Dr. Phillip Carmel
Professor of Mechanical Engineering

My favorite class was the senior lab. There we would work on some project, and you'd have two or three professors. That's when you would get to apply what you've learned. It was a great experience.

Dr. Edward Mottel
Professor of Chemistry

What is your favorite class you've taught?

Mechanical Systems and Components

What will you miss most about Rose-Hulman?

I'm going to miss the students and teaching. The everything, the people, the community. I'll miss the students, my colleagues, my lab assistants, and all the people in the hallways. But I'll miss the students most.

As you look back on your entire career here at Rose, any last advice?

Focus on the undergraduates and teaching. Keep the focus on undergraduate education and teaching. Keep the focus on the Rose family and community. Students, get to know your professors, your classmates, and your classmates. Professors, get to know your students and their families. Students, make your mark here. It's great place you can get to know your students and their families.

Dr. Michael Momeny
Professor of Physics and Optical Engineering

What will you miss most about Rose-Hulman?

Our colleagues! We've all worked hard to get here and have a great time. The Rose family, the Rose Thorn, the Rose Thorn staff. It's a great place I've been able to work with them.

As you look back on your entire career here at Rose, any last advice?

My wife would say "Study hard and get out soon." Not that I would say that, but I would say do your best, and don't be too afraid to try something new.

Dr. Edward Mottel
Professor of Chemistry

What will you miss most about Rose-Hulman?

Our students and faculty. The Rose family and community. The Rose Thorn. Rose-Hulman is a great place. It's a great place to work and learn.

Dr. Michael Momeny
Professor of Physics and Optical Engineering

As you look back on your entire career here at Rose, any last advice?

No I don't think I do. I will tell you advice from a guy, a baseball pitcher, Rachel Paige. She says "Don't look back, something might be gaining on you." But I don't have that advice for people, no one does.

THE ROSE THORN

ROSE-HULMAN INSTITUTE OF TECHNOLOGY, 5500 Wabash Ave, CM 5037, Terre Haute, IN 47803 • Thorn@Rose-Hulman.edu

Our Mission Statement:
We are Rose-Hulman’s independent student newspaper. We keep the Rose-Hulman community informed by providing an accurate and dependable source for news and information. Our mission is to inform and educate our readers about the events and issues that affect our community and the world. We strive to provide a platform for open and honest dialogue about the topics that matter most to our readers. We welcome contributions from all members of the Rose-Hulman community and encourage diversity in our content. We are committed to maintaining high standards of journalistic integrity and ethical practice. We believe that the free exchange of ideas and information is essential to democratic society.

Issues of The Rose Thorn are published on the second through ninth Wednesdays of each academic quarter. All members of the Rose-Hulman community are welcome to attend.

Join us at the Activities Fair this upcoming Fall Quarter! Share your opinions, write an article for next week’s issue, or get the inside scoop on the latest news!

Last Tuesday, Georgia governor Brian Kemp signed the bill known as the Armed Services Equality (LIFE) Act into law. The LIFE act, effective next year, represents one of the boldest caveats to Roe v. Wade decision that initially legalized abortions in 1973. The Republican-led legislation prohibits abortions conducted after a fetal heartbeat is detected, which can be as early as six weeks into the pregnancy. Opponents claim this makes abortion an unjustifiable attack against life and thus the most ubiquitous tools in our society: search engines and satellite maps.

The Heartbeat Bill
Georgia’s New Anti-Abortion Legislation
Dara Nafiu

As a key player in the debate over the future of life and consciousness, Gros e and his research on the many ethnic minorities in China, and inhabiting a region of China rich with natural resources, the Xinjiang province, pressed to maintain control over this region in order to keep access to the region’s coal and natural gas reserves. In a world shifting away from non-renewable energy sources, the Xinjiang region of China represents about 20% of the country’s wind energy potential, making the Uighurs more of a population to be handled than fellow countrymen.

The photo discovered by Dr. Grose of the ribbon cutting ceremony at a new reeducation camp in the Xinjiang province.

Photo Courtesy of Dr. Timothy Grose via Twitter

Dr. Timothy Grose, Assistant Professor of China Studies here at Rose-Hulman, is one of these researchers and has appeared in multiple interviews on the subject of these camps. Grose gave the world a raw glimpse into these camps when he discovered a photograph of an abortion

You decide what’s newsworthy.

Tuesdays at 5:00pm in O259

These camps for years, prompting a group of scholars to find proof of these camps with some of the most ubiquitous tools in our society: search engines and satellite maps.

“All you need is Mandarin skills, a computer, and an Internet connection,” said Dr. Grose in a September 2018 interview with The Atlantic.

This photograph, along with a litany of other photographs, construction bids, and evidence, pushed the Chinese government to at least administered abortion methods are often expensive ("the Pill") or extremely dangerous and potentially unsanitary. Women seeking abortions are safer under the care of trained professionals, a provision undermined by this law.

Celebrity actress Erin Rachel Wood tweeted in response to the bill last Thursday, jokingly calling for "mandatory vasectomies" for men. She quickly clarified that the statement was meant to highlight the hypocrisy in the anti-abortion legislation. Wood held that the LIFE act places a disproportionate amount of the responsibility for an unplanned pregnancy on the shoulders of the woman involved. The cynical comment, full of sarcasm underlying her tweet suggests that things could be different if the roles were reversed.

The video, which now has more than one million views, features Rose professor Dr. Timothy Grose and his research on the situation in Xinjiang. Uighur Muslims are one of the many ethnic minorities in China, and inhabiting a region of China rich with natural resources. With a one billion and successful attempts to establish their own nation, the Chinese government is hard-pressed to maintain control over this region in order to keep access to the region’s coal and natural gas reserves. In a world shifting away from non-renewable energy sources, the Xinjiang province of China represents about 20% of the country’s wind energy potential, making the Uighurs more of a population to be handled than fellow countrymen.

Wrap Up School Year
The End Is Upon Us

Kaitynn Sonner
Guest Writer

As the school year comes to a close, let us reflect. We always joke how hard Rose is, the struggle we go through daily to simply pass our classes. Even though we may know that we are getting a good degree by coming to this school, taking many more credit hours that most other universities, it doesn’t make our struggle any less real and painful. And the struggle isn’t even always about school work; it could be with people, personalities, money, family, etc. Everyone has their own battles they have to fight simply to make it to the next day. But at the end of the day, we can choose to be happy.

Sure, the battles we fight shape us into the people we are, but we don’t have to let our struggles define us. We shall never have hope for this). The SRC is no quidditch club, yet (I still for all Harry Potter fans, there is a paper club for all those interested. There is a news- paper club for all those interested in writing. Unfortunately for all Harry Potter fans, there is no quidditch club, yet (I still have hope for this). The SRC offers fitness classes; physical activity is a great way to stay healthy and feel good, after the soreness goes away.

Off campus, there are also many things to do. Yes, there are many organizations to partake in, such as yoga, martial arts club, board game club, and paintball club. There is a newspaper club for all those interested in writing. Unfortunately, for all Harry Potter fans, there is no quidditch club, yet (I still have hope for this). The SRC offers fitness classes; physical activity is a great way to stay healthy and feel good, after the soreness goes away.

There are many ways for individuals to enjoy their time in Terre Haute, if they so choose. On campus, there are many places to volunteer at: VNA and Hospice of the Wabash Valley, Union Hospital, and Habitat for Humanity. Alpha Phi Omega is a service fraternity on campus for those who don’t always want to go off campus to help out. There are many wonderful museums to learn more about history. I would strongly encourage the Candles Holocaust Museum. Eva Kor, who created the museum and who was a speaker during one of the convocations schedules, is a survivor of the Holocaust who has learned to forgive, teaching others to do the same. Another museum is the Gobbler Girl, a business that has shaped Terre Haute. If anyone loves trains and being trained, you chose the right town and there is a Wabash Valley Railroad’s Museum. For those who want to take to the sky, there are sky-diving places in Indianapolis.

Even with all of these opportunities, one has to choose to try something new or to deviate from their daily routine. The times when we are outside our comfort zones are the times where we can learn something new and learn who we are. I implore you all to choose to be happy and choose to do something new next year. College is the best time in life to go outside the norm and live life to the fullest. Go out there and make good memories.

“College is the best time in life to go outside the norm and live life to the fullest.”

Brownie Cookies

Photo courtesy of Rose-Hulman Facebook Page

Ingredients:
- 1/2 cup butter
- 1 cup granulated sugar
- 1 tablespoon vanilla extract
- 1/2 teaspoon baking powder
- 1/2 teaspoon salt
- 1/2 cup all-purpose flour
- 1/4 cup unsweetened cocoa powder
- 1 cup chopped pecans, optional
- 1/2 cup mini semisweet chocolate chips

Directions:
1. Preheat oven to 350° F. Line two baking sheets with parchment paper.
2. In the bowl of a stand mixer, beat the eggs, sugars, vanilla, baking powder, and salt until light and creamy. This step is key, so make sure to beat the mixture for the full 5 minutes.
3. Remove from heat, and mix in the melted chocolate until well-combined.
4. Reduce the speed to low, and mix in the melted chocolate until well-combined.
5. Stir in flour and cocoa powder just until combined.
6. Add nuts, if using, and mini chocolate chips. Stir in to combine. The batter should be the consistency of a thick brownie batter at this point.
7. Cover the batter, and chill for 30 minutes.
8. Using a 1.5 tablespoon cookie scoop, drop batter onto the prepared cookie sheets about 2 inches apart.
9. Bake 8-10 minutes. The cookie will look set at the edges but still be a little wet looking in the center. Don’t overbake, or the cookies won’t be crackly and fudgy.
10. Let cool completely on a wire rack.

**Standout Student-Athletes**

Matthew Stevenot, a junior at Rose-Hulman Institute of Technology, broke one of the school’s longest standing records on Thursday at North Central College. Stevenot ran the 5,000-meter run in 14:46.90 to break a record set in 1975.

**HCAC Tournament Weekend**

Rose-Hulman hosted the double-elimination HCAC tournament this weekend due to our team being the regular season HCAC champions. The Rose-Hulman baseball team started off strong in the HCAC tournament with a win over Defiance with a score of 6-4. They moved on to play Franklin and unfortunately fell with a final score 2-7. The team regrouped and was ready to play again on Saturday when they faced Defiance again and won with a score of 6-3. They advanced to the championship game and had to face Franklin again. It was a close game, but in the end they fell with a score 8-9. That game secured a NCAA bid for Franklin, while the Rose-Hulman baseball team awaits to see if they will receive a bid to the NCAA tournament until Monday at noon.

**HCAC Honorable Mention**

Emily Struble, a sophomore, and Angela Boulboulle, a freshman, were both recognized with honorable mention All-HCAC honors. Struble has recorded a .259 batting average with 22 hits, 6 doubles, and a home run. Boulboulle has recorded a .373 batting average with 28 hits, 6 doubles, and 12 runs this season.

Men’s Tennis Season Ends in NCAA Tournament

Rose-Hulman Institute of Technology men’s tennis team defeated Illinois Tech in the first round of the NCAA DIII Tournament. This is the second NCAA Tournament win in program history as they finished the match with a score of 5-1. They advanced to the round of 32 and unfortunately fell to Washington University with a score of 0-6. This season was coach, Dan Hopkins, final season with the fighting engineers. His effort led the men’s and women’s team to a total of seven NCAA DIII tournament appearances. Hopkins is the winningest coach in Rose-Hulman history with a record of 313-277.

Game of thrones theory that will blow your mind

**Game of Thrones**: Westworld but in Medieval Europe I Think is a critically acclaimed masterpiece, known through at least seven dorm rooms that are too way too loud outside my room every Sunday night. Due to the popularity of the series, I decided to give it a go, and now that I’ve caught up to everyone (I'm 2/3rds of the way through episode 8) I’ve come to a sudden realization that will shock readers and watchers to their core.

Jaime Lannister is Tyron Lannister’s father.

I know, shocker. It’s like Darth Vader with Luke, or Luke Skywalker with Anakin. And it’s not just the height difference (Tyron can’t be more than 7 years old, it’s fairly obvious), but there are many other factors in play.

Let’s start with the simplest: there’s a point in the show where Tyron talks to these guys, saying “my name is Tyron”. Now one thing that he never mentions is his last name, which is supposedly meant to be hidden so that nobody will find out until the reveal. Truly, George R.R. Martin is a genius writer. Everyone will soon find out that Tyron isn’t just some random guy on the kingsroad, oh no. He’s actually some random guy with the last name of Lannister.

You know who else has the last name “Lannister”? Jaime, that’s who. Boom. I just blew your mind.

And Cersei is Tyron’s mother.

And Kevan is his sister.

And Tywin is his son.

You see where I’m going with this.

The evidence is out there. The government fakes conspiracies about Sean Bean secretly playing Sansa Stark and the Hound really being a waterbender in hiding, but we know the real truth. It’s all a coverup to hide the true facts. THE TRUTH IS OUT THERE FOLKS.

WACKY PROF QUOTES

Student: “It’s the final year for our seniors.”

Dr. Zak Estrada: “Well that depends on how well it goes!”

Dr. Sid Stamm: “Well, it will be final either way.”

“[I had to report some of the students who wrote on ratemyprofessor at my previous job. They said things like that to make it sound like they’re smart and get positive feedback. Now I’m at Hulman and I hear stories about Coons having sinister intentions for those living on campus?]”

- Dr. Amir Danesh

Students Not Allowed to Enter Campus?

Recently, President Rob Coons released the above picture, detailing where students were allowed to travel on Rose-Hulman’s campus. As seen, areas of the new Hulman Farm property are available to visit, but the entirety of Rose-Hulman’s original campus appears to have been closed off for students. What does this mean? Could President Coons have sinister intentions for those living on campus?

Last week of classes! Time to start studying for all of the finals! Good luck and have a good summer!
