Dance the Night Away
Swing Dance Club Hosts Biggest Swing Event Yet

By Evë Maquelin

Sweeping skirts, flying feet, and infectious rhythms swept across the transformed Union last Saturday, where the Rose Swing Club put on its 8th annual Winter Gala. With well over 100 people in attendance, it marks one of the biggest swing events to ever occur at Rose-Hulman.

The night kicked off with a beginner’s lesson, where Rose Swing officers, sophisticated engineer Audrey Brand and senior mechanical engineer David Everhart, covered the basics of East Coast Swing, a form of social dancing developed in the 1940s. Praised for its ease of instruction, it was a perfect choice for Saturday’s event as over half of the attendees had never danced before.

Though most were Rose students, members of the Indiana swing community came as well, including students from other universities like Ball State and Purdue. Many Rose Alumni came as well, thankful for the chance to reconnect with the school. Rose graduate Melissa Montgomery, a resident Thad Hughes. For those still

The Rosie Horn releases new streamlined website

Lauren Wiseman
News Editor

In the words of Digital Content Director Paul Shepherd, “Until now, we haven’t had a true ‘landing’ except for a single page of links.” For Rose-Hulman’s office of Communications & Marketing, as well as across the entire Institute, it has been an on-going and complex project, according to Wiseman, and it marks a significant milestone in the site’s development.

Although it is replacing Rose’s Intraweb, to call My Rose-Hulman would unfairly limit the number of services it can provide. Shepherd explained, “It’s an internal website that will be a central hub to house resources for the campus community.” Anything from student-relevant forms and policies to news items for the entire campus. Not only that, this will introduce Rose’s first integrated calendar and altogether replace SharePoint through its Bulle-

“They’ll have access to all of the resources and tools needed to most efficiently navigate their day.”

Intranet Board. Students also have quick links to Moodle and Banner through the site.

As mentioned above, this has been an effort from Communications & Marketing and the entire Institute. Kuepers said the project “started with a core team of 14 and diverse public that represented the aforementioned departments—from Academics to Facility Management.” A group of end users provided feedback to continuously improve the site. “This has truly been a collaborative effort,” Kuepers said. “This project has been in the works for nearly two years.”

The Rosie Horn team outlined a list of features available to users, which included the previously mentioned Bulletin Board, integrated calendar, and student forms. The Bulletin Board, intended to replace SharePoint, lets students post announcements, which can be categorized in ways like “Books for Sale,” “Housing,” and just general “Announcements.” This website also provides a cleaner approach to distributing and receiving information. The homepage is also syncable to the Outlook calendar, and can be limited to athletic events, club events and seminars; as well as be filtered to student events, staff events, and faculty events.

Student organizations can also create a site for their clubs on My Rose-Hulman. Announcements, events, and club communication is made easier on the site through the communications tool Yammer, and the site’s other features. Clubs and organizations are interested in creating a site for My Rose-Hulman, the club leaders are encouraged to talk to Kristen Latta and Kristen Loyd, who can facilitate that process.

The homepage of My Rose-Hulman offers opportunities for campus-wide connection. Polls give students the chance to give input on pop culture, as well as student interests. The spotlight section is a chance to highlight the accomplishments of students, staff, and faculty. Any club member of the Rose-Hulman community can also submit photos from around campus which will be featured on the homepage.

For incoming freshman of the 2017-18 year, My Rose-Hulman will be their homepage as soon as they open their browser, but for current students, Kuepers hopes they will adopt it as their homepage. “They’ll have access to all of the resources and tools needed to most efficiently navigate their day,” she explained. Kuepers and Shepherd encourage students to get down with the campus. Everything they need will be condensed to this site, which will cut down on the time students spend hunting for links, forms, and more. So take some time to check out My Rose-Hulman and have look around.

“Dance the night away, with only positive looks among how ridiculous you wore!” mentioned student Thad Hughes. For those still interested in swing dancing at Rose, the swing club meets Tuesdays and Wednesdays at 8:30 in the BKC multipurpose room, no partner necessary!

**It's Not Harry Potter and That's Okay**

A Review of Fantastic Beasts and Where to Find Them

Lauren Santich

**Light and minuscule chances in an effort to heal quantumances, chasing after pure the ories ar rogant and proud, something that the likes of which has left him famous beyond belief. This fame has also left him arrogant and proud, something that has soured his medical practice. He's a car and ruins his hands from ever holding a scalpel again.

Disastrous and desperate, Dr. Strange forces away all of his friends and acquaintances. There is no one he can confide in, no one who knows him.

During this time, he meets a man that he had refused to have as a patient, but now he has no choice. The man will not teach him the answer to his mi- raculous recovery, but he will point him in the right direction. After spending the next few days, he learns something truly incredible.

**Being a Wallflower**

From Decem ber 2003, it was determined that The Game Theorists, the sci- ence behind the textbook. Convoluted, sure, but supported by theory and the limits of current possibilities. So it can only be assumed that the movie is telling the truth in this aspect and that there is a factor of magic involved. This ‘magic’, as stated in both the original material and the sequel, comes from a “technology so advanced as to appear as magic.” So it’s possible that we can attain it someday, but not for a while yet.

If you have not seen it yet, already, take some time to watch it. I recommend it.

**The Doctor Is In.**

**Entertainment**

Harry Potter is back...only he isn't. Sure, we are still in the universe crafted by J.K. Rowling, but viewers are treated to an American twist on the cultural juggernaut during the Jazz Age. "Fantastic Beasts and Where to Find Them" is a full-length film based on a textbook referenced in the Harry Potter series; or, rather, a film surrounding the research behind the textbook. Convoluted, sure, but detailed enough that I will spend my order to discuss said snags, I need to delve into some spoilers.

One thing "Fantastic Beasts and Where to Find Them" has going for it above all else is that it is not Harry Potter. I am entire- ly sure that when I say that, too. To con- trast, making a film franchise as mas- stor as Harry Potter is a huge undertaking, particularly when this "Fantastic Beasts" is re- bated by the source material, it is allowed to flourish. Magic in mundane situations, spells flying around, a world beyond our per- ception, and Jazz Age America. Really and truly, it was what the fandom needed: a fresh take on the universe populated with new characters and a different big bad guy.

Speaking of those new characters, the movie could have chosen better actors... or less (but more on that later). Eddie Redmayne is charmingly awkward as Newt Scamander. He looks like he is having the time of his life, and he displays a wide range that he had refused to have a as a patient, but now he has no choice. The man will not teach him the answer to his miraculous recovery, but he will point him in the right direction. After spending the next few days, he learns something truly incredible.

A Review of Marvel’s Dr. Strange

Lauren Santichen

**Flipside Editor**

Lauren Santichen, an agent working for the Magical Congress of the United States (MACUSA),Waterston portrays Tina with a graceful air, capturing Tina’s guarded nature with aplomb. Dan Fogler really stands out as Jacob Kowalski, our resident Muggle. Maj Fogler gives an en- dearing performance that made me breath- c money to buy in a one trip to India, Dr. Strange finds what he is looking for in the most unlikely of places.

Being a man of science, Dr. Strange refuses to believe the teachings of the Ancient One, a person with immense powers and knowledge of spiritual mat- ters. A quick demonstration puts him in his place and gains his acceptance. Beg- ging to be taught, Dr. Strange undergoes a transformation of epic proportions.

Though the nerves in his hands are still damaged beyond repair, he learns of a vast world, a vast many worlds, that are separate from his own and a power to use. He gains the use of mirror spells and weapons through the use of his own mirror wea- pon used by the villains in Dr. Strange's crystal-like structures that reflect a vast network of feet centimeters back to the person holding him. We also see this when Dr. Strange first uses his understanding to turn back time and the divergence of other- wise possible outcomes. Now, once this experiment was stopped, they would not have their original state as light particles, the movie would not be possible. This is something that doesn’t quite happen in the movie. The villains aren’t using high-tech machines and light generators. Strange makes his weapons, according to the movie they are simply using their minds and ‘magic’ to perform these tasks. There ap- pears to be no evidence of this, as of yet.

With new scientific advancements everyday, it is not out of reach for creativity sake, but it is definitely out of the reach of current possibilities. So it can only be assumed that the movie is telling the truth in this aspect and that there is a factor of magic involved. This ‘magic’, as stated in both the original material and the sequel, comes from a “technology so advanced as to appear as magic.” So it’s possible that we can attain it someday, but not for a while yet.

Kanye West Hospitalized
Artist's hard work has finally caught up to him

Kanye West on stage during his Tour. 

Photo courtesy of Complex.com

Over the past year Kanye West has seen a sort of artistic Renaissance through outlets of media and medium alike. With the popularization of the Yezy Originals clothing line, The Life of Pablo, Adidas line of footwear, and his latest album "The Life of Pablo," Kanye has seen an exponential increase to his popularity in recent times. With all of this Kanye West had planned over the years for his Saint Pablo Tour, the tour from August to December with no more than a few days in between each shows. For him, how many circumstances he has taken small hiatuses from his Saint Pablo Tour, due to some circumstances in his life.

Kanye had a show in Washington D.C’ on the same day he had unveiled many pieces from his clothing line on a Yezy Originals fashion show of which he had earlier that same day. Kanye West from then on traveled to Atlantic to have concert after concert with no more than a day or two in between each. As if Kanye West was not busy enough he had released a pair of shoes on October 15, October 24, and three on this past black Friday.

The Saint Pablo Tour was a very sought after concert tour with tickets selling out in many venues across the united states. In true Kanye West fashion every venue was outfitted with his personal unorthodox floating stage which would travel around with him to each show. Until this point his tour had been going well with him performing songs from his previous albums such as Stronger, Runaway, and Power. Although as the tour progressed some of the more recent shows had been getting an awful lot of bad reviews on social media, Kanye West was performing in Sacramento, California in the Golden 1 Center and was about 40 shows into The Saint Pablo Tour. This concert had left fans of Kanye west very disappointed as many had paid hundreds of dollars to witness the artist in full effect, but were instead left with a 30-minute show for one concert and a monologue about Kanye’s societal and political opinions.

Kanye had let to the subsequent cancellation of all of the concerts after this date with only the tickets for the concert in Sacramento still being sold. He then reported that Kanye West had checked into a hospital following the Sacramento concert. Many different speculations have been said about his state of mental health, with sources stating that he hadn’t slept in a week or that he was suffering from a mental breakdown of some sort. As none of this can be completely confirmed we do know a few facts about this situation. Kanye West had obviously been extremely busy in these past few months with many different things on his public agenda and I assume even more on his personal agenda. Also Kanye wests mother Donda West had passed away in the month of November years ago potentially making this time of the year very hard for the man. All we can assure is that no one should wish such distresses on any person and people should only hope the best for any one in Kanye’s situation.

Sharing drinks or food with others

Avoid second hand smoke

When working out, disinfect the equipment before using it

Avoid second hand smoke

When one is smoking, the smoke can contain germs with potential to make someone ill. All it takes is for someone to come within a few feet of the smoker’s breath or smoke could be transferred to another. The smoke can contain germs with potential to make someone ill. All it takes is for someone to come within a few feet of the smoker’s breath or smoke could be transferred to another. So why would they want to clean their dishes in the same room? It may be more expedient to their path to our technological future. Technologic changes will always exist as long as we progress into better products by implanting only one media outlet on their new MacBook.

Since 2000 we have seen many different advancements in technology. From the speed of computing to the size of electronics it always seems as if technology is breaking down a new barrier every year. On this article I am going to discuss a few different technologies that we currently have and possibly a few insights that may be slated for the future.

In the world of resolution and quality we have seen many different technological advancements in multiple industries. For example, we have seen the evolution of the quality of television with even the great 1080p being dethroned by the much crisper 4k resolution. The technology from these same monitors and televisions have also come a long way from their CRT days as they have been getting smaller and smaller ever since their creation. Although these displays have been getting thinner they have also evolved in other ways as the actual display sizes are larger than ever.

In the realm of an ever growing market of smart phones and other cellular devices, consumer technology has reached a level in which you can have the processing power of the entire world of a few decades ago all in the palm of your hand. Popular companies such as Apple and Samsung have been the leaders of this domain for years although due to a few interesting decisions and mishaps, such as the lack of a headphone jack and the explosive situation with the Galaxy Note 7, other competitions have been given a chance to run in on other platforms.

Thaddeus Hughes
Opinion Editor

Something happened. It was slow, it was quiet. It isn't even documented.

Somewhere along the line, we started looking to politicians for leadership.

Every time I hear a cantor in church say “pray for world leaders,” I get con-

fused. We don’t have world leaders. We have some people trying to be world

leaders, but luckily they haven’t fully succeeded. When many of my friends were

saying Clinton would be a more effectual leader than Trump, I was disheart-

ened; I wouldn’t want either as my boss; they wouldn’t be my leader regardless.

I wouldn’t follow their directions to a restroom.

With words like “they’re a unifier” and “they can get things done,” it’s often

forgotten what exactly politicians are sent to Washington to do. Senators and

Representatives are sent to represent. They are not sent to tell their constituents

how to conduct their lives. The constituents are the leaders and the representa-

tives the followers. They are sent not as generals, but gladiators.

The executive branch appears to be one of leadership at first, but only when

you look at their true responsibilities - commanding the army, vetoing or pass-

ing bills, appointments, etc., but this responsibility to lead does not extend to

the American people. The state of the union address should be less of a motiva-
tional speech and more of a true status update; patchnotes.

To be clear, I understand the republican process and have good respect for

it over democracy. Republicanism allows for swift action when necessary. How-
ever, the fact that senators and representatives ought to use their personal

judgement does not mean constituents values are not to be the driving factor.

Perhaps Donald Trump is testament to this, and a giant wake up call that

religious statism needs to end. Modern man has come to make “illegal” and

“immoral” the same word, just like how it made “democratic” synonymous with

“good”.

Our leaders do not sit in Washington, they reside in our churches, our

households, and most importantly, our minds. History has proven repeatedly

that strong convictions are not changed by government policy, only the convic-
tions of the complacent are. If you fear a demagogue, perhaps the problem

doesn’t lie with that possibility, but with unrooted philosophy.

Our founding fathers are rolling in their graves at our sheepishness.

Opinions Editor

Something happened. It was slow, it was quiet. It isn’t even documented. Somewhere along the line, we started looking to politicians for leadership.

Every time I hear a cantor in church say “pray for world leaders,” I get confused. We don’t have world leaders. We have some people trying to be world leaders, but luckily they haven’t fully succeeded. When many of my friends were saying Clinton would be a more effectual leader than Trump, I was disheartened; I wouldn’t want either as my boss; they wouldn’t be my leader regardless. I wouldn’t follow their directions to a restroom.

With words like “they’re a unifier” and “they can get things done,” it’s often forgotten what exactly politicians are sent to Washington to do. Senators and Representatives are sent to represent. They are not sent to tell their constituents how to conduct their lives. The constituents are the leaders and the representatives the followers. They are sent not as generals, but gladiators.

The executive branch appears to be one of leadership at first, but only when you look at their true responsibilities - commanding the army, vetoing or passing bills, appointments, etc., but this responsibility to lead does not extend to the American people. The state of the union address should be less of a motivational speech and more of a true status update; patchnotes.

To be clear, I understand the republican process and have good respect for it over democracy. Republicanism allows for swift action when necessary. However, the fact that senators and representatives ought to use their personal judgement does not mean constituents values are not to be the driving factor. Perhaps Donald Trump is testament to this, and a giant wake up call that religious statism needs to end. Modern man has come to make “illegal” and “immoral” the same word, just like how it made “democratic” synonymous with “good”.

Tension has been high in Division 1 football as every game is critical as to which teams will be granted a playoff berth. This year there have been several legitimate candidates in the chasing of the top four spots to contend for the National Championship: Alabama, Clemson, Ohio State University, and Washington. However, only four of those teams are granted a spot to contend for the National title and those four teams are Alabama, Clemson, Ohio State University and Washington.

Alabama has been a dominant force all season as they take the one seed in the playoffs and have had a few rough games as they have fallen to a 1-3-2 record but it is still very early so they still have time to bounce back.

Ohio State has only allowed an average of 12 points per game while scoring 40 points per game. They have had four out of their seven games by 14 points against their one loss coming from Penn State University by 3 points, 24-17. Penn State had the head match up against Ohio State so Penn State went on to win the Big 10 Championship game.

Ohio State finished with a 11-1 record in their first seven games is 42 Tech team 42-35. Clemson is one only point away from perfection this season as their record is 12-1 with their one loss coming from a 43-42 loss to Pittsburgh.

Washington took the fourth seed in the playoffs as they won the PAC-12 against the 11th ranked Colorado in a blow out of 41-10. Washington is known for their explosive offense as they have put up impressive numbers all year. With that being said, they are the underdog going into the playoffs.

The division 1 College Football Playoffs.

Why CFP Should Keep a Four Team Playoff
John Chilton
Sports Editor and Business Manager
Each year, something statistically incredible happens in college football. Whether Auburn snags a win over Georgia from the perfect bounce off the shoulder pads of another or Ohio State getting a questionable first down in the final seconds of the game as they were the winning playing, the only constant of Division 1 College Football is the improbable. That is what makes it so fascinating to watch.

However, if the NCAA expanded the playoffs to an eight team bracket, it would require many of the students to stay at school over New Years and Christmas to essentially repeat a pre-test exam in preparation for their championship game. They would lose time with their families and a much needed break after a long semester. In a world where college athletics are paid, this would be a different story. But it is a lot to ask of athletes to give up the year’s biggest holiday season.

Furthermore, the way football seasons in the past have tend to show a significant separation of talent between the top ranked team and an #2 ranked team. With over 100 teams in Division 1 football, it is hard to definitely rank teams against each other when there is not much out of conference play. This season, if Alabama were to play Colorado as a playoff opener, it would be a very one sided matchup. Which brings me to another important piece of information, commercial ratings.

Many viewers would rather see matchup like Ohio State vs Clemson, rather than Alabama vs Colorado or Ohio State vs Oklahoma. This significantly decreases the probability of an upset game when the advantage becomes heavily stacked towards powerhouse teams. While Penn State State deserves to feel excited this season, the past two seasons have allowed the best team in the country to bring a championship home.

Expanding to an eight team playoff may seem reasonable and thorough, but in five years the same people who were satisfied with eight teams will want 12 teams to compete, then 16, and so forth. Most schedules provide enough opportunity for a few teams to prove themselves worthy of a playoff but a conference matchups alone. If Michigan had handled Ohio State, they’d be in the top four. If Penn State had beaten Michigan or even played them close, PSU would be preparing for the playoffs as well.

Simply put, spera is a context of probabilities. The top four teams provide the best matchups for a close football game which allows low probability events to happen. While an eight team playoff could allow four more teams an unlikely chance of victory, it is a very low chance in order for the entire organization which would yield similar results nine years out of ten.

Our Men’s Basketball team is getting better game after game as we have a very young team as 12 of the 18 players on the team are only freshmen or sophomores. The team has had a few rough games as they have fallen to a 1-3-2 record but it is still very early so they still have time to bounce back.

RHT Women’s Basketball

Rose-Hulman’s Women’s basketball team is starting off the season hot as their record in their first seven games is 5-2 while winning both of their road games so far. It is early but our Women’s team is in second place for the HCAC.
