Math Contest At Rose

Rose Polytechnic Institute will host the Fourth Annual Mathematics Competition for collegians Saturday, April 19, it has been announced by Dr. Herbert R. Bailey, chairman of the Mathematics Department at the institute.

Entries from eight colleges have been received for the competition, with mathematics tools required to complete the test ranging from college algebra to topology. The test will be written and graded by Dr. Robert Gambill, professor of mathematics at Purdue University.

Teams will be comprised of three members working jointly on all problems. Registration for the competition is scheduled for 11 a.m., with teams given approximately three hours to complete the test.

Colleges entered at the present time include defending champion Earlham, DePauw, Marian, Manchester, Wabash, Franklin, St. Mary of the Woods and Rose Polytechnic.

Contemporary Thinking Class

Tuesday, April 22, at 10:30 a.m., the Rose student body will be treated to a dose of enlightening information quite uncommon on conservative campuses. Dr. John W. Snyder will speak on student unrest in America's colleges. It was suggested that possibly our students could take notes. Who is Dr. John W. Snyder? This was a difficult question to answer. For several years he has been Dean of Undergraduate Affairs at that hothed of revolution at Bloomington, Ind. Before this, it seems, he had even more experience in associations with several other of our nation's colleges.

Dr. Snyder is planning a talk of roughly three quarters hour.

“Good 'ol SAGA is at it again!”

ROSE MEN CITED FOR OUTSTANDING ACHIEVEMENTS

On Tuesday, April 15, the annual Spring Honors Convocation was held in the auditorium. Many hard-earned and well-deserved honors were bestowed upon Rose men from all curricula. The convocation is sponsored each year by Blue Key, and Charly Rupp, Blue Key president, was the master of ceremonies.

Darrell E. Criss, Dean of the Faculty, gave the opening remarks, and praised the recipients for their "excellence, above and beyond... the ordinary call of duty." Colonel Willets presented the first awards, which were two year R.O.T.C. scholarships presented to sophomores Keith Roberts and Joe Rodriguez. Student Government President Pete Doenges awarded honor keys to Jim Heppner, a junior, and Paul Broughton, a senior, for their excellence in extracurricular activities.

The I-F scholarship trophy, which is awarded at each honors convocation to that fraternity which has maintained the highest scholastic average in the previous quarter, was awarded to the Delta colony of Phi Gamma Delta fraternity, whose scholars maintained an incredible 3.042 average.

Larry Rennels, a senior, was given the Electrical Engineering award for outstanding achievement, both academic and extracurricular, in the Electrical Engineering department.

The award was presented by Dr. Rogers, chairman of the EE department.

Roger Sherfick, president of Pi Mu Epsilon, national mathematics honorary fraternity, announced the selection of sophomores Tom Dehne, Steve Goble, Steve Gwin, and Dave Seabrook, and juniors John Rupp, Blue Key president, was the master of ceremonies. The award was presented by Dr. Rogers, chairman of the EE department.

Going to that fraternity was another of John's ideas. And the formation of a Student Activities office to coordinate campus and fraternity activities with events at other area schools, was a third suggestion put forth.

Student Congress Elections

On the day this reaches the public the election for Student Congress president and vice president is being held. This is the most important election of the year and will guide the Rose student body for the next year. But due to lack of interest and lack of publication of the primary filing date only two individuals filed petitions for president and one for vice president.

Jim Handke of Hinsdale, Illinois, a Chemical Engineering major is the only individual up for election for vice president and is therefore elected to the job by default.

John Hodsden and Chuck Boesenberg have filed candidacy for president. And as is fairly visible their platforms have been posted around school.

Mr. Boesenberg put forth as one of his major goals the establishment of a Rose Club which would function much as a nightclub and gathering place for Rose men. The initiation of a shuttle bus system between Rose and Terre Haute, possibly through use of school cars was another of John's ideas. And the formation of a Student Activities office to coordinate campus and fraternity activities with events at other area schools, was a third suggestion put forth.

Mr. Hodsden put forth as his main aims the improvement of communication in all areas of Rose life. He feels that the next year can bring big improvements in campus atmosphere if the faculty, administration, and students can work and talk together. Chuck wants more representation of students on faculty committees to facilitate the transfer of ideas between students and faculty, and possibly the establishment of a non-voting member on the
EDITORIAL

It is time for the fraternities at Rose to reevaluate the purpose of the IFC. Somewhere in the past the IFC was an organization and, in general, working together to gain more independence for fraternities. However, in the last few years the IFC has degenerated into a confused mishmash of accusations and mismanagement. The fraternities have become more and more disinterested in IFC ideas, and the IFC has become more and more disinterested in fraternity ideas.

For example, the first quarter of each year finds IFC meetings filled with accusations and counteraccusations concerning dirty rush. Yet in the past three years not ONE penalty has been imposed. If nothing is going to be done, why waste time in a meeting? Secondly, each year there is always dissatisfaction with the judging of homecoming displays. Now, in an attempt to solve the problem, the IFC is considering the idea of doing away with the displays in favor of floats. This implies the loss of sight of the problem. Is it easier to judge a float instead of a display? As a final example, it should be mentioned that there is a possibility that the songfest for Greek weekend is to be eliminated due to loss of sight of the problem. Here again the IFC is attempting to solve a problem by eliminating it.

The INKLINGS feels that it is time for the IFC to take a stand and attempt to unify their efforts. If it can't, then IFC members should devote their time to more worthwhile projects.

LETTER TO THE EDITOR

APOLOGY TO CLIFF LEWIS

I would now like to extend a very heartfelt apology to you, Cliff, for the Rose man's apathy; the same goes to Don Spatz and student disinterest.

The first item to offer apologies for is Triangle. This is certainly a mistake in the Rose tradition. You men of Triangle are just going to have to disband; you fellows are just too apathetic to have built such a strong new fraternity in four years—out you go. You are a disgrace to the Rose Apathy Society (which generally consists of do nothings who write about student apathy).

FIJI's, forget it!

I certainly hope that APO has not offended you too much. I am constantly worried about these guys, I think that they must certainly be some kind of a "pinko commie plot."

Jim, Wayne, Memphis, and Bereld, you fellows are a disgrace to the Rose Society. You are constantly going to meetings, writing papers, or running track. Are you trying to make me look good—and aesthetic? I am sorry "guys" but I am trying to buck the system, too. I teach at Lockport center, but this writing bit may take me back to the fold of apathy.

Tom Folz, Henry Keahey, and all you other subversive politicians, STOP; you had better (Continued on Page Three)
Founders' Day Banquet was held last weekend at Tucker's Steak House. Several of our graduating seniors from last year were present for the event, and an entertaining evening was wrapped up with an impromptu tea party at Brother Mathew's. The TRIANGLE pledges held the traditional "walk-out" to the Kentucky Chapter last weekend. The pledges sufficiently surprised the actives, and Brother Stapleton was stolen without his even being aware of what was happening. The Kentucky Chapter showed the men from Rose a good time, and the pledges staggered back with many memories late Sunday afternoon.

The TRIANGLE major softball team lost two close games to Sigma Nu in the past week. In the I.F. game Sunday, the team lost 12-11 in the last inning after leading most of the way. Although the two losses hurt, much promise was shown, and a good season is expected. Congratulations to the new "Master Philologist" of TRIANGLE, Brother Bob Kraus.

FIJI DELTA COLONY

In the sports spotlight, the baseball team is looking forward to a fine season. In spite of defeat in the season's opening game after a very close battle and many hard breaks, the Colony Baseball Squad is exhibiting signs of increased morale and enthusiasm; there are definite indications that the team is pulling together according to George "Babe Ruth" Butkovich. Members of the Colony—get out there and support your brothers!

In the co-educational spotlight, Bruce pinned Dan last Sunday evening!

Don't forget the car rally on Saturday, April 19.

Next work day for the Terre Haute Park District will be on Saturday, April 26. There is plenty of notice on this so everyone ought to be able to make it, or at least have enough time to dream up an original excuse.

"Up, up and away." Mark Rose clears the bar during a practice session.

STONE LEADS

Rose's golf squad, sparked by the consistently low scoring of senior Sid Stone, is off to a 2-1-1 record after the first three matches of the season. In a three-way match at Columbus on April 8 the Engineers lost to Indiana Central 8-10 and tied Hanover 9-9. Stone was low man with a 74. The scoring in this match was on a medal-medal-medal basis, with one point going to the man with the low score for the first nine, the second nine, and combined, for a possible of three points per man per match. Rose's home meets, along with most others, are on a match-match-match basis. This system gives a point to a golfer for winning the most holes on the front nine, again on the back nine, and then a point for the low score after 18.

Rose played DePauw at Rea Park in Terre Haute on April 10 and came out on top, 10-8. Stone was again low with a 75, but closely followed by Tom Thuerbach's 76 and Tom Szabo's 77.

Last Saturday Rose won their second match of the season by a score of 11-7 against Wabash at Rea Park. Stone's 73 was once more the low score.

There are over 103 million drivers in the country, in 97 million vehicles, rolling up nearly one trillion driver-miles a year.

EIT'S HELD APRIL 26

The Engineer-in-Training Examination, first step in securing registration as a professional engineer, will be given at Rose Polytechnic Institute Saturday, April 26, between 8 a.m. and 5 p.m. All bachelor of science engineering degree candidates who will graduate prior to June, 1970 have been requested to take the examination. The examination will be administered by members of the faculty at Rose headed by Prof. Herman A. Moench a member of the state board of registration, and Prof. Irvin P. Hooper, a consultant to the board. Applications for the test may be obtained in the Business Office at Rose.

CONTEMPORARY THINKING CLASS

(Continued from Page One)

duration, to be highlighted by a somewhat informal period in which ample time will be allowed for the Rose students to interrogate him. Particularly appropriate questions might revolve about his personal experiences at I.U.

Though not in the habit of doing things for his own good, the student should think twice before missing this convo. Other school's students have prob-
