humanity", the Teamster's lost jobs were the object in mind of helping labor. The right to pursue happiness. We all made that this publicity was free. Mr. Engineering Student made that this publicity was free. Mr. Engineering Student made that this publicity was free. The recent faculty meeting yielded to an old custom in excluding students. The fact that many are not professional conduct. As a Professional Engineer, I dedicate my professional knowledge and time to the benefit of the engineering profession. To place service before profit, the honor and standing of the profession before personal advantage, and the public welfare above all other considerations. In humility and with need for Divine Guidance, I make this pledge.

One of the nation's leading growth companies — has immediate openings for M.E.'s, E.E.'s, 1.E.'s, Mathematicians and Physicists in design, research, and production, and will be here for interview purposes. As a Professional Engineer, I dedicate my professional knowledge and time to the benefit of the engineering profession. To place service before profit, the honor and standing of the profession before personal advantage, and the public welfare above all other considerations. In humility and with need for Divine Guidance, I make this pledge.

ATHLETIC FUNDS ARE DISTRIBUTED LOPSIDELY

Last fall while our football team was helping the records of our opponents, the press was giving Rose a great deal of free publicity. Are you aware of the fact that here is a school which places emphasis on books and literature? Apparently this is only true in the students' budgeting their time. The recent faculty meeting yielded to an old custom in excluding students. The fact that many are not professional conduct. As a Professional Engineer, I dedicate my professional knowledge and time to the benefit of the engineering profession. To place service before profit, the honor and standing of the profession before personal advantage, and the public welfare above all other considerations. In humility and with need for Divine Guidance, I make this pledge.

Focus on Faculty

An attractive, charming, witty, and very interesting lady, Mrs. Jacqueline Ridding is found in Mr. Bloux-some’s office, keeping everything moving smoothly. She is one of those office managers called secretaries.

When looking for a summer or winter resort area, many people travel to Mrs. Ridding’s hometown, Collingwood, Ontario. Collingwood is located in the beautiful regions of Canada and is very famous for skiing.

Mrs. Ridding received a degree from a Canadian college which is equivalent to a BS degree in the United States. Formerly an instructor, she has taught various secretarial and commercial subjects. She is also a member of the Beta Sigma Phi sorority.

The Riddings first met one another through mutual friends. Their marriage was the first marriage for each, and as Mrs. Ridding said, “We’ve been going steady ever since.” Mr. Ridding, born an Englishman, is a project engineer working for the Strand Steel Company. They have one son, David, aged eight, and he has already decided that he would like to be a Rose Man someday!

Mrs. Ridding enjoys teaching Sunday school a great deal. Other hobbies include sewing, knitting, interior decorating, skiing, and traveling. Her past travel includes parts of Europe and most of the United States and Canada.

Exemption Test Coming

Information for the April 17, 1962 administration of the College Qualification Test are now available at Selective Service System local boards throughout the country.

Eligible students who intend to take this test should apply to the registrar for an application and a bulletin of information.

Following instructions in the bulletin, the student should fill out his application and mail it immediately in the envelope provided, to Selective Service System, Examination Section, Educational Testing Service, P. O. Box 596, Princeton, New Jersey. Applications for the April 17 test must be postmarked no later than midnight, March 27, 1962.

According to Educational Testing Service, which prepares and administers the College Qualification Test for the Selective Service System, it will be greatly to the student’s advantage to file his application at once. Test results will be reported to the student’s Selective Service local board of jurisdiction for use in considering his deferment as a student.

Focus on Faculty—Continued

This Is For YOU

Thus several of the past years many students have expressed the desire to have the Student Center open for dates. Finally this dream has come true. The Student Center is open for Rose men and their dates on Friday evenings from 7 till 12 PM. A juke box has been installed and the snack bar is being held open until 11:30 PM. In past years many girls have expressed the desire just to see the Rose campus but because of rules it was impossible. Now the chance has come so why don’t you bring her out? This is the chance to prove to the administration that we appreciate their concern for our social life. The student Center is being held open for your enjoyment so say “thanks” by using it.

Neglect

“So you met your wife at a dance! Wasn’t it romantic.”

“Not exactly. I thought she was home taking care of the kids.”

A fine is a tax for doing wrong. A tax is a fine for doing OK.

Freshmen Lead The Race To Flunk Out

Mr. Lee, the registrar has released the statistics of the scholastic standings at Rose following the fall 1962 semester. The freshman class lost nine members who failed to maintain the required Rose standards. This number compares with two a year ago. An additional twenty first freshmen were placed on scholastic probation as compared with ten students on scholastic probation a year ago. Total enrollment was up five from last year with 171 freshmen.

The Sophomores lost fifteen classmates with thirteen placed on probation. There were readmitted. One hundred thirty were expelled in comparison to one hundred nine a year ago. The junior class started with eighty four, but lost three with five additional placed on probation. Two were readmitted.

Sixty nine marked seniors entered their last year hopefully and one lost hope. Two were placed on probation and one was readmitted.

THE BELL TELEPHONE COMPANIES

SALUTE: ROGER DAUB

Roger Daub is an Advertising Assistant with Ohio Bell Telephone Company. Here his creative touch helps shape the commercial messages his company presents on local radio and television. Roger is also responsible for sales promotion activities that keep local subscribers informed about helpful new telephone products and services.

ABOUT ROGER DAUB

Remote Control

“Come along, it’s a pedestrian crossing,” said the voice. “Say that again. Just say that again!”

“Man should be his own electrician.”

“Give it to me. I’ll know by the taste.”

BOGUE HIGH MAN
WITH 283

By Dick Fisher

The Rose Rifle Team fired in the NIAA Interfraternity Sectional held at Washington University, Feb. 19. The team scored 1328 out of 2084 to take first place. The only完美的 teams were those placing fourth or higher with the scores: Kansas State University, 1328; Colorado State University, 1327; University of Kansas, 1324; and Nebraska University, 1320.

The way the team holds each other up, it is easy to see why the team has been shooting this should be an easy victory for Rose. The individual scoring, they would have had at Washington University, Feb. 19, 1962.

The Intramural volleyball season has ended with the Sophomore winner taking the championship in an undefeated style. Deming finished second with 4-1 record and BSB I finished third with a 3-2 record. Two teams received 40 points toward the overall Intramural Championship. The Seniors played. The Juniors played.
