The Rose Thorn

CHEATER FLAG

Hulman Grand Prix Engineering (RoseGPE) has earned a team total of 25 percent at Formula SAE. The team's driver for these tests were relatively new to Formula SAE, but put down times around the track.

The autocourse was a large track with many slaloms, turns, and tight corners, meant to test the all-arenal ability of the car. GPE placed 25th in the event, placing them later in the day for their endurance run the next day. Although the team enjoyed a first for the week: going home early.

Competition started out very stressful; we weren't ready and were one of the last teams to pass technical inspection. Given that, we had a smooth day of tests and did very close to the limit of what we were allowed to do. Some failures were catastrophic, with fire or loss of wheels, while some uneventful such as throwing a chain or electronics dying. Rose, however, pushed through and put up a time of its fastest in its last lap. The team recorded for the day was 32 minutes by the University of Stuttgart in Germany.

RoseGPE has helped me grow into a well rounded engineer in ways the classroom can't. While the academics at Rose are important, the B.S. and M.S. in general are more important to me than to others, since they reside in. Dr. Broughton has pictures prepared for the talk, and others who will answer questions from student or faculty have in terms of the technical testing to the course material.

Tuesday and Wednesday are devoted to music, with the orchestra playing the music of Stuttgart in Germany. The team was sent off by the seniors for the next chapter of their lives.

As the lingo goes. The team has been like having an internship during school year. Some may enter the world of international schools, enjoy music, and put up a time of 61 seconds in their fastest lap. The team will also come at Formula SAE Endurance. The team took 23 out of 80 teams at this event last year.

THE ROSE THORN
ROSE-HULMAN INSTITUTE OF TECHNOLOGY, 5500 Wabash Ave, CM 5037, Terre Haute, IN 47803 • Thorn@Rose-Hulman.edu

Issues of The Rose Thorn are published on the second through ninth Mondays of each academic quarter.
Weekly meetings occur at 5:15 p.m. on the first through ninth Tuesdays of each academic quarter. All members of the Rose-Hulman community are welcome to attend.
Submission of articles, photographs, art, and letters to the editor is encouraged. Submission may be made by email to thorn@rose-hulman.edu or in person to Percopo room 031. The submission deadline is 5:00 p.m. Friday. The rights to accept submissions or changes made after the deadline, to edit submissions in so far as the original intent of the submission remains unaltered, and to reject submissions deemed inappropriate for print are reserved by the editors.
Letters to the editor should be no longer than 600 words in length and must contain the writer’s (electronic) signature. The views expressed herein are those of their respective authors and with the exception of the Staff View do not necessarily represent the views of the staff or the Rose-Hulman community.
Very few frasiches are as beloved as the Star Wars franchise. As a result, many con- nothe merly have probably tossed around the idea of naming a future child af- f ae Star Wars actors. Like Luke, Leia. Some may even dare to name their child Chewbacca, Chewie for short. This is despite the fact that the franchise with "The Force Awakens,” more than 9,000,000 movie tickets were sold in the first weekend. Rey, then, however, the name has climbed to the quint spot. "I didn’t even know the name Rey! Since the release of the movie, the name Rey has climbed up more than 1,000,000 names. Naming children after fictional characters is nothing new, and with a franchise like Star Wars, it is no surprise there are a number of children running around with those names. The true question is unknown for the time being, many parents begin naming their children Jarl..."

Ehola Outbreak in Democratic Republic of the Congo

The Ehola outbreak from a few years back hardly sits on the Internet, perhaps because it is back on the news.

In August 2012, a study declared in the Democratic Republic of the Congo. Cases of undiagnosed illness and deaths involving hemorrhagic fever occurred. Researchers from the study discovered that the disease is spreading at an alarming rate. So far, there have been three deaths and five others are suspected of being infected due to the hemorrhagic fever. Heart Health Organization’s executive director for Democratic Republic of Congo says an investigation team has been deployed. They are scheduled to arrive at the site in a few days. The virus is called Ebola, which is named from a Zaire strain, which was the most common one found in the previous outbreak. What makes this a fortunate fact comes as a result of a new intervention. As a result of the intervention, the researchers have placed a large number of people in quarantine and have administered patients with the Ebola drug, TPO-212. This drug has proven to be effective in reducing the mortality rate of patients. However, the health workers who treated the patients with the virus had been wearing proper protective equipment are now at risk of contracting the disease.

Study Suggests Exercise May Slow Down Aging Process

As if people needed another reason to exercise... a new study suggests regular exercise may slow down the aging process.

Researchers from Brigham Young University in Utah found that people who regularly exercise and have sedentary levels tend to have significantly long-er telomeres than individuals with more sedentary lifestyles. Telomeres, or the "ends" of chromosomes, are responsible for aging. As we age, the telomeres get shorter. So, when you find a way to slow down this process, it is great news.

In this study, the researchers evaluated 2,277 participants, and the results were published in the journal *Aging Cell*. The study found that individuals who exercised regularly (at least 150 minutes per week) had longer telomeres than those who did not exercise. The researchers also found that telomere length was positively correlated with overall health and longevity.

The researchers concluded that regular exercise, such as walking, jogging, or cycling, can help slow down the aging process by keeping telomeres longer. This is important because telomeres play a crucial role in maintaining cell function and healthy aging. Longer telomeres may help reduce the risk of developing age-related diseases such as cancer, cardiovascular disease, and diabetes.

Aspirin May Be Bad for the Heart Longterm

An aspirin a day will not keep the doctor away. The idea that aspirin and anti-inflammatory drugs are a panacea has been around for decades. However, recent research has shown that the idea that aspirin could be beneficial for heart health is not as straightforward as once thought.

The American Heart Association (AHA) recommends that healthy adults take an aspirin a day to prevent heart attacks and strokes. However, recent research has shown that this recommendation may not be as effective as once thought. A study published in the journal *Circulation* found that taking aspirin daily did not reduce the risk of heart attack or stroke in people who do not have a history of heart disease.

The researchers concluded that the regular use of aspirin is not advised unless otherwise stated by an individual’s own physician. And, as with any medication, there can be risks and potential side effects. People should talk to their doctor before starting or stopping any medication.
Liar Liar,

the routines he had down pat. And it was deserved. He became Andy Kaufman, and it is to be believed, Kaufman didn’t see himself as a comedian. He was merely an entertainer…"

Lauren Wiseman
Newswriter

"Kaufman didn’t see himself as a comedian. He was merely an entertainer…"

Disappointment, because it didn’t do well at the box office. That being said, any accolades he got for that movie were well deserved. He became Andy Kaufman, and it was kind of eerie, to be honest. It was still a very much an Andy Carrey performance, but the routines he had down pat. It was engaging, if only because you had no idea what was happening. It solidified my belief that while Carrey is known for his comedic roles, it is a shame he did not go on to do more dramatic roles in cinema, because they are riddled with humanity.

That is not to say they saddled the whole film on Carrey. Far from it, the supporting cast is just as good. Danny DeVito as Kaufman’s agent, George Shapiro, is a voice of reason trying to make sense of the shenanigans. Paul Giamatti can do no wrong, and his performance as Kaufman’s partner in crime Bob Zmud is no exception. So there is something imperceptibly magnetic about it. Zmud helped create the jokes, he was a part of the performance just as much as Kaufman was. Believe it or not, Courtney Love’s performance is enjoyable. Although Margulies, she was supposedly the only one who “got” Andy for who he was.

The story was relatively straightforward, which it needed to be, given the subject matter. It probably goes without saying, but this really is a very strong cast here.

Margulies, she was supposedly the only one who “got” Andy for who he was.

The film was very memorable, the cast likable, and the soundtrack very well curated. In the same way, it has its flaws and its flaws, which I’m here to discuss. Oh and I believe I got a bit off topic, but pointing out the obvious view could potentially spoil parts of the movie. You have been warned.

Disappointment, because it didn’t do well at the box office. That being said, any accolades he got for that movie were well deserved. He became Andy Kaufman, and it is to be believed, Kaufman didn’t see himself as a comedian. He was merely an entertainer…"

In the ever-evolving realm of fashion and design we are constantly undergoing changes and shifts in different ways evolving the methods in which we draw ourselves. This in combination with the internet has allowed people to glimpse into cultures around the world helping evolve the ways they dress and inspire others alike. This cycle of inspiration produced by technology and the urge to design has created a veldt of the fashion industry of people making their own clothes.

Factors such as, the exclusivity of high fashion outlets, the expense in keeping up with new trends, and even the sheer volume of clothes one may accumulate if they purchase different pieces as fast as they are produced, have all contributed to this renascence of creativity in the fashion industry.

As someone who has taken part in this movement I find much more gratification in buying a very cheap pair of jeans and tailoring them to fit me perfectly rather than searching for a size that fits. Not only do they fit me better than any store bought pair of pants but I saved money in the process. If I truly want to I can even take this level of customization further by dyeing, bleaching, distressing, cutting, or creating whatever I want and how much I want. From this two results can occur. I could not like the result and try again or feel accomplished and have a one of a kind piece of clothing.

This beauty of this customization is that it cannot only be done with one type of clothing but literally, whatever you please to create or customize. In our era of accessibility the means to do anything can be found on the internet through YouTube tutorials, fashion forums, and even (for the very brave) through trial and error.

For those interested, getting into this hobby the tools can be as cheap as a needle and some thread and as complex as a full sewing machine (some are as cheap as $75). There are other tools for those that are even more serious such as a screen printer although, no tools are needed and this hobby is only as serious as you make it.

There are even some companies that have emerged from the rooms of college roommates or parents basements. Clothing companies such as Hypland have very humble beginnings as its founder Jordan Bentley started selling his merchandise out of boxes in his mother’s house. This corporation grew to be one of the largest underground streetwear companies, having sold over a hundred different unique pieces to date in their online store. A Rose Hillman student by the name of Alec Thompson has had the ambition to delve into this same high-endness model with his brand Walk the Walk. This to me is a true representation of the ease of access to the world through technology, but the initiative and ambition be an entrepreneur.

In conclusion, I feel that this taking of the hobby of altering or even creating one’s own clothes can be a tedious process and is not for everyone although it can be a very rewarding. Whether it is the only option you have as you can’t find a pair of pants to fix you or you are just looking for a little something extra to add to the arsenal of dope fits in your wardrobe, this route can be a solution to many of the problems faced by people looking for clothes in our era and many to come.

What to do if you forgot Mothers Day

You are the worst

Sean Ladipo
Lifestyle Editor

1. Bring a card home after finals and tell her it was too expensive to mail.
2. Tell her the card was supposed to be a surprise and it got sent back because you used the wrong address.
3. Mail her flowers at work.
4. Fake a life threatening illness (DO NOT RECOMMEND)
5. If you truly are the worst ... nothing.
6. Drive/Fly/Swim home and surprise her (Could make things worse or better depending on how far you are from home).
7. Apologize (cop out).
8. Turn back time.
9. Buy her some dope wine (Get her drunk).
10. Not forget next year.

You didn't get the card I sent you that’s weird” - the worst

The housing market is an important part of the U.S. economy, one that should not be ignored when evaluating where to work.

index the comparable prices of housing in different regions; you will find Seattle has an index of 211.49 this month. This is higher than the average index for national home prices, which is 185.56 and far higher than the 136.60 index level for Chicago a popular location to work.

The rate of price increase is also important. This is measured in the Case-Shiller home price index by the monthly change in index. Chicago has a small steady change, while some cities they have pretty small growth in housing costs, yet Seattle has a monthly change of 1.3% (the highest monthly change Case-Shiller had), far higher than the average monthly change of 0.2% nationwide. This means that if you are trying to rent in Seattle you will see your monthly rent prices increase far more often than you will in most areas of the nation. A high monthly change is not always a bad thing. If you plan to buy a house, high monthly change displays that returns on your investment, should you sell, will be, higher. One should keep in mind the home cost and growth in housing cost for where you will move in, but Case-Shiller's index only has data on 20 American cities. Still, other housing price systems can be utilized when making decisions on job offers.

Another important aspect of housing outside of the actual housing cost is public policy on housing. Before choosing a region to work in, one should look into what public policy is at all levels of government. One important policy is how strong tenant protection laws are the tenants who will be renting, which helps protect tenants.

Many cities across the country have growth boundaries, although they are especially common among states on the west coast. Urban growth boundaries are at times controversial, as many believe they increase housing cost by decreasing the total possible housing supply and constraining growth housing.

However, research on the boundaries effect on housing prices aren’t unanimous. Some studies stating the UGB has little effect on housing prices and others find that UGB supply restrictions cause large price increases. Many of the cities that have some of the largest housing cost in the country have UGB: Seattle, Washington, Portland, Oregon and Miami, Florida, making it seem likely UGB has a negative effect on housing prices. This doesn’t mean that UGB is a net negative, as the boundary can help utility services decrease cost by better long term planning while also protecting the region surrounding the boundary. At times, this preserves very beautiful land in their state (Seattle, Portland, and Miami are also well known for how beautiful the city and surrounding region is). Public policy can be difficult to keep track of, and at times, its true effects are clouded so it is up to your own sensibilities to decide what effect policy will have on you.

Ultimately, the decision about where to work in the future is one that you must base on what you find most important in where you live. Whether you care about how much of your monthly check you get to keep, the surrounding community, safety, or the surrounding environment the most, you must make the decision on your job offer yourself. Outside of housing, a smart Rose graduate will research where their possible job offers exist as much as possible. There are many ways to get more information about regions, so take the time to look through as much as you can.

Even after choosing a region to live in, keep in mind how you are going to get around the area and how you will get to work each day. The distance from your place of work can be the most important part of choosing you housing. Most important of all is, for the how you love the most in live, as wage is not what decides everything in life. What does a large wage mean if you are not as happy in the environment you chose?

3) Transylvania-58.5

Rose-Hulman captured its fourth straight HCAC Commissioner’s Cup for its all-around athletic performance along with the league’s Men’s All-Sport Trophy for the ninth time in ten years due to consistent performances in nine men’s sports sponsored by the college.

The Commissioner’s Cup is awarded to the institution accumulating the most standing points in the HCAC’s league championship events and is widely regarded as the most prestigious honor among the ten conference institutions.

The Fightin Engineers have won the Commissioner’s Cup six of the last eleven years as a conference member.

The Men’s All-Sport Trophy went to Rose-Hulman again this year because of its outstanding year of Men’s sports. Every men’s athletic team at Rose-Hulman finished in the top five in the conference this year; the football, soccer, tennis, track and field teams all won conference championships this year.

The women’s squads set a school record by finishing second in the Women’s All-Sport Trophy standings. The women’s basketball team won the conference championship this season.

Congrats on a great year of sports this year for Rose-Hulman.

RHT Tennis

Blake Powell
Sports Editor

The most historic season in Rose-Hulman’s tennis history came to an end with a 5-1 loss to Wabash at Earlham College on Friday in St. Louis.
The Fightin Engineers finished 9-0 overall (tied for the most wins in a single season in Rose-Hulman history) and won their third consecutive HCAC Tournament championship this season. The team advanced to the NCAA DIll tournament for the third consecutive year and also won its first ever NCAA tournament match in a 5-1 rout over Wheaton on Thursday.

Georges Adam and Brandon Benedict won 8-6 at No. 1 doubles. Adam and Benedict finished 2-0 in the NCAA tournament while beating the No. 1 ranked team, Wheaton, and the No. 4 ranked team in Rose-Hulman history for career doubles.

Congratulations to the team and all of their accomplishments this season.

RHT Track

Blake Powell
Sports Editor

Rose-Hulman had their top fifteen performances and set one new school record at the Balkbin Wallace Harrison Dillard Twilight Meet on Friday.

The 4 x 100 meter relay team led the top five finishes with a school record performance. The team of Adam Wilson, Trey Niles, Isaiah Smith and Josh Hennig finished the race with a record time of 42.05 seconds.

The Fightin’ Engineers swept the triple jump championships to lead the individual performances. Palmia and Clare Smith also won events for a total of three event wins at the meet.

Rose-Hulman is waiting to find out if they qualified for nationals; they will find out from the NCAA on May 20th. The championships are scheduled for May 25-27 at Geneva, Ohio.

RHT SPORTS BOX SCORES

Blake Powell
Sports Editor

Another great Rose-Hulman baseball season came to an end in a 3-2 loss to Mount St. Joseph in the HCAC Tournament on Friday afternoon at Earlham College. Rose-Hulman finished 18-24 overall but qualified for the HCAC championship by going into conference play. The team finished fourth in the HCAC. The Fightin’ Engineers sent its graduating class of seven with its fourth postseason appearance.

BASEBALL
1 2 3 4 5 6 7 8 9 Final
ROSE-HULMAN 0 0 0 1 0 0 0 0 1 3
MUS 1 2 0 0 0 0 0 0 0

Standout Performers

Ian Grant allowed six hits, five strikeouts in 7 innings of work as the game one loser.
Davis Robinson—one scored run
Drew Schultz—one lone RBI

RHT Softball

Blake Powell
Sports Editor

Rose-Hulman softball had two players on the honorable mention list; Morgan Dreyer and Jessica Will. Senior, Morgan Dreyer, batted .342 with 38 hits on the season. She had four doubles, three home runs and was the starting catcher for the team. Morgan has been on the softball team for three years. In these three years she had a .274 batting average, nine doubles, and six home runs.

Junior, Jessica Will started at short stop with a batting average of .342 on the season, nine doubles and one triple. For her Rose-Hulman career she has 111 hits, 17 home runs and 39 RBIs with a .420 batting average in her 102 contests. Jessica is tied for fourth in Rose-Hulman history for career doubles at 29.

The team finished the season 11-25 overall and highlighted the end of the season with a 5-5 finish on the team’s annual Florida trip.

Congratulations to the team for their accomplishments and an extra congratulations to Jessica and Morgan on their honorable mentions in the Heartland Collegiate Athletic Conference.

The Graduation Issue

Top 10 Things to Wear under Graduation Robes

1. Navy
2. Boyfriend Jeans, “Borrowed” from Your “Boyfriend”
3. A Bikini, The Gender Neutral Apparel of the Future
4. Crocs, to Show the Type of Person You’ve Grown Up To Be
5. Swag, From All of the Events You Attended Over the Years
6. Elephant Costume, You Will Always Be a Part of Rose
7. Purdue Apparel, Because You Always Regretted Choosing Rose
8. A Birthday Suit, Hopefully the Stage Isn’t Too High
9. A (Clean) Shirt, the Only One that Passed the Sniff Test
10. A Camelback, Filled with Boxed Wine

WACKY PROF QUOTES

“I love the op-amp lab…nothing like the smell of frying electronics.”
- Dr. Berry

“Maybe the smell… impacts brain cells.
That behavior of children – I’m going to use that word, you are just big children…”
- Dr. Laxer

“As you graduate and move into the future, remember these words as they are still applicable.
I’ve forgot, does the country [Romania] still exist?”
- Dr. Wollowski

An example of the knowledge gained during your time at Rose.

Wickedly Awesome Cafeteria Edition

To Those Who Never Showered
Thank you so much for giving my professors an excuse to hold outdoor classes. You reminded everyone that they took fresh air for granted, and for that we will always applaud you.
- A Student Who Loves to Listen

To Those Who Always Had Advice to Give
Thank you for giving me a way to pass Rose. If I hadn’t learned how to fold socks in exactly that way, I’d have probably dropped out by now from the stress.
- A Student with Many New Life Hacks

To Those Who Had All the Stories
Thank you for telling me the same stories about your Undergrad capers. If I hadn’t heard them so many times, I don’t think I’d be able to repeat them verbatim. When somebody comes around to write your biography, I’ll have all the best anecdotes.
- A Student Who Loves to Listen

To Those Who Loved Loud Music
Thank you for sharing your music taste through the walls. I’ve learned about a lot of great new tunes that I can dream to. I hope I get another floor mate like you next year too.
- A Student Who has Learned that Sleep is Overrated

Fact of the Week

Rose-Hulman's latest acquisition in downtown Indy will eventually be turned into an elite nightclub. Invitations will be extended based on GPA, so start studying.
