Hulman

In 1746, Italian playwright Carlo Goldoni released his play The Servant of Two Masters, a story of love, loss, and redemption. The Rose Drama Club opened their production of the play this past weekend. Instead of taking place in 18th century Venice Italy, the show was presented in the Fireside Theatre, California by the show’s director, professor of English, Dr. Terence Hartnett.

The Servant of Two Masters is in the Italian style of theater called commedia dell’arte, which uses masks and character archetypes in the storytelling. Most of the shows were improvised, so Goldoni’s script was an aggregate across multiple performances.

For this production, the masks have been integrated with, but the spirit of the archetypes lives on. Dr. Hartnett explained in an article for Rose-Hulman’s website, “In adapting the play for this production, my goal was to preserve the7

Bones. "EIT mentioned two goals in the design process: providing sufficient bandwidth for low-impact web browsing and encouraging Internet usage during ‘off-hours.’”

In building this new policy, EIT mentioned there were two goals in the design process: providing sufficient bandwidth for low-impact web browsing and encouraging Internet usage during ‘off-hours’ (designated as the hours between 2:00 and 6:00 a.m.). During these off-hours, EIT explained, “Data transfers from the Internet during these hours will only be counted as 25 percent,” so it is worth pushing downloads off to these early hours.

Disclaimer: The author of the article is involved with the production of the show. This did not influence the paper to publish this story over other stories promoting different on-campus events.

EIT Updates Bandwidth Utilization Policy

EIT recently released a new Bandwidth Utilization Policy. In this updated policy, EIT said in their statement, “Network connectivity and bandwidth are essential resources for members of the Rose-Hulman community.” While they are essential resources, the internal system generally serves the community without a hitch; they are still limited resources. To accommodate those affected by the new policy, bandwidth limits have been increased.

“Usage thresholds remain unchanged,” EIT’s statement explained. However, the statement went on to say that when the thresholds have been surpassed, “The threshold will be pushed to 1024kBps to 4Mbps and 256kBps to 2Mbps.”

In the updated bandwidth

Internet connection,” and these systems, along with the community using the Internet within reason, help maintain the resources usability and efficacy.

EIT went on to say, “The bandwidth utilization policy applies to individuals, not devices, e.g. desktop and laptop computers, smart phones, tablets, game consoles, etc.” That is to say, the monitoring occurs for the total Internet usage of a single person. Checking Facebook on a phone, downloading game console updates, and doing homework before turning your laptop goes towards a person’s Internet usage. EIT said, “Internet utilization will be monitored on a continuous basis and changes may be made to the thresholds...to maintain an effective service level.”

With the Bandwidth Utilization Policy, EIT pointed out, “Excessive utilization by a small number of individuals can significantly impact the ability of others to effectively access and use the Internet.”

There are automated systems in place to limit disproportionate use of the campus

and the Bandwidth Utilization Policy is available for students to read on My Rose-Hulman.

The Women’s March on Washington was organized to “send a bold message to our new government on their first day in office, and to the world that women’s rights are human rights.” In the name of unity and strength, the march sought equality and parity for all humans across all levels of government. Holding fast to the tenets of ending violence, fighting for reproductive rights, LGBTQ+ rights, civil, disability, immigration, and worker’s rights; and seeking environmental justice. The organization said, “We must create a society in which women — including Black women, Native women, poor immigrant women, immigrant women, disabled women, Muslim women, lesbian, gay, and transgender women — are free and able to care for and have autonomy over their families...” With their mission in their sights, the Women’s March took Washington, D.C., on January 21. However, it was not just Washington, D.C. While there were one million marching in Washington, D.C., over five million marched worldwide. Across America, marches were organized in Los Angeles, California; St. Paul, Minnesota; and New York City, among others. In London, thousands marched, and in Canada, there were hundreds of marches. The movement grew to include many artists and celebrities, who brought along influence of their own. Araceeal Johannson spoke in D.C. in support of Planned Parenthood; actor Sir Ian McKellen marched in London; holding a sign of Jean-Luc Gourdon of “Star Trek: The Next Generation” fame, and saying it was the “longest march I have been on”; and U.S. Senators Kamala Harris (D-CA) and Tanya Duckworth (D-IL) promoted the values of the marches and promised to continue the fight in the Senate. The Women’s March could be considered one of the largest demonstrations in U.S. history, led in strengthening marches by other organizations. The March for Science is in the early planning stages, fighting against funding cuts and fighting for science’s place in Washington. A march specifically advocating for climate legislation—the People’s Climate March—in Washington is also taking place on April 29, around Earth Day. The National Pride March will also take place during Pride in June, and has a growing Facebook page that can offer more information. A march for President Donald Trump’s taxes is set for April 15. Protests march the taxes the President has not yet released, as well as income equality. With the new administration, it is difficult to say what exactly will happen. Through protests like the Women’s March, though, it looks like people are coming together for causes they believe in.
The film’s primary charm, was found in its simplicity. The plot itself can be boiled down to a handful of characters, the conflict is pretty cut and dried, and the film did not set up any dramatic twists. What the film did bring, was a lot of characterization. Each of the three main characters (Léon, Mathilda, and Stansfield) is delightfully distinct, quickly establishing themselves as individuals rather than the bundle of common archetypes most movies could have settled for. From Léon’s charmingly childlike patterns of behavior (When he’s not slitting throats) to Mathilda’s unsettlingly un-childlike behavior (it starts with casually firing a revolver out a apartment window and goes downhill from there), every actor brought something special to their performances.

That is not to say the film was all bonding and conversation, it’s not even an omnibus after all. The scenes of violence are spectacularly rendered, shifting perspectives to fit the deed. Whether or not you’re a fan of the mid 90’s (When he’s not slitting throats) to Mathilda’s inevitable mood. Whether the audience experiences the utter terror of a gangster set upon by one, the casual carnage of Stansfield’s shootings, or the resolve of the climactic confrontation, The Professional ensures that every fight scene moves the narrative forward. The audience doesn’t just experience the story in a binary winner/loser fashion, but gains insight into the characters participating in the acts of violence, and get a feeling of satisfaction for having to observe these details for themselves and not just being hit over the head with exposition.

Civilization VI is a really intuitive step towards increasing the number of available to different playstyles. While Civilization VI with all of its micromanagement doesn’t always give the same feeling. Even though the end goal is the same, the path to victory takes many turns. It’s a refreshing change of pace to see what all you can do to be number one.

However, the game isn’t flawless. Civilization VI was so addicting because of the “one more turn” mentality. I set a plan in motion, and within minutes was able to reap the benefits of the long awaited Steam Summer Sale. One of the key items that I had my eye on for a while was the latest installment in the Sid Meier’s series, Civilization VI. I’ve been a longtime fan of the Civilization series, but wasn’t sure if this was going to be as addictive as other style of cinema, in which the linear events of the story were less important the accompanying emotional content and audience connection to the characters. While the occasional one or two are an exception, the movie doesn’t overly rely on them to maintain audience connection. A movie will worth experiencing.

Now remember, elbows off the table and always keep the safety on.
When I signed up for the RHA Assassins, it seemed simple enough. Get a target, tap them on the back, and enter a pin number on a website, all in good fun. Although I would soon find out that I was so very wrong. The clock struck 12 midnight on campus as I was in the maker lab working on a project. I must have been up for about 45 minutes and I had not even realized the game had started. One of my friends on my floor had walked into the room and asked me a question about the location of something he had lost and I told him it was probably in the trash. I was confused on why he did not just text me about the object but I had work to do so it just slipped my mind. As he was leaving the room, he tapped me on the shoulder and whispered RHA Assassins into my ear. I was devastated. It was my first time playing the game and I was dead in less than an hour. My group members laughed at me and reviled in my anguish as I went to the page to look for some loophole to keep me alive. Through all my efforts rooting through the rules...I found that you cannot be killed in a meeting. With this in hand I told him my kill was not valid and he left. I also left with something even more important...The knowledge that no one can be trusted.

As Monday came along, I had very important information, I knew my supposed killer. I would look out every hour of every day. I was as paranoid as ever. Walking to class alone, showing up a few minutes late as the congested hallways did not allow me to see everyone that walked the halls. This continued all day until I found out that another person on my floor was my killer. This was my out my key to beating the game. I would help him kill my killer and then I would still know who was supposed to kill me. Although before I could complete my plan I checked the kill list and... They had both been killed. There was only one possibility to this occurrence, they both had been assassinated by the same person.

At the time, this person had topped the leaderboards so I knew exactly who it was and I confirmed it with the two guys on my floor. This person was supposedly looking up the schedules of both of their targets and following them to their classes lying in wait and striking while they had a chance. I knew I was next so I kept an eye out while walking around. I knew there was only one way to beat this person and stay alive. Be better at the game than they were. I found out what she looked like and found her schedule so I could know at which hours of the day I was supposed to stay safe. That being said I secured the internet for a recent picture and used our resources on outlook and Bannerweb to find their schedule. At this point in time, I had completely forgotten about my target and I did not care at all. Although I did know, I was ready.

As Tuesday rolled around I was securing the halls for different signs of my purposeful assailant. I walked to class alone looking behind me every few seconds heart beating out of my chest as I securried from my residence hall to class. On the way I did not seem to see her, that may seem relieving but that made the entire situation even more stressful. When class was over I walked to my next class. I chose to walk outside despite the cold as there was a significant less amount of people than in the halls. I went to class and the bell rung to mark the beginning of my class and an hour of safety.

As the 30 minutes wound down, I began to get anxious. Before the class was over I packed up my stuff and got ready to get back to my hall. The bell rung and I bolted up and out the door, the halls were full of people and I started to feel vulnerable. I found a friend to talk to although I was still looking around. Then I saw it... a girl in gray sweatpants running my way, face blocked by another person walking in the hall. I saw her run down the long Olive Holloway and I stood frozen at the end. Then as soon as I saw her run at me she ran away. That was my first sighting. From then on I knew it was worse than I could have imagined. Not only was she out for me she was out for blood. She ran down a crowded hallway just for a chance to kill me. I had escaped but just barely.

Fast forward to the end of the week. This event had happened at least two more times, making a total of three times that I could have been killed by my target. At this point in time I am still alive although I am not sure how much longer I have left. If I am alive next week I will continue the story and if you are the person who is trying to kill me, good luck.
“Black history is about remembering the achievements of the past as well as lives of those that were segregated, enslaved, and murdered.”

Our Men’s basketball team took a step forward this weekend as they beat a top-8 Bluffton team to set the Engineers at 7-7 in HCAC play. Sophomore starter, Charlie Ainlee, lead the team in points with 21 points but he also was tied for the most turnovers with Luke Callahan at two. Congrats to the team on their win and come watch these men beat Franklin on Wednesday.

The Women’s team keeps rolling teams over as they take a bigger lead for first place with their win over Bluffton. This game was huge considering Bluffton was chasing us for first all season but our Women played well enough to beat Bluff- ton twice this year. Our women look forward to finishing the season off with a Conference championship but there is still a lot of season left to play before they can make claims to that. Come out and support our women as they take on Franklin at home on Wednesday.

Our track teams competed at our own Engineer Invitational as our Men’s team took first place and our Women’s team took third place. Our team’s combined for seven event wins and many more runner-up performances.

Notable performers from the Men’s team includes winners Josh Hennig, Brandon Szym, Isaiah Smith, David Ber- don, Josh Sims, Nick Palmer and Ken- neth Fabian. Our Women’s team winners and runners-up includ- ed Andrea Orausk, Matt Milt, Eric, and Adam Wilson.

Notable Women performers include winners Janylin Setina and Emilia Hobbs who were among the team’s many victories.

Rose-Hulman will be heading to Kerk Division 3 Meet Most at Illinois Wesleyan on Saturday for their first road meet of the season.

**RHT Swimming**

Blake Powell  
Sports Editor

Our Men’s and Women’s teams went head to head with Franklin Friday night at Franklin. Our Men’s team was able to take home wins in 6 events. Pierce Bartine led the team with wins in two events, the 50- freestyle and 100-fly. Other winners included Ellie Hong in the 100-backstroke, Michaela Kivett with in 11-1000 yards medley, and Cam Gill who all had great facial hair, and they all led Chicago teams to championships. Buddy Ryan intro- duced an all new definition of defense into the NFL by the name of the 43 defense. This defensive look dominated the league as no offense had an answer to it. Therefore, the 85 Bears and the 43 defense arguably ranks as the best defense of all time.

This powerhouse team also dominated the game from an offensive perspective. Jim McMahon introduced some much-needed versatility into the offense because the whole offense previously worked around only Walter Payton. McMahon was a master of the audible, which led his team to many victories. It was the 85 Bears to win the Miami Dolphins, which fueled the Bears with the fire they needed to go on and dominate New England at 49 to 1 in the Super Bowl. The 85 Bears are arguably the greatest NFL team to set foot on the gridiron.

The Patriots of Super Bowl XX were an embarrassment to the Super Bowl but maybe the Patriots of Super Bowl LI can continue their dynasty of the 21st century, led by the Patriots of Super Bowl LI can continue their dynasty of the 21st century, led by the

- Dr. Laxer

“Come next fall, you’ll be on your retirement cruise. I don’t think it will be an issue.

“I graded this assignment in invisible ink, if you can’t see anything, hold it close to a fire. If you still can’t see anything, move it a little closer…”
- Dr. Stamm

“All I see are black smudges…”

“Cocaine is one hell of a drug.”
- Dr. Kawano

“No comment”

“If you bomb, you’ll get some… blood there.”
- Dr. Song

“Wow, I really shouldn’t fail this test then.”

Did your prof say something hilarious or just great out of context? We want to here about it! Send your quotes with who said it to thorn-flipside@rose-hulman.edu.

Hi everyone! Welcome back to the Flipside! Lauren Santichen here with an update on the elections. There are a couple nominations for Flipside, so next week should be my last time as editor. I’ll be teaching the new editor the ropes and all that jazz before they take over. Anyway, if you have any comments or questions, feel free to send an email To: Thorn Flipside. I’m always looking for some new material, especially comic ideas and wacky prof quotes. See you right here next week! Bye-Bye!”

Puzzling Terms

1. Golf course Manager at Trump’s golf course
2. GPS voice-over actor
3. Stand up comedian

9. Birth Certificate Counterfeiter
10. Commander-in-Cheese of Velveeta
11. Drone Pilot
12. YouTube Streamer

Fact of the Week

In the 1980s, a one letter typo cost the Yellow Pages US$10 million when they misprinted a travel agency’s advertisement for “erotic vacations” instead of “exotic vacations.”

WACKY PROF QUOTES

“If I can distract you from joining a cult for 45 minutes, it’s time for Quantum Mechanics.”
- Dr. Syed

“I thought you said you were distracting us…”

“I mean no disrespect to anyone in this class, but… come next fall, I will say to you: I know I had you in class, but I have no idea who you are.”
- Dr. Laxer

“Come next fall, you’ll be on your retirement cruise. I don’t think it will be an issue.
