Effects of Low Admissions

Lakeside 1 to Have No Residents in 2020

Colin Beach

Staff Writer

As spring quarter comes to an end, housing plans for next year are underway. But a big change is coming to the residence halls: no students will be living on Lakeside 1 next year. Second year students generally have two main options when it comes to on-campus housing (Percopo or Lakeside), but that has since been reduced to one. Unless sophomores on campus have upperclassmen in apartments to live with, Percopo is the only choice.

The change comes from size and numbers. The class of 2022 is much smaller than all other classes enrolled this year, only 261 freshmen accepted admission to Rose-Hulman, compared to the at least 530 of the class of 2021. The change only really affects the freshmen class to adequately fill both Lakeside 1 and Percopo, students would be spread too thin. Therefore, there will be no residents in Lakeside 1 next year.

Not even upperclassmen will move in, as Residence Life has not released an RA for the floor. It seems that the floor will be left empty.

Students are unsure of the good and bad to come from this decision, and it will remain that way until the next school year arrives. The environment of campus is sure to change, with our very own town green in Lakeside. Hopefully, the floor can be put to some use. And maybe in the future, admissions will increase and Lakeside 1 can reopen. But for now, Rose sophomores will plan to live in Percopo. As a reminder, housing preference forms are released on May 8, and deposits are due May 24.

Shedding Light on Electives and the New System

Elective Lightning Talk

William Kemp

Rose News Editor

This past Thursday, April 25, a group of students gathered together to talk with current sophomores about what steps to take as a prospective Junior. The Sophomore Resident Tutors (SRTs) when into great detail on what electives to take based on specific majors, and just for fun. Although attendance was limited, the SRTs did have a lot of useful information for underclassmen students, here are the details.

One major question sophomore’s in mechanical engineering face is weather to take Vibes or Controls their full quarter of Junior year. Like many two sided topics, there are people who rally behind both choices. Thomas Roberts, one of the SRTs, just happened to talk to both Vibes and Controls and broke the choice down to the very core of each class. The main difference between the two courses is that Vibes focuses more on the physical world, whereas controls focus on the internal components to counteract the physical world. An example to demonstrate the difference is how airplanes fly. Today’s airplanes more really, really fast and the wings have a lot of resistance because of this. Vibes was actually hired to do flight test during flight and explains why an airplane can fly with the controls. Whereas controls deals with the electrical/“imaginary” components to make the plane consistent with the apartment building with wings.

Although many underclassmen may not know what concentration of engineering to go into yet, or are just looking for another class that might boost their GPA, it seems the popular opinion is the Controls is easier than Vibes. However, this isn’t true for every one, it does depend on how your body works and what you are interested in. To elaborate, if you seem to learn more with equations, Controls may be more your style, but if you learn more with labs or hands on experience, Vibes is an excellent choice. According to Thomas, Vibes has experimental labs and the last quarter of the class you learn all project based.

As for math majors, Kevin Ferguson and Connor Boyle were kind enough to create a tier list (like Smash Ultimate but with math classes) for math electives. The Results are as follows:

- S - MA275, MA336
- A - MA381, MA382
- B - MA330, MA332
- C - MA371
- D - MA336

From S to D, MA336 (Boundary Value Problems) is essentially an extension of DE1 introducing partial DEs. MA381 and MA382 have a primary focus on statistics. MA330 (Vector Calculus) is useful for EE’s with electromagnetics, and MA332 uses lots of Mathlab and can count as analytical methods. MA331 (Linear Algebra 1) is like the first part of DE2 and is useful for Vibes and Controls. Finally, MA371 (Boundary Value Problems) essentially uses 10 weeks to prove the fundamental theorem of calculus.

In terms of the non major specific electives, the HSSA department will be implementing a new system starting fall quarter next year. To my understanding, however, students do have a choice of whether or not they want to adapt to the new system HI/IL/IV system or stay on the GS/IA/SV system. It has been recommended that students who are almost done with their humanities credits to stay on the current system, while students who have completed less than half switch to HI/IL. The new system will allow students more flexibility on what non major specific classes they want to take.

The H stands for Humanities and Arts such as: Arts, English, History, Music, Philosophy, Religion, and Humanities. The S category is Social Sciences such as Anthropology, Economics, Geography, Political Science, Psychology, and Social Science. And L is Modern Languages which offer German, Japanese and Spanish. Depending on which class you are signing up for and under which category, the class code will now start with that corresponding letter, see below.

Before deciding which system to follow talk with your academic adviser. Dr. Richard House and Dr. Jessica Livingston are also available for questions regarding the new HSSA policies.

Overall, the Percopo Perspective: Elective Lightning Talk provided an abundance of good advice moving forward as a prospective Junior. I would like to thank each and every one of the SRTs for donating their time towards the academic success of myself and other at-tendees. For anyone who is interested in talking with an SRT, they can be found in the Percopo Classroom on Percopo o.

THE ROSE THORN

Our Mission Statement:  
We are Rose-Hulman’s independent student newspaper. We keep the Rose-Hulman community informed by providing an accurate and dependable source for news and information.

The Rose Thorn is published on the second through ninth Mondays of each academic quarter.  
WEYLKY MEETINGS occur at 5:00 p.m. on the first through ninth Tuesdays of each academic quarter. All members of the Rose-Hulman community are welcome to attend.

SUBMISSION: of articles, photographs, art, and letters to the editor is encouraged. Submission may be made by email to thorn@rose-hulman.edu or in person to Percopo room 031. The submission deadline is 5:00 p.m. Friday.

THE RIGHTS to accept submissions or changes made after the deadline, to edit submissions in so far as the original intent of the submission remains unaltered, and to reject submissions deemed inappropri-ate for print are reserved by the editors.

THE VIEWS EXPRESSED herein are those of their respective authors and with the exception of the Staff View do not necessarily represent the views of the staff or the Rose-Hulman community.

There has always been tension between the Trump administration and its political opponents, but a little over a week ago, a redacted version of the report summarizing the findings of Robert Mueller’s investigation into Russian interference in the 2016 presidential campaign was released to the public. The investigation had been going on for over 2 years, and its conclusion has been the cause for additional tension in Washington in the past weeks. Controversy over Trump’s financial records, too (another source of tension since 2016), has recently resurfaced.

The reactions to the Mueller report have been somewhat contradictory. The Trump administration has insisted that Mueller’s report exonerates Trump from any conspiracy with the Russians and charges of obstruction of justice. Meanwhile, while some Democrats are applauding the findings already revealed in the redacted version and are calling for further actions. Even the Russian President reacted to the report, claiming that there was no Russian interference in the first place.

“The Russians, according to Mueller, did interfere with the 2016 election.”

The Mueller report is divided into two volumes. The first covers Trump’s campaign and its ties with Russia while the second covers the 2016 election interference in the way it charged the Trump campaign. In total, Mueller has brought criminal charges against 20 Russians and 6 Trump associates.

Perhaps the clearest takeaway from the Mueller report is that the Russians, according to Mueller, did interfere in the 2016 election. The Internet Research Agency (IRA), a Russian agency, sent employees to the U.S. in mid-2014 on an “intelligence-gathering mission.” What exactly their instructions were are blacked out in the redacted form of the Mueller report. This agency is fiscally supported by a “Russian oligarch” with ties to Vladimir Putin, the Russian President.

It soon became clear by 2015, and certainly by 2016, these employees, disguised as U.S. persons and entities,” were attempting to create chaos in the U.S. electoral system. They used social media accounts and staged political rallies, occasionally coordinating with Trump campaign officials. However, when contact was made the intelligence officers introduced themselves as National Intelligence Officers or people, and there is no evidence that any campaign officials knowingly conspired with Russia in these attempts.

The Russian government was also responsible for several cyber attacks, succeeding in stealing “hundreds of thousands of documents” from the email accounts of the Clinton campaign, the Democratic Congressional Campaign Committee (DCCC), and the Democratic National Committee (DNC). Some of these documents were then distributed through the social media accounts of “persons 2Claude” and “Gyuf haircut.”

The Russian organization responsible for the cyber attacks is the GRU (Main Intelligence Directorate of the General Staff of the Russian Army). Again, although Trump’s campaign was eager to benefit from whatever “dirt” the Russians claimed they had on Hillary, Mueller has found no case of conspiracy between Trump associates and Russia. The six associates were arrested because they “caused of lying to the FBI or the Department of Justice.”

In his report, Mueller never accused Trump of obstruction of justice. However, he explicit-ly did not exonerate him of it. He noted that Trump’s “efforts to influence the investigation were mostly unsuccessful, but that is largely because the persons who surrounded the Presi-dent declined to carry out orders or access to his requests.” It seems that by neither indicting nor exonerating the President of obstruction of justice, Mueller has left it up to Congress to decide the best way to use his findings. Some demonstra-tives are calling for Mueller to testify in person or the unre-dacted version to be released to Congress, while others have concluded that it is best to let him finish his first term as President and beat him in the 2020 Presidential election. Regardless, the publication of this report is far from a conclusion on the issue of Russian interference in the 2016 election and how it relates to the Trump campaign.

Special Counsel Robert Mueller released his report last month. A redacted version has been released to the public a little over a week ago.

Avengers: Endgame

A Spoiler-Free Review

Dana Nafius
News Editor

It takes a lot to make me clay in movie theaters. It’s a corny and tired gesture that often detracts from an authentic movie-going experience (especially since the previews are interspersed with creative (from a pre-movie), I broke this rule sever-

Alas, Avengers: Endgame deftly rides the emotional tsunami created by the cliffhanger end-

ing to Infinity War. There are one-liners that will make you shiver. Carefully-choreographed battle sequences that will fill you with childhood excitement. A masterful score that whisks you up and casts you down just as quickly. Songs. The ending simultaneously blows you away and makes you feel like this was what always needed to happen.

The reason I got emotional was simple: the last 22 movies. The characters I've grown to love are finally getting their moment to shine. It’s a fitting end to the saga. I'm now ready to watch them all again.

Man, I’m so glad to see these characters get their due. I've been anticipating this moment for so long. It's bittersweet, but I'm excited to see how they evolve.

The特效, the music, the storytelling... it's all top-notch. This movie has set the bar so high for future installments. I can't wait to see what they do next.

The answer to Avengers: Infinity War came out last Friday, an answer that superhero fans worldwide have been waiting nearly a year for. The answer to Everything especially since the previews movies corny and tired gesture that of—clap in movie theaters. It

Dara Nafiu is just tremendous. Amy Adams just radiated Cheney. She's physically, even the breathing it was fine). The voice, the only thing I did wasn't talked about almost more than the movie, and his work still holds up. I bought it (well, the only thing I buy wasn't buying the tickets for a 26-year-old, but the rest of the movie was almost as good). Rightfully so, it's a great movie with a great ensemble cast. It makes you feel like you're part of the story. It's not just a movie, it's an experience.

The acting is top-notch. The characters are well-developed and relatable. The dialogue is sharp and witty. It's a movie that makes you think. It's a movie that stays with you long after the credits roll.

The pacing is perfect. The movie moves at a brisk pace, keeping you engaged from beginning to end. The action scenes are intense and well-choreographed, while the quieter moments are poignant and heartwarming.

The writing is excellent. The screenplay is well-crafted and moving. The dialogue is sharp and witty. It's a movie that makes you think. It's a movie that stays with you long after the credits roll.

The special effects are amazing. The CGI is seamless and realistic, creating a sense of immersion. The action scenes are intense and well-choreographed, while the quieter moments are poignant and heartwarming.

The score is top-notch. It's a movie that will make your heart skip a beat. The music is well-integrated, adding to the emotional impact of the story.

The acting is excellent. The cast is top-notch, delivering performances that are both funny and heartfelt. The chemistry between the characters is great, creating a sense of bond and camaraderie.

The movie is a lot of fun. It's a movie that will make you laugh, cry, and think. It's a movie that will stay with you long after the credits roll.

It's a movie that I would recommend to anyone. It's a movie that I would watch again and again. It's a movie that I would recommend to anyone. It's a movie that I would watch again and again.

Vice

If You Think You're Just Batman, You Don't Know Dick

Lauren Wiseman
Staff Writer

"The following is a true story," the opening text reads, "or as true as we can be given that Dick Cheney is one of the most secretive leaders in history."

A pause.

"As we did our f—kin' beat."

If it weren’t obvious, that is the kind of tongue-in-cheek tone of Adam McKay’s 2018 film Vice. Almost treated like a video essay about the dangers of absolute power cor-

rupting absolutely, the film is punchy, snappily edited, and—

if even a fraction of it is true, it’s absolutely bunkers.

The film follows Cheney on his ascension to changing the Vice Presidency from a do-

nothing job to a formidable position in the White House. Along the way, he rubs elbows with the powerful and influen-
tial, becoming powerful and influen-
tial himself.

It stars Christian Bale as Cheney, but it would honestly be just as accurate to say Cheney is playing himself. The transformation Bale underwent to play the role is almost more than the movie, and his work still holds up. I bought it (well, the only thing I buy wasn't buying the tickets for a 26-year-old, but the rest of the movie was almost as good). Rightfully so, it's a great movie with a great ensemble cast. It makes you feel like you're part of the story. It's not just a movie, it's an experience.

Christian Bale as Dick Cheney in Vice, an unsettling film about corruption at the highest levels of the U.S. govern-

ent. Image courtesy of IMDb.com

Vice is a movie I recommend. Is it a fun movie? Oh, kinda. I definitely laughed out loud at a significant number of

scenes. At the same time, it is terribly bleak to know that we are still reaping the conse-

quences of decades of corruption and to see it all played out is immensely disquieting. Ulti-

mately, given the state of things, it is an important mov-

e, and it is way different from anything I’ve ever seen before. And that, in my mind, is worth a watch.
Lifestyle

Forbid, quinoa, I cannot help you. rogue and use brown rice or, heaven pass up this deal. If you choose to go long grain rice for 79 cents, do not sell you a pound of enriched extra broke college students. Meijer will Rice: Long grain rice works best for Details

8. Enjoy!

4. Pour boiling liquid into dish, stir coated evenly.

3. Stir extras into rice.

2. Mix rice and liquid fat in a 9x12 baking dish. Ensure all grains are baking dish. Ensure all grains are coated evenly.

1. Bring flavorful liquid to a boil. Stir

Ingredients

2 cups of rice 2 tablespoons of liquid fat 3 cups of flavorful liquid 2 cups of extras (optional)

Instructions

1. Bring flavorful liquid to a boil.

3. Stir extras into rice.

2. Mix rice and liquid fat in a 9x12 baking dish. Ensure all grains are coated evenly.

3. Stir extras into rice.

4. Pour boiling liquid into dish, stir gently to combine.

5. Wrap tightly in aluminum foil then bake at 400 degrees for 30 minutes.

6. Remove from oven and let sit for 10 minutes.

7. Remove foil wrapping and stir extras back into rice.

Foolproof "Fried" Rice

Liquid fat: This is just a really gross way of saying "use whatever fat you want but you have to cover the rice in it so it's easiest if it's in a liquid form." For example, melted butter, your roommate's hair gel, whatever. That said, for the closest taste to restaurant fried rice, canola oil is your best bet.

Flavorful liquid: At its most basic/cheapest, this can just be salty water. Like, really salty water. If you're scared just back off a little and adjust for salt after cooking. If you have dollars to spare, you can get a pre-salt-adjusted box of chicken broth at the grocery store. It will do quite nicely.

For the closest approximation to restaurant fried rice, make some chicken broth from the box or concentrate. Add a couple tablespoons of soy sauce, a pinch of Chancy's, and garlic to the mix. If you're feeling fancy, you can even try a dab of oyster sauce.

Extras: This is the best part of fried rice, DO NOT cheat yourself out of it! I use sautéed onions, a bag of frozen veggies will be just fine. A good restaurant-quality fried rice won't leave out a healthy dose of green onions, howev-

Other fantastic candidates include, but are most certainly not limited to:

- Left-over rotisserie chicken
- Smoked pork butt (Meijer is the best and only source!)
- Riced vegetables
- Those tiny corns
- Shrimp

Please note that if you choose to add eggs, you'll need to do that after baking. It will not end well for you otherwise.

Sources: Pictures taken from Google Images

Challenge Accepted!

5

Other highlights include:

- Shrimp
- Those tiny corns
- Riced vegetables
- Left-over rotisserie chicken
- Smoked pork butt (Meijer is the best and only source!)
The Battle of the Phones

Adam Mugler
Opinion Editor

3:07 PM

I am one of a rare breed of people. My freshman year of high school, during the waxing and waning of the iPhone hype, I was a Nokia Lumia 920 user. You probably remember, that right? Yeah, probably not. The entire idea was to bring the power and design of a Windows PC to your pocket. All that the device really accomplished was being useless and not supporting hardly any popular apps. For example, I had to use a third-party Facebook client for years before it was finally ported onto the platform. In summary, the Lumia 920, while not bad, and in fact it had a few redeeming qualities (like an amazing display), it was a failure.

I can say was good with the phone. The software, or what we would call the operating system, was good. It really was. Windows Phone 8 was designed to be clean and straightforward, which is something I can really appreciate. The platforms features like the multitasking bar and swiping apps, I just really enjoy it. The software is what I would call the strengths of the phone. It really was a solid build. The hardware, on the other hand, was a bit of a letdown. The phone had a very solid build, but it was quite heavy. It was quite thin, but it was quite heavy. It was quite a balanced device, but it was quite heavy.

As I said, I was a Nokia Lumia 920 user. The phone was a Windows Phone 8 device. I really enjoyed the software. It was really clean and straightforward. The software was really good. It was really good. The hardware, on the other hand, was a bit of a letdown. The phone had a very solid build, but it was quite heavy. It was quite thin, but it was quite heavy. It was quite a balanced device, but it was quite heavy.
