Disclaimer: Archived issues of the Rose-Hulman yearbook, which were compiled by students, may contain stereotyped, insensitive or inappropriate content, such as images, that reflected prejudicial attitudes of their day--attitudes that should not have been acceptable then, and which would be widely condemned by today's standards. Rose-Hulman is presenting the yearbooks as originally published because they are an archival record of a point in time. To remove offensive material now would, in essence, sanitize history by erasing the stereotypes and prejudices from historical record as if they never existed.

This Book is brought to you for free and open access by the Student Newspaper at Rose-Hulman Scholar. It has been accepted for inclusion in Institute Inklings by an authorized administrator of Rose-Hulman Scholar. For more information, please contact [weir1@rose-hulman.edu](mailto:weir1@rose-hulman.edu).

# INSTITUTE INKLINGS

VOLUME 5, NUMBER 3

ROSE POLYTECHNIC INSTITUTE

TERRE HAUTE, INDIANA

OCTOBER 17, 1969

## Rose Conquers!

by Bob Penno

Shaking off early doldrums, the Engineers of Rose Poly stormed past Indiana Central, marking Rose's first victory in 12 games. Coach Bob Bergman's young charges proved their worth to an Indiana Central homecoming crowd in registering a come-from-behind triumph over a much larger opponent. Weary of what had seemed a Rose tradition of losing, the Engineers put everything together in constructing a well deserved mastery over a never-say-die foe.

Receiving the opening kickoff, Rose wasted little time in scoring as fullback Jerry Bertam reeled off two quick gains and halfback Tom Merrill took a scoring pass from Rick Manuszak. Not to be denied so easily, Indiana Central evened the count and, minutes later, surged ahead as they returned an intercepted pass for another touchdown.

Stunned into ineffectiveness for the remainder of the first

## SCHOLARSHIP REPORT

Even if no one else has heard of Rose Tech, the Indiana State Scholarship Commission can testify to the existence of this fabled institution. Of the 259 Indiana frosh in the class of '73, 188 landed state scholarships bringing to the Rose coffers nearly ten per cent of the \$1,300,000 allocated for scholarships this year. This dollar amount was topped only by Indiana University and Purdue, and the total number of recipients was only greater in the four state supported universities. With 11 per cent of the 1750 male scholarship winners this year, Rose showed-up all the other private colleges and

## HOMECOMING? WHY?

Now that fall is once again upon us, it's a safe bet that complaints about traditional Homecoming will not be far behind. For many, the time and expense are far from justified, especially in the case of the freshmen, who have never experienced such an occasion. Far from being a rinky-dink hodgepodge of someone's idea of everlasting traditions, Homecoming can be a very enjoyable and rewarding experience. For some reason, the freshmen stay up a little bit later, the fraternity men work just a little longer, the dates look a little bit prettier, and the team puts out just

a little extra on Homecoming weekend.

I know there are some who believe that Homecoming is going the way of Christmas, a retail festival for the betterment of the local merchants. Perhaps they will always look on that cloudy side, but they don't reflect the opinion of the majority, for without fail, once the backbreaking work on bonfires and floats, expense of dinners and flowers, and worry of visiting parents and sleepy dates is over, a genuine sigh of relief is usually heard, accompanied

*(Continued on Page Four)*

## WANT A JOB? INTERVIEW!

The schedule for companies interviewing through the month of October are available in the Administration Building. These schedules will change each month providing a wider assortment of companies for the student to interview.

The interviews, conducted by company officials, are the culmination of four years work at Rose. Almost all jobs are obtained through interviews scheduled on our campus. Furthermore, numerous summer jobs can also be obtained by underclassmen as well as valuable experience in the art of interviewing. The impression a student makes during his interview can mean a sizeable difference in salary or possibly a job offer.

A list of the companies coming to Rose's campus would fill up several pages but a few of the major ones are Ford, General Motors, RCA, Chrysler, U.S.S., and Bell Telephone. So don't you freshmen become alarmed when you see a senior dressed in a sport coat, he is just trying to impress some company representative, just as you will be doing in four years.

## NEW ROTC PROGRAM

The Military department at Rose has undergone many changes since the past school year. Research conducted at Ohio State University concerning the ROTC program resulted in the development of the option C program. Rose is one of eleven colleges adopting this ROTC program, which consists of replacing much of the training and drill with sound academic instruction. Academically qualified instructors will be teaching the freshmen World Military History while the sophomores will be taught The Concept of Power in the International System, a course dealing with political science. There

**EDITORIAL—**

In his letter of October 14, President Logan stated: "I am opposed to any arbitrary action, such as the cancelling of classes, an action which would seriously embarrass our Government in its difficult task of bringing the Vietnam war to a satisfactory conclusion." He also hoped that the students would "refrain from actions which might embarrass our national leadership."

Is it possible that what our Government needs is some serious embarrassment to get it moving toward a prompt end of the war? And is it possible that Rose Polytechnic Institute is afraid to be embarrassed? After all, the Rose student body radiates peace and contentment. It says so in the catalogue. Could it be that the administration is more worried about the image of Rose than it is about making decisions concerning critical moral problems that relate to Rose.

—E.C.A.

**Editor's Note:**

In future issues of the Inklings there will appear a series of articles concerning students and the draft. These are articles meant to be informative to all Rose students. The Inklings wishes to thank Steve Duncan for taking his time to contribute.

**THE DRAFT AND THE STUDENT****THE 2-S DEFERMENT**

No. 1

There seems to be many students at Rose who are totally

oblivious to the World around them. Most of them are freshmen who through inexperience have not yet become aware; others are a good number of upperclassmen who seem to be so secure in their positions that they are just not interested. There is one subject that influences every student at Rose or any other school and that is the Selective Service System or the Draft. This "common denominator" of college students is one of the most crucial factors controlling continued education and yet one of the most mis-understood.

When you entered Rose as a freshman, the administration through one of its secretaries or employees, gives each registrant in the Selective Service System a form (SSS form 104). This form is a standardized request for a 2-S student deferment. The statement seems to most as just an administrative chore and most everybody fills it out without really understanding the terms of the request.

The 2-S deferment is set up by law to be given to undergraduate students who meet the requirements:

1) You must request the deferment in writing, either on form 104 (as Rose students usually do) or by letter.

2) You must make sure that your college sends a Student Certificate (form 109 or equivalent) to your draft board, stating that you meet the requirements for that deferment. At most colleges, this is not done automatically; you must request it. (At Rose this is done automatically and a copy of the form 109 is sent to the

student's mail box).

3) You must be receiving credits toward a bachelor's degree for your courses.

4) You must be a full-time student. "Full-time" is to be defined by the particular college.

5) You must be "satisfactorily pursuing a full-time course of instruction." According to the regulations, this means that you must be completing enough course work each year to receive your degree in the normal number of years.

6) You must be under 24 years old.

The Regulations require that if you qualify for the deferment you will receive it for an entire academic year at a time, unless you graduate or leave full-time study. Since the academic year is defined as the 12-month period following the beginning of your course of study, you have the summer to make up any credits that you may lose in the regular school year.

There is some hope for the students that fall behind. If the deficit in credits is such that it does seem to appear as a hinderance for graduating on time. In other words, if you will be able to show that you will be able to make up the lost credits in time for graduation.

There are several disadvantages to the receipt of a 2-S deferment that are almost always not understood by the student who requests it.

1) You can never receive a 3-A deferment because of fatherhood. You may still receive the 3-A deferment for extreme hardship cases to dependents but is much harder to get than the fatherhood 3-A.

2) Your draft eligibility is extended to age 35. This is true for all deferments, but it has not mattered because in practice you will not be drafted after you are 26. (If the law remains the same this will be true.)

3) You become eligible for a "prime age group" if there is ever one formed, and this could actually cause you to be eligible to be drafted after you were 26.

4) You will not be eligible for a 1-S (C) deferment if you receive an induction order as a graduate student after receiving your bachelor's degree.

These stipulations are the ones that are not impressed upon the requesting student and should be known and contemplated by the student.

There are many aspects the draft conceals from its registrants. Before any registrant acts on a 2-S deferment of any

other deferment or any transaction on with their draft board they should see and talk to a draft counselor who is trained in the ways of the draft. In Terre Haute, draft counselors are available at the Terre Haute Draft Project, 677½ Wabash Ave., phone 235-1270, or you can contact me at Box 952 on Rose Poly's campus. The counselor will give you helpful, objective, accurate information.

**LETTERS TO THE EDITOR**

October 7, 1969

Dear Editor:

The last issue of the Institute Inklings (October 3, 1969) greatly distressed me. It was not that the edition was not enjoyable to read and highly relevant to student life at Rose. In the six pages that constituted it, the center fold was two full page ads as was another page; the rest consisted of two very weakly expressed editorials, some news about student government, a well written letter by a graduate of Rose, miscellaneous and the sports section. Of all the sections to be disturbed about, it would seem to be most nauseating that the sports section should draw my criticism. Since the sports sections is supposed to be news of recreation, enjoyment, sports, it seems to be most distressing to write this letter.

I am most violently objecting to the reference to the defensive football team's mascot. For me it is inconceivable to imagine the degree of morbidity and moral decay that is necessary to cherish such a souvenir as a human skull from a battlefield in Vietnam. But it is even more appalling, to the point of immorality, to think that such an object would represent something desirable to the grid iron stars. One of the most disturbing aspects of the article was to learn that it had been written by a student whom I respect highly. I haven't as yet been able to decide whether he was just performing his objective reporting assignment or fulfilling his part in the never ending disappointment that I find in the sanity of mankind.

As long as people of the world consider death of other human being in such a degrading way we will have no hope for the attainment of human dignity or self respect. I personally value all human life too dearly to be able to support or

Come as you are!

NOVEMBER 21, 1969

Now's the time to sign up at your placement office for an interview with the Bethlehem Steel Loop Course recruiter. This could be the start of something big!

And just what IS the Bethlehem Steel Loop Course? Glad you asked! It's our *management development program* for graduates with bachelors' or advanced degrees.

Bethlehem loopers (150 to 200 every year) spend four swinging weeks at our home offices in Bethlehem, Pa. Then, primed with information about the entire corporation and rainin' to go, they report to the appropriate plants or departments for their first assignments. Then, onward and upward!

Where would YOU fit into the Loop Course? Check your degree or the one most similar to it:

**MECHANICAL ENGINEERING**—Engineering or mechanical maintenance departments of steel plants, fabricating works, mining operations, and shipyards. Fuel and combustion departments. Supervision of production operations. Marine engineering assignments in Shipbuilding Department. Also: Sales or Research.

**METALLURGICAL ENGINEERING**—Metallurgical departments of steel plants and manufacturing operations. Engineering and service divisions. Technical and supervisory positions in steelmaking departments and rolling mills. Also: Research or Sales.

**CHEMICAL ENGINEERS**—Technical and supervisory positions in coke works, including production of by-product chemicals. Fuel and combustion departments, including responsibility for operation and maintenance of air and water pollution control equipment. Engineering and metallurgical departments. Steelmaking operations. Also: Research or Sales.

**INDUSTRIAL ENGINEERING**—Positions in steel plants, fabricating works, shipyards, and mines. Engineering and maintenance departments. Supervision of steel-making, rolling, manufacturing, and fabricating operations. Also: Sales.

**CIVIL ENGINEERING**—Fabricated Steel Construction assignments in engineering, field erection, or works management. Steel plant, mine, or shipyard assignments in engineering, construction, and maintenance. Supervision of production operations. Sales Department assignments as line salesman or sales engineer (technical service to architects and engineers).

**ELECTRICAL ENGINEERING**—Steel plant, fabricating works, mining operations, and shipyard electrical engineering, construction, and maintenance departments. Technical and supervisory positions in large production operations involving sophisticated electrical and electronic equipment. Also: Research or Sales.

**MINING ENGINEERING**—Our Mining Department operates coal and iron ore mining operations and limestone quarries, many of which are among the most modern and efficient in the industry. This 10,000-man activity offers unlimited opportunities to mining engineers. Also: Research.

**NAVAL ARCHITECTS AND MARINE ENGINEERS**—Graduates are urged to inquire about opportunities in our Shipbuilding Department, including the Central Technical Division, our design and engineering organization. Also: Traffic.

**OTHER TECHNICAL DEGREES**—Every year we recruit loopers with technical degrees other than those listed above. Seniors enrolled in such curricula are encouraged to sign up for an interview.

**ACCOUNTANTS**—Graduates in accounting or business administration (24 hours of accounting are preferred) are recruited for training for supervisory assignments in our 3,000-man Accounting Department.

**OTHER NON-TECHNICAL DEGREES**—Graduates with degrees in liberal arts, business, and the humanities are invited to discuss opportunities in the Sales Department. Some non-technical graduates may be chosen to fill openings in steel plant operations and other departments.

WHEN YOU SIGN UP be sure to pick up a copy of our booklet, "Careers with Bethlehem Steel and the Loop Course." It tells it like it is.

**STUDENT-FACULTY COMMITTEE CONSIDERS OPEN FRATERNITIES**

For several years, the idea of open visitation in fraternity houses at Rose has been knocking around the student government. Last spring a proposal finally took definite shape.

As it now stands, this proposal would limit visitors to the main floor of the fraternity houses, with visiting hours being over at 10:00 o'clock on Sunday through Thursday evenings and at 1:00 o'clock on Friday and Saturday evenings. A member of the fraternity and his date would, under this system, serve as official host and hostess for the guests and would ask them to sign a guest list.

Proposed in addition, is a provision whereby individual violators of these basic rules could be brought before the judicial council by members of the fraternity and stand to lose the privilege of having guests. Accordingly, an entire fraternity could lose this privilege if the IFC found it in violation.

This proposal was signed by the presidents of the six fraternities and now waits to be voted upon by the Faculty-Student Organizations committee. This committee consists of two students and nine members of the faculty. Voting will probably come with the next meeting of this committee.

Regardless of whether or not open visitation for fraternities is approved, there are other proposals in the offing. The Student Government, for example, recognizes the need for upgrading the quality of campus mixers. A possible solution to this problem, which is being considered by the student government, might be the cooperation of the IDC and the IFC, with the IDC gaining by having a quality social event and the IFC gaining by the publicity.

Open visitation for fraternities? A GOOD campus mixer? What is the world coming to? Perhaps time will tell.

**FRATERNITY NEWS TRIANGLE**

The House is built! At long last, the men of TRIANGLE have a house they can call their own. The Brothers and pledges have been working hard individualizing their paneled studied rooms while also helping to clean-up after the workers. The new home is a lasting monument to the work and dedication of the TRIANGLE's before us.

A ROSE CHEERLEADER???

## THE OPIATE OF THE PEOPLES

(Part One)

There has appeared across the nation a new era of religious expression. Sects and cults of dubious origin thrive in such an atmosphere. While many are harmless foibles of the very rich or very foolish, there are some that spread ideas bent on enslaving the body and soul of man. Such a theological idea has appeared on campus and a description should be sufficient to safeguard against its possible harmful effects.

It is usually quite easy to identify members of this order. Tho they have no standard habit as yet, the behavioral patterns that order their lives are an immediate clue. The neo-

phytes, like beginners everywhere, wear a furtive and desperate look as their sweaty palms soil the sacrifices they bring to the sanctuary. Not always the case, but more often than not they wear a verdant skull cap to constantly remind them of their station. They are required to spend hours in the study of the Holy Tongue that is associated with their deity.

The Great Truths, sealed in books kept in the sanctuary, provide enigmas and paradoxes that neophytes, like scholars everywhere, delight in arguing at great length. Neophytes can be seen in the sanctuary at all times, save those, of course,

when the High Priest closes the temple. They never come to worship in the presence of the Holy Idol without a sacrifice to offer at the altar. This is the supreme test of one's diety and is deathly serious business for the young monk. An unacceptable sacrifice can be even more hours of labor in the transcription room where like scholars of old they laboriously translate the great teachings and sometimes daring to compose.

The temple is divided into two parts; one being the greater room or sanctuary and the other, the lesser room. In the lesser room sit idols of minor dieties and the chapel of the High Priest. By far the more resplendent of the two is the sanctuary. It is separated into

two sections which are occupied by the different classes of worshippers. Only the priests are allowed in the area around the idol. Neophytes enter thru a special door and are allowed only to stand in front of the idol where they give their sacrifices to the attending priests who place them on the altar where they are consumed by the idol. Non-believers and pagans are allowed to watch but are not encouraged to enter the sanctuary.

Due to space limitations this article will be continued in a future issue(s), at which time this observer should be able to support his theories with fact and expose this hoax.

### HOMEcoming? WHY?

(Continued from Page One)

by solemn oaths of "never again." Such an annual repetition, however, would indicate a change of heart, brought on no doubt, by reflections on the good times that that weekend brought. This is what brings the alumni back year after year, and hopefully, will also lure you back several years from now. So if all the hoopla seems to be getting out of hand at times, remember, you're having some of the best times of your life, whether you want to or not.

### LETTERS TO THE EDITOR

# "STACKING OF THE TIES"

The freshman class, this week, was given its official initiation into Rose Poly by the upper classmen. Oh, there had been hazing week, which lasted for two days, but the freshmen are never made to feel wanted until bonfire construction begins.

Bonfire construction actually began about Tuesday of last week, when the first batch of brush arrived at the site. That night, the enterprising frosh held a trial bonfire, to make sure that their brush would burn, and the results were affirmative. The next day saw more brush being hauled in by Giffel's Raiders. That night again, the brush was put to the torch to test its combustibility. Again, it passed with soaring colors (would you believe red, yellow and orange?)

After being assured that their brush would burn at the proper time, they really began to stockpile it. An outhouse appeared on the scene, presumably so the frosh could work in longer stretches without having to go back to the dorm when nature called. Those frosh—they're always thinking.

Friday saw the true birth of the bonfire with the arrival of the ties. The frosh worked all day at the arduous task of transporting the ties from the east side of the fieldhouse to the west side, and by nightfall a

sizeable number had been assembled.

Bright and early Saturday morning, the residents of the new dorms were awakened to the shouting of the freshmen as they began the "Stacking of the Ties." By noon, about 100 ties had been woven into the intricate design that would soon be "The Bonfire," and already it was 25 ties high. Quite an accomplishment for the "first day." The rest of the day was spent in getting the truck out of the mud where it was imbedded up to its axles.

The first welcoming party started that night. It seems a group of sophomores noticed how high the bonfire was getting and in a surge of kindness went over to give the frosh the benefit of their extra year of knowledge. They showed the frosh how the structure was in unstable equilibrium in its present design, and they informed them that the situation could be remedied by the removal of a few of the uppermost ties (like about the top 50). The frosh quickly saw the logic in this and immediately began the removal of the offending ties. The ties were then carried down to the creek to be washed up before they were reused. The outhouse, too, was moved to the creek which the sophs pointed out was a much more sanitary location due to the

presence of running water. Everyone parted company in the best of spirits with feelings of good will on both sides.

Sunday dawned at sunup, and saw the frosh rapidly re-approaching the point where they had left off on Saturday. They worked hard all day and by nightfall they had almost repaired the damage of the night before. By Sunday night the sophs were feeling a little sorry for the frosh, suffering out there in the rain, and cold all alone, so a group of them decided to have a little party with them. Do you remember when you were little, and a new kid moved into your neighborhood? What did you do to welcome him? After you fought him, and lost, you invited him over to your house to play. You usually ended up in the backyard playing army, or making mud pies. Well, the sophs, who are still kids at heart, decided to give the frosh a similar welcome. A group of them played the attackers, and the frosh (all eight of them) played the defenders. After calling in the reinforcements, the frosh surrendered the bonfire, although it remained intact. After these frivolities, the group all gathered in front of the bonfire for feats of strength. And afterward the fun continued with the frosh and sophs making mud pies together in the manner of true friendship. The party was concluded with a free swim in the lake for an hour, compliments of Mr. Lawthur, and when the night ended, the frosh must certainly have felt more at home than they had earlier. With classes resuming Monday, activity at the bonfire was light. Instead of toiling on the bonfire, the frosh pursued their academic interests (such as hum lectures) and there was only a token guard at the site (actually one frosh came down and stayed for 35 minutes trying to find his glasses which he dropped at the party the night before.)

Monday night was a biggy over at the new dorms. Yes, it was time for the annual reunion of the Mess Hall Marauders. They got together and talked over old times at dinner. Then, after dinner, their nostalgia overcame them and they donned their old Marauding uniforms, armed themselves, and went looking for the enemy. Upon leaving the

dorm, what did they spy but the bonfire, but they did not recognize it as such. Instead they mistook it for the wall around one of the cities they had attacked back in the war. (The big one—WW II). Immediately, they sprung into action. They set up their artillery along the creek, and sent out sentries to scout around. After a few preliminaries, they began the barrage on the Nazis (frosh). The first few shots were aimed at the enemy campfire, but these were out of range. The barrage was then directed to the searchlight which was scanning the horizon, presumably for aircraft.

Bam! Bam! Bam! Bam! Four direct hits on the searchlight. In a few seconds the generator power in the light sputtered to a stop, probably due to the water from the artillery shells penetrating the gas tank. The target now shifted to the command headquarters tent lying off to the left. Three shots later, the tent faded into oblivion after direct hits. After hurling all their ammo, the Marauders began to hurl obscenities, and when these, too, ran out, they retreated into the sanctity of the dorm. And one more cold night of loneliness was made a little warmer for the frosh by the knowledge that everyone had not forgotten about them.

As of this writing, construction was still underway on the assemblage of ties, or the big, bawdy, beautiful, benevolent bonfire, as it is lovingly referred to by the frosh. Because of the warm reception the frosh have received from the upperclassmen, it is certain that they have exerted themselves extra hard and will have the bonfire ready to burn tonight.

## QUOTE OF THE WEEK

"Think for a moment. You are to spend four years of your life at this institution." from Student Handbook, vol. LIV.

## Nothing's happening in '69. Except you.

As far as Libbey-Owens-Ford Company is concerned.

Everything else is old hat.

We've been there.

In missiles and lasers.

On space walks.

Wherever and however glass could go.

Next stop — the 21st century.

With only once-a-year pauses on campus to look for creative engineers and scientists for technical center, manufacturing and sales functions.

If this is your year to happen, look for our representative.

## SCHOLARSHIP REPORT

*(Continued from Page One)*

universities in the state. Imagine, Rose ranked first over Notre Dame, De Pauw, Earlham and other well-known schools!

How did Rose manage to land this high percentage of Hoosier scholars? One reason lies in the make up of the average Rose student—an individual high in the cognitive skills that the commission uses as basis for granting scholarships. Also, Rose recruiters make it a policy to visit the smaller high schools often ignored by the bigger schools. By enlisting the top members from these smaller schools, Rose picks up the brains that bring scholarships.

The outlook for next year's frosh is somewhat less bright. The state legislature did not allocate additional funds, so any available for scholarships must come from the amount released by this year's graduating seniors and the amount lost by previous winners due to improved economic status, failure to reapply, dropouts, etc. At best there will only be half as much money available to next year's college freshmen. In order to cut down the number of scholarships, the qualifications will have to be stricter. Since

the individuals that are accepted by Rose tend to be the higher ranking ones on the scholarship lists, Rose will be hurt less than many other schools who accept less qualified scholarship winners. The exact results of this lack of state support remain to be seen.

## NEW ROTC PROGRAM

*(Continued from Page One)*

will be no Rose Brigade or leadership lab and the frosh will not have to worry about getting an M-1 thumb or performing a monkey crawl over a treacherous rope bridge.

Many new Military personnel have arrived and will be arriving shortly on campus. Major Dale Lucas is acting P.M.S. until the arrival of Colonel Steinborn November 20. Colonel Robert Willets retired from the military and became the Business Manager at Rose. Captain Beaumont is a new MSIII instructor, replacing Major Cabrina. Captain Heefner will arrive shortly to replace Major Putnins in MSII instruction, and finally to aid in the instruction of the large freshman class will be Captain Capicik.

## ON THE INSIDE

by Roger Ward

Last week's road trip added a new catchy phrase to the team's vernacular. Each player must share with one other teammate a duffel bag for packing their equipment. It seems since last year a few of these bags were missing, so Til had to buy some new ones. In order to preserve the life and immortality of these new canvas packs, Til cautiously warned us NOT TO DRAG YOUR BAG.

After the first game, freshman tackle Jerry DeMeyer pointed out to Til that he had problems keeping his game pants up. The problem stemmed from the fact that one belt just wasn't enough. Jerry's a big boy, fluctuating around 250 lbs., but is also the quickest tackle on the team. It is not unusual to see Jerry downfield leading the ballcarrier. Not to slow Jerry down from dragging pants, Til fashioned for him a special belt. Now Jerry is occasionally called B&H or belt and a half, because his belt was made with the better part of two regular size belts.

Seven years of Rose Poly has finally rubbed off on Til. For years he just wasn't IN because he didn't wear a slide rule on his belt. Now he can stand right up with Rose Poly's BEST. His version of the slide rule on the belt is a pair of scissors in a sheathe with a roll of tape dangling from a short chain on the sheathe all neatly connected to his belt. Til is ready for action just like his studious counterparts.

## FROSH BASKETBALL TRYOUTS

If anyone has seen basketball Coach John Mutchner's eyes twinkling this past week, they know why by inspecting this year's big, strong and surprisingly fast freshmen cagers. It seems as though Coach Mutchner's recruiting job has turned out to be the best in a few years and with a couple of unexpected players added to the list, this year's freshmen crop has the most depth ever held by a team at Rose.

Twenty potential Rose athletes reported for tryouts last week and went through two days of fundamentals. Out of these two days of work, 12 freshmen are still left and will probably be around to give the returning lettermen all they

can handle.

Surviving the final workout were 6'2" Joe Snyder from Vincennes, 5'11" Tom Dedert from Crete, Ill.; 6'5" Gary Duggan from Holland, Ind.; 6'7" Jim Eppen from Speedway, Ind.; 6'3" Jim Minniear from Indianapolis; 6' Roy Fuson from Terre Haute; 6'4" Larry Erwin from Terre Haute; 6'2" Bob Kaufmann from Pason, Ill.; 5'7" Dallas Canfield from Frankton, Ind.; 6' Rich Henthorne from Cincinnati; 6'6" Mike Bennett from Chicago and 6'4" Tom Hans from Worthington, Ind.

An added attraction to this year's season will be the starting of an annual Freshmen-Varsity Basketball game. The game will be held on Wednesday, November 12, at 7:30 in the Field House with all students and faculty invited to get a preview of this year's squad. Furthermore, the cheer leaders will make their first debut. So, come out and look and yell!

## HARRIERS WIN AGAIN

Rose's cross-country squad ran its record 3-1 by downing Hanover by a score of 21-38. Freshman Jim Keith was the first across the four mile course with a time of 23:14. A Hanover runner was second, but Greg Shutske, Steve White and Tom Hans finished third, fourth and fifth.

Earlier, on October 7, Rose beat Franklin 20-43 at Franklin. Jones of Franklin finished first, but the depth of the Rose team paid off, as the Engineers took second through tenth places, led by Jim Keith and Greg Shutske.

The next meet for Rose is this afternoon at Marian. Earlier this year the Engineers romped over Marian 15-54.

## KILL PANTHERS

Tomorrow the Engineers tangle with Hanover's Panthers in an attempt to even Rose's slate at 2-2 against the 3-1 Panthers. The new confidence gained from last Saturday's victory plus some fine Homecoming spirit on the part of the team and the entire school could be the big difference which nets another Rose triumph.

Hanover is blessed with great experience as opposed to the young Rose squad, especially at quarterback where Phil Winning has been a standout for four years with his excellent passing and running as well as his playing defensive halfback.

The only possibly serious in-

jury suffered at IC was a pulled muscle in quarterback Rick Manusak's throwing shoulder. He is hopeful of playing Saturday, but if he isn't playing Rose should have a capable replacement in Mike Box who has been in a close duel with Rick for the QB spot since practice opened.

## JOYCE KINSELL (ABRIDGED)

I think that I shall never see  
Another I.M. victory.  
The halfback's down,  
our flanker's flat,  
Our line's too lean;  
the end, too fat.

Our goal line stand,  
I shudder still,  
It looked to me  
like Hamburger Hill.  
Fractures are made by  
fools like me,  
And only God can mend a knee.

## ROSE CONQUERS!

(Continued from Page One)

canto, Rose's offense sparked to life again in the second quarter as halfbacks Jerry Bertram and Roger Ward ground out mammoth chunks of yardage; Roger Ward eventually taking the tally. A sound defense produced the pigskin once more. "Zak" Manuszak, accepting variety as the spice of life, confidently went to the air and was rewarded by Ed Adams' fine diving reception on the Greyhound's one yard line. Opportunist Roger Ward scampered in for the go-ahead touchdown and Rose's halftime margin of 20-13.

A shocked Indiana Central, 24 point favorites at the outset, returned after halftime Homecoming festivities to narrow

Rose's lead to a single point, 20-19, as the vaunted Greyhound pass offense snuffed out the entire afternoon, struck for one of its few completions. Rose roared right back, however, as Ed "Rabbit" Adams continued his enviable maneuvering in the I.C. defensive backfield. This time, "Zak" connected with "Rabbit" for 45 yards to the Greyhound three yard line, where Roger Ward galloped in on the next play. Kicker Randy Shoaf closed out the scoring with his third extra point in four attempts. Few tense moments were left as the Rose defense repeatedly staved off the Greyhounds' efforts.

The defense of assistant coach Jerry Anderson must be commended for its exquisite handling of the I.C. offense, an uncoveted task if ever there was one. Previously a weak link in a strong chain, the defensive backfield held firm. Comprised of Ray Kominarek, Steve Powell, Bill Randall and Larry Geier, it squelched Indiana Central's leading scorer and receiver, Charlie Jordan, holding him to one reception, that coming too late in the contest to be of any value other than statistical. It must be said that the defense seemingly did not feel like playing unless inside (it's) own five-yard line where it held I.C. at least four times, each at crucial points in the contest.

The offensive line, led by "Big People," Denny Smith and Jerry DeMeyer, consistently opened gigantic holes for the bruising runs of Roger Ward and Jerry Bertram, who added more than 75 yards rushing himself. Moreover, the Engineers gave Coach Bergman his first victory as head coach at Rose. It was an untarnished win, slow in coming, yet hopefully soon in returning.
