Elections  
Today**

## NEWS BRIEFS

### SGA elections today

by Rob Werner

Final elections for the president and vice president of the Student Government Association are to be held today. The final candidates for SGA president and vice president were determined last Friday, Jan. 23. The final candidates for president are Todd Kost and Cary Weldy, while the final candidates for vice president are Mark Dolan and Paul Walker.

The primary elections were very close. For president, Todd Kost achieved an easy win with 155 votes. However,

first runner-up Cary Weldy defeated Brend Repp by only six votes. Weldy and Repp received 121 and 115 votes, respectively.

For vice president, Mark Dolan received the most votes - 152. Paul Walker beat Scott Terek for first runner-up by a mere four votes. Walker received 85 votes, while Terek received 81. Kevin Ray came in fourth with 51 votes.

The winner and first runner-up for president and vice president are the final candidates in today's election.

### Dessert Theatre

(RHIT) — The Rose-Hulman Institute of Technology Drama Club will present a dessert theatre entitled "Feiffer's People," on Jan. 31 and Feb. 1 in the Main Dining Room of Hulman Memorial Union on the school's campus.

"Feiffer's People" is a series of sketches concerning issues and emotions that effect the average person, according to Rose-Hulman senior Dan Vujovic, director of the show. The play was written by Jules Feiffer, popular post-war political humorist and cartoonist.

Rose-Hulman students featured in the show are: Mike Dobranski, junior mathematics major from Cincinnati, Ohio; Jack Gulick, senior mathematics major

from Ft. Mitchell, Ky.; Paul Hajdu, freshman electrical engineering major from Highland; Aaron Leong, sophomore electrical engineering major from Honolulu, Hawaii.

Also Jon McQuillan, freshman mathematics major from Red Lodge, Mont.; Rick Radzville, freshman electrical engineering major from Frederick, Md.; and Alex Yeager, junior chemistry major from Toledo, Ohio.

Other cast members are Indiana State University students Kim Kopka and Jaleen Lansberry.

The show begins at 8 p.m. each night. Reservations for the \$5 tickets are suggested as seating is limited. To make reservations, call Rose-Hulman at (812) 877-1511, ext. 346.

### ROTC leadership labs

by Greg Cassidy

The Wabash ROTC Battalion is preparing for its upcoming Field Training Exercise (FTX). The FTX is planned for mid-March, a couple of weeks after spring break, and it will be held in Fowler Park.

In preparation, Alpha Company of the Wabash Battalion has started Leadership Labs to train the less experienced MS-I and MS-II cadets on subjects that they will need to know. The Latest Leadership Lab was held on Wednesday, the 21st of January. During this lab, the cadets were inspected for equipment and uniform deficiencies. After the inspections, they were then given classes by MS-IV cadets. The classes included immediate action to flares, camouflaging ones self and

equipment, the SALUTE format of information reporting, setting up guard mounts, and hand and arm signals. This was done in a round-robin form with a squad attending all of the 15-minute classes in turn.

After the instruction block, the cadets then practiced drill and ceremony marching as squads. Initially, the squads were formed and led by their instructors and first sergeant, but after a few movements, individuals from the squad took turns leading their squads.

The evening activities were observed by the Commandant of Cadets, SGM White; the Battalion Commander, C/LTC Smith; and the Battalion Executive Officer, C/MAJ Reed.

### Lilly grant adds PC's to EE lab

(RHIT) — The use of personal computers in electrical engineering laboratories at Rose will be expanded as the result of a \$46,094 grant from the Lilly Endowment, Inc. of Indianapolis.

The grant will fund a program that will broaden student understanding of computer applications, provide them with more detailed analysis of data and better prepare students to use computer-based data acquisition systems currently utilized by industry, according to Bruce Black, associate professor of electrical engineering and computer science, who will coordinate the project on campus.

Black says the principal result of the program will be the construction of a demon-

stration computer work station.

"The work station will serve as a test-bed for laboratory experiment development and as a demonstration center to inform faculty members not directly involved in this project," he explained.

The first phase of the program will begin in March with the acquisition of equipment and software, Black said. The project is expected to be completed before the end of the year.

"The last phase of our work will be the development of faculty seminars to describe the new systems, their applications and simultaneously provide hands-on experience in using the new equipment," Black stated.

## Rose pondering possible AIDS policy

by Gary Hall

In response to the growing number of AIDS (Acquired Immune Deficiency Syndrome) cases being reported at colleges around the country, Rose-Hulman is in the process of adopting an official policy concerning the disease. The proposed policy will cover students, faculty and staff members.

The need for such a policy was brought up by Jess Lucas, dean of students. After reviewing several publications, such as "American College Health Association" and "Journal of American College Health," Lucas realized that Rose, like other colleges throughout the country, needs a policy concerning the disease. The policy Rose is considering is based on a policy recommended by the American College Health Association. The policy is being prepared to handle the possibility of an AIDS case at Rose-Hulman. According to Lucas, there are no reported AIDS cases among Rose-Hulman students, faculty or staff at this time.

The first step in the creation of the policy was the original draft. Lucas penned a tentative version of the policy and took it to Rose-Hulman President Samuel Hulbert. Hulbert agreed with the tentative version and suggested

Dean Jess Lucas realized the need for an AIDS policy and set the process in motion.

File photo

that the matter be taken through channels towards possible implementation as a school policy.

The next step was bringing the proposed policy up before the Student Affairs Committee of the Faculty. This was done on January 22. The committee approved the policy, with a few minor changes. (Those changes included the addition of sections 10 and 11 to the policy, which is reprinted on page three.) The

proposed policy now faces only one more hurdle before being adopted. The Board of Managers must vote on the proposal at its next meeting, which will take place February 26 and 27. If the board approves the policy, it will take effect immediately.

The proposed policy, in the version to be voted on by the Board of Managers, is listed on page three.

## SAB planning "Spirit Week"

by Gary Hall

During the week of February 1-7, the Student Activities Board will be sponsoring "Spirit Week" at Rose-Hulman. The activity is described as a "week of friendly competition among Rose-Hulman living units designed to break the monotony of winter quarter."

Spirit Week is composed of five events, each offering cash prizes for the winning participants and points for the top living unit in each event. At the end of Spirit Week, the living unit with the most points will be awarded \$200.

For the contest, the following have been defined as living units: BSB 0.1; BSB 2; BSB 3; Blumberg; Deming 0; Deming 1; Deming 2; Deming 3; Mees; Scharpenberg; Skinner (the Apartments); Speed 1; Speed 2; Speed 3; ATO; DSP; LCA; PGD; SN; TX; and Triangle.

The week kicks off on Sunday, Feb. 1, with the second annual Nerf Basketball Tournament. Three-man teams will compete

against each other in a game of Nerf basketball. The catch is the players are on their knees. The finals will be held during the half time of the Rose-MacMurray game. The winning team will receive \$30 and T-shirts. The top five placing living units will receive 5, 4, 3, 2, and 1 point(s) respectively.

On Tuesday, Feb. 3, the Lost Item Episode (L.I.E.) will be held. Teams of up to 10 people will search the campus for an item that has been hidden. The winning team will receive \$75. Points will be awarded on the same scale as for the basketball tournament.

The blood drive on Wednesday, Feb. 4, is the third item of the week. This competition is open only to living units. A score will be computed based on the percentage of givers and total number of givers from a living unit. The winning living unit will be awarded \$100, with \$50 for second place and \$25 for third place. Points will be awarded to

the top five living units as follows: 1st - 8 points, 2nd - 6 points, 3rd - 4 points, 4th - 2 points, 5th - 1 point.

The fourth event is a professor imitation contest. The person who is voted best will receive \$75, with \$25 going to the second place contestant. The top five placing living units will receive 10, 8, 6, 4, and 2 points respectively.

Wrapping up the week is a mattress piling contest, which will be held before and during the half time of the Rose-Sewanee basketball game. The first place team will be awarded \$75. This contest is worth the most points. The winning living unit will be awarded 15 points, with the next four living units earning 10, 6, 4 and 2 points.

On Saturday, Feb. 7, at 8 p.m. there will be a Las Vegas Night in the Main Dining Room. Though not part of the competition, there will be prizes awarded.

## Business information aids available

by Ben Niccum

Early this year the Logan Library received corporate files and a selection of numerous books relating to job search skills. The business information includes references to employers listed geographically or by their products; they include telephone numbers of corporate divisions and current financial reports, etc. John M. Robson, Library Director, said that in interviewing for a job it would be helpful to know a little about the company that you hope to work for. Robson said, "Display some interest or knowledge in the company."

The books that are available

cover the area of preparing a resumé and acquiring interviewing skills. These books are shelved in the library under 650.14. Robson said, "Students have become more sophisticated in their skills of job placement."

For help in using these new resources contact John M. Robson in the library. Robson said that this set of books and periodicals should be used as a supplement to the placement office's services, not as a replacement.

## Opinions and Columns

## Editorial

The first subject of today's editorial concerns the fiscal actions of the Student Government Association. It seems that SGA is giving money to new clubs without asking old clubs if they could use a few extra bucks.

The new club in question is the Model United Nations Team. This club is actually a resurrection of the old International Affairs Association, which suffered a one-year death last year.

The Model United Nations Team is composed of students who are interested in foreign affairs and how foreign politics affect the United States and citizens of this country. SGA decided to give the Model UN Team a healthy rebirth, to the tune of \$4,200.

That's right, SGA has agreed to fork over \$4,200 so that 16 students and a coach can travel to New York April 14-18 to attend a conference. The \$4,200 covers airfare (\$2,208), delegation fees (\$175), hotel rooms for students (\$1,536), and a hotel room for the coach (\$280).

The team has already made one trip, though the first was at school expense. The humanities department footed the bill so that 15 students (and presumably the coach) could travel to a seminar at Georgetown University. I consider this to be an excellent use of department funds.

I don't consider SGA approving \$4,200 for a trip to be an excellent use of resources, though. SGA has limited funds and these should be used to support clubs that have the potential to help all students. Allowing a club to spend \$262.50 per student for a four-day trip to New York does not appear to be a wise investment of resources.

The Model UN Team argued that it needs to fly to avoid missing more school days than they already have. If you're missing four school days, what's one more? They could drive (allowing \$500 for gas money would save SGA \$1,708) and have members pay half the hotel bill (saving \$768). By driving and paying half their total bill, the club could cut its cost from \$4,199 down to \$1,723, a savings of \$2,476.

I have no beef with the Model UN Team. I'm all for students learning about politics and the world. My complaint is with SGA.

My beef with SGA has two points. First, they shouldn't be giving money to students to take trips to New York. At least not \$4,200. Last year SGA allotted approximately \$58,000 to clubs. \$4,200 represents 7.2% of SGA's club budget being spent exclusively on just over 1% of the student body. My second point is this: If SGA has the money to toss around, they should ask already active clubs if they need more money.

Inside sources claim that before the \$4,200 was allotted for the Model UN Team, SGA's general fund held approximately \$15,000. Granted, a few thousand dollars should be held back for emergencies, but \$15,000 is too much. With that much extra money, existing clubs should have been asked if there were any major purchases that needed to be made or if a club was having trouble meeting its budget.

Two examples of clubs that need to make major purchases come to mind. The Rose Bands are in desperate need of instruments. This is a one-time purchase that SGA can afford at this time. I personally quit the band my freshman year because they did not have enough quality instruments. The other is the Broadcasting Club (WMHD 90.5). WMHD could use some new recording equipment and could always upgrade equipment with any extra SGA funds.

I can tell you from experience that the budgets SGA handed down last spring after applying the axe are very hard to live with. Since I now know that SGA has some extra funds, the "Thorn" will be going before congress to request enough extra money to help us make it through the year without having to cut back on issues.

Speaking of SGA, the presidential and vice-presidential elections are being held today. After reviewing the candidate's positions as stated in their articles run in today's "Thorn" (see page 3), I must admit that I feel Cary Weldy is the best choice for president. His views on the SGA budget problem appear to be the best and most realistic.

— Gary Hall

## Heavier than Air — Part III

by Ron Dippold  
Deep Purple:  
The House of Blue Light

"'Good Golly!' said Little Miss Molly, as she was rocking in the House of Blue Light..." So goes a lyric in the song "Speed King" from Deep Purple's Machine Head album. And their most recent release, *The House of Blue Light*, is something to say "Good Golly" about if you are that kind of person.

This vintage band is back in full force, and they are better than ever. *Perfect Strangers* was a hard act to follow, but most of the songs on this album are top quality, some of the best being "Call of the Wild", "Black & White", "Mitzi Dupree". Some of the harmonies that Gillian and Blackmore generate are very appealing, although most of the vocals are solos by Gillian. Deep Purple's style may seem a bit "rough" the first time you hear them, but the music really grows on you.

Alcatraz: Dangerous Games

Not many people have heard of this band, although they have put out quite a few albums. Since lead guitarist Yngwie van Malmsteen left them in 1984, they have tended more towards lighter music, and *Dangerous Games* continues this trend.

Really amazing is Alcatraz's ability to harmonize, as the guitar and bass singers are also full-time backup singers. In fact, in the song "Night of the Shooting Star", the 30-second cut at the very end is all vocal and sounds quite good. There are songs for rockers (but they aren't metal!) such as "Undercover" and "Double Man", and songs for those who prefer lighter music, such as "Only One Woman" and "Blue Boar". If you are a die-hard metal fan, then you probably won't like this album. If you know the group's Dokken or Gluffria, there are some similarities to Alcatraz.

W.A.S.P.:  
Inside the Electric Circus

They're back with a vengeance! The third major LP from this group continues on in the tradition of *The Last Command* and *W.A.S.P.* These guys are heavy metal (no doubt about it!), but they also have a large collection of harmonies and other styles up their bladed sleeves. In fact, if you imagine some of their songs such as "Restless Gypsy" and "I'm Alive" played on more conventional instruments and sung by a lead singer whose voice is not quite so raspy, they could easily be Top-40 material. One

song, "Easy Living", is an old Uriah Heep favorite reworked. As it is, however, they are undoubtedly metal, and songs such as "Shoot From the Hip" (contains explicit language which may offend... etc.) and "9.5.-N.A.S.T.Y." leave no doubt. They haven't really changed at all since their first album, but then again, they don't really need to change. Play this one for the people who say that all metal songs sound alike!

Saxon: Strong Arm Metal

Saxon has been around for awhile and generated quite a few metal hits, and they are in this "Best of..." album. Although Saxon call themselves a metal band, there are strong rock and "boogie" (not disco-type boogie, thank God!) influences. There are basic rock songs with a strong beat such as "Strong Arm of the Law", "Wheels of Steel", and "Denim and Leather", as well as mellow songs like "747 (Strangers in the Night)" and "Frozen Rainbow". These are all high quality, although two of the songs, "Stallions of the Highway" and "Motorcycle Man", are not up to the standards of the rest. Saxon has been around awhile and is not one of the new heavy/speed metal bands, but this group should be enjoyed by metal and rock fans alike.

## Letter to the Editor

Dear Editor,

In your January 23rd editorial concerning SGA funding, you stated that the Rose Orienteering Club, along with several other clubs, should not receive SGA funds because we "... do not serve the student body," but instead "... serve as publicity tools for the Institute..." and for this reason "... should be funded by the athletic department." As an officer of Rose OC, I strongly object to these statements.

Rose OC can hardly be called a "publicity tool" when the club's accomplishments (including a Junior Intercollegiate Championship last spring) generally go unrecognized. In fact, the only publicity we receive are articles in the Thorn about our activities which are submitted by Rose OC members.

In addition, your suggestion the Rose OC be funded by the athletic department is very unrealistic. To my knowledge, no orienteering team in this nation is funded by a school's athletic

department. All clubs are either privately funded or are a part of a school's ROTC program. Even if the Rose ROTC program stressed orienteering any Rose student who is not an ROTC member but who wants to orienteer on a regular basis has no alternative without SGA help.

Finally, Rose OC does in fact serve the student body. All on-campus meets and national meets which we attend are open to any Rose-Hulman student. In addition to our club's 14 most active members, approximately three times that number have participated in club activities so far this year. Admittedly, other clubs involve more students than we do, but, for the most part, these clubs also receive more SGA funds.

In conclusion, we are a student organization which provides an important opportunity to the student body and which has every right to receive SGA funds.

Sincerely,  
Steve Kreger  
Treasurer, Rose OC

Editor's Reply: Just because no other orienteering team is sponsored by an athletic department should not deter us from trying that approach. Orienteering is basically cross country with a map. We feel that orienteering team members should receive athletic department recognition and support for their activities.

Under such a plan, the athletic department would pay for sending a team to meets around the country. SGA would pay for the upkeep of the home course so that any Rose student interested in orienteering would be allowed to try it.

With a club budget of \$1,233 and 14 active members benefiting, SGA is spending \$88.07 per person for the orienteering club. With 14 active members and 42 other students who have shown an interest in orienteering, SGA is spending \$22.02 per person for the orienteering club. We just feel that the cost to SGA is more than the benefit to the entire student body.

Proposed AIDS policy

Rose-Hulman Institute of Technology  
Institutional Response to AIDS  
(Recommended by the American College Health Association)  
The Rose-Hulman Institute of Technology has adopted the following general guidelines and policies in response to the disease known as Acquired Immune Deficiency Syndrome (AIDS) and related health conditions in the American society.  
The best knowledge available currently indicates that college students or employees with AIDS, ARC (AIDS-Related Complex), or a positive HTLV-III antibody test (human T-lymphotropic virus) do not pose a health risk to other students or employees in a usual academic or residential setting.  
The following guidelines will apply as long as there is no major change in medical consensus or modes of transmission.

- Guidelines
1. The Institute will analyze and respond to each case of AIDS or AIDS-related conditions as required by the particular facts of the case.
  2. Consideration of the existence of AIDS, ARC or a positive HTLV-III antibody test will not be part of the initial admission decision for prospective students or a prospective employee's application for employment.
  3. Students, faculty, and staff who have AIDS, ARC, or a positive HTLV-III antibody test will be allowed regular classroom attendance and work employment in an unrestricted manner as long as they are physically able to attend classes, teach, or perform assigned duties.
  4. Decisions about campus housing for students with AIDS, ARC, or a positive HTLV-III antibody test will be made on a case-by-case basis in consultation with the school or family physician.
  5. Access to the Student Union Building, cafeteria, WORK, fieldhouse, recreational facilities and other commons areas will be permitted to students, faculty or staff who have been positively diagnosed.
  6. Persons with AIDS, ARC, or confirmed positive HTLV-III antibody tests will not be permitted to donate blood in campus-wide blood drives.
  7. The Institute will not undertake programs of screening newly admitted, current students, or faculty and staff for antibody to HTLV-III.
  8. No specific or detailed information concerning complaints or medical diagnosis will be provided to faculty, staff, or even parents, without the expressed written permission of the student in each case. (Family Education Rights and Privacy Act of 1974.)
  9. The Institute will not provide AIDS related medical information to any person, group, agency, insurer, employer, or prospective employer without the prior specific written permission of the student. Health officials and officers of the Institute understand that confidential medical information is protected by statutes and that any unauthorized disclosure of such information may create legal liability.
  10. No specific or detailed information concerning complaints or medical diagnosis of faculty or staff will be provided to other members of the administration, faculty, staff, or to other parties without the expressed written permission of the faculty or staff member.
  11. The Institute will not provide any AIDS related medical information to any person, group, agency, insurer, employer, or prospective employer without the prior specific written permission of the faculty or staff member. Health officials and officers of the Institute understand that confidential medical information is protected by statutes and that any unauthorized disclosures of such information may create legal liability.
  12. Regular medical follow-up is strongly encouraged for those persons positively diagnosed as having AIDS or a positive HTLV-III antibody test.

Education  
The Rose-Hulman Institute of Technology believes that the best service it can provide to all constituents is to bring to everyone's attention through a program of education the latest and most accurate information on these conditions as it becomes available. Therefore, other information on these conditions will be distributed as it becomes available.

NATIONAL  
ENGINEERS  
WEEK

Feb. 22-28, 1987

ENGINEERS: TURNING IDEAS INTO REALITY

SGA hopefuls speak out

While the office of the SGA President is prestigious, the job entails serving the student body. As a leader in diverse organizations, I have received more than a taste of campus service. This is my second year as a Student Government Representative. Other responsibilities, such as the Student Development Council or the Visual Performing Arts Commission, provide me the opportunity to further serve Rose-Hulman. Indeed, I am also involved in the phonathons and fund-raising dinners, which keep your tuition dollars down.  
My goal is to remain active and work to positively change the campus. Serving as a Chairman on the Student Activities Board, I was determined to turn Mini-Programs upside-down. At one time, the small committee was responsible for half time events at ball games. Now Mini-Programs is providing inexpensive entertainment, ranging from "Tuesday Live" in the Worx to activities on Parents Weekend. I desire to keep the campus alive by working to bring well-known groups, including the Bangles, to Rose-Hulman.  
Unlike my opponent, I have a plan of action.

In the effort to better the campus, I support growth in the clubs that have much potential in affecting the entire student body. I encourage proper use of the students' funds and vow to inform the student body of the usage of its money. Surpluses must be carried over to the next year. At the same time, the process by which money is transferred between SGA and the clubs must be improved. Decreasing the waiting periods would smooth out the current procedure.  
The awareness of SGA's role and service to the student body should be heightened. With effective leadership and by encouraging student involvement in matters that affect us all, we can better Rose-Hulman Institute of Technology.

Cary Weldy

Wabash Valley Art Guild exhibit showing at Rose

(RHIT) — The works of three local artists, who are members of the Wabash Valley Art Guild, are featured in an exhibit on display until Feb. 13 at Rose-Hulman Institute of Technology.  
The exhibit, located in the A Section of Moechn Hall, includes paintings, drawings and collages by Betty Commons, Laura Mason and Doreen Quick.  
Included in the show are five oil paintings by Commons, a

Fellow students,  
I would like to thank you for your support in the primary elections. Now it is time for you to make your final choice for SGA President. When you evaluate each candidate, I feel there are three areas which deserve special attention. These areas are leadership, responsibility, and dedication.  
The leadership of the Congress is of utmost importance. I have been a representative of SGA for two years and have seen some very controversial issues come before us. As a leader, I would direct the Congress so the fairest decision can be made. I feel I have the respect of my fellow congressmen to accomplish this.  
The responsibility area of the President's job is crucial. The President must set an example for the other congressmen to follow. I feel I am an excellent role model. As a Resident Assistant and Sophomore Advisor, I have learned a great deal about responsibility associated with leadership and could apply this experience.  
The last aspect is dedication. This separates good leadership from great leadership. I feel particularly strong toward phase of the President's job. I desire this position because I want to

better SGA as well as better myself. My goal is to have the best possible SGA and to be the best President of SGA that I can be. This goal will not come easy but with hard work I believe it is well within reach.  
Finally, I feel this position is so vital to the whole student body because there are many people involved in different SGA sponsored clubs. If elected I will strive to have the most responsible and fairest Congress we have had at Rose. I would greatly appreciate your support.  
Sincerely,  
Todd Kost

First, I would like to thank all the students who voted for me in the Vice-Presidential Primaries. A good vice-president requires organization, dedication and leadership along with the knowledge that he represents the entire student body in his actions and decisions. I believe that I possess these skills and knowledge to be a good vice-president.  
One of the main duties of the vice-president is to organize and coordinate the Student Congress meetings. The experience and

(continued on pg. 6)

LIE series winners

by David Kooyman  
Two weeks ago Matt White and Kirk Klentz were hot on the trail in search of the missing Pink Flamingo. They discovered that Dr. Hulbert's prized Possession was not hidden underneath the bell in front of the fieldhouse, nor in the Music Room of the Hulman Memorial Union. Indeed, the first clue containing "heard" did not refer to sounds of any sort; rather, the clue hinted toward the "herd" of elephants located in the locked case in the Union lobby. The winners will split \$50, the cash equivalent of the black-and-white television.  
Kirk and Matt vow to find the missing object in the next Lost Item Episode. Any student is

eligible to join in the hunt, except for Mini-Programs Committee (MPC) members of SAB. Only MPC members are involved in planning the series; other SAB members are eligible. The next episode will begin on Monday, Feb. 2. Clues will be posted near the mailboxes, as well as fraternities and residence halls.  
Be sure to get involved in the BIG LIE during Spirit Week. Clues will be given to competing teams every 10 minutes for about one hour. A prize of \$75 will be awarded the winning housing unit. The top five competing teams will win points in the competition for the \$200 final cash prize.

Rose hosting Special Olympics basketball tournament

(RHIT) — Rose-Hulman Institute of Technology will host the Area 7 Special Olympics Basketball Tournament on Jan. 31 in Shook Memorial Fieldhouse.  
Alpha Tau Omega fraternity at Rose-Hulman is sponsoring the event and is expecting a field of eight teams for the tournament. Competition runs from 8:45 a.m. through 4:15 p.m. and admission is free, according to ATO representative Dan Braker.

SAB talent show

The Rose-Hulman Student Activities Board will present the 12th Annual Rose Talent Show on Mom's Night, February 14, 1987. The show will feature talent from the Rose-Hulman student body. Entries are due today, Jan. 30.  
The acts will be limited to six minutes of performance time. A panel of judges will be rating each act on originality, execution, material content, and general effect. Cash prizes will be given out to the top three placing acts. Awards are: 1st place - \$100, 2nd place - \$50 and 3rd place - \$25.

"We want to encourage everyone to come watch the fun and excitement that is Special Olympics," Braker said.

For more information, contact Braker at (812) 877-1511, ext. 373.

Reagan administration proposing expansion of new loan program

(CPS) — Only one form of federal student financial aid — an experimental loan which students repay according to how much money they make after graduation — escaped the Reagan administration's axe in the proposed 1988 fiscal year budget.

In fact, the administration proposed expanding this year's \$5 million pilot program for the Income-Contingent Loan (ICL) to \$600 million, while asking Congress to slash all other federal aid to college students.

In a pre-budget publicity blitz, U.S. Department of Education officials trumpeted the ICL as a new, fair way for students to get through college. Under the program, the federal government would stop subsidizing loan interest payments.

But others were not sure. The senator who sponsored the ICL pilot program called the expansion "unwise," especially since the program won't even begin on 10 test campuses until next fall.

Some low-income students, moreover, might find themselves repaying their college loans for decades after graduation, one observer said.

Under the program, colleges themselves would loan the money — supplied by the government — to students at an interest rate "virtually identical to the Guaranteed Student Loan rate," explains Dan Schechter of the U.S. Department of Education.

Students would not have to make any payments for the first six months after leaving school. For the next two years, they would repay their loans at \$30 a month, and then, after two and a half years, at \$30 a month for every \$10,000 worth of debt.

During the sixth year after graduation, students would repay the loans at a rate no higher than 15 percent of what they earn, adjusted annually. If, for example, a borrower were to earn \$1,000 a month, he or she would pay no more than \$150 monthly toward the ICL.

"We're very excited about this program," Bruce Carnes of the Education Dept. said in introducing the idea to the press last week. "We think it is the single biggest advance in the financing of higher education for students in the last 15 years."

In reply, Sen. Claiborne Pell (D-R.I.), said Carnes may be judging the program prematurely.

It is "far too early to tell if it works well," said Pell, who co-sponsored the legislation that set up the pilot program. Consequently, expanding it "is an unwise idea at this time."

There may in fact be "implementation problems" in the ICL program, says Dr. Dallas Martin, Jr., of the National Association of Student Financial Aid Administrators in Washington, D.C.

YOU CAN WIN IN THE IAAF WORLD INDOOR GAMES

GET ON THE EXCITEMENT TRACK FOR QUALITY WITH TDK AUDIO CASSETTES AND RUN OFF WITH A GREAT PRIZE!

**WIN A FREE TICKET TO THE FIRST INTERNATIONAL AMATEUR ATHLETIC FEDERATION WORLD INDOOR CHAMPIONSHIPS**

The first 1,000 coupons received will be awarded a free ticket to the IAAF Championships to be held at the Hoosier Dome in Indianapolis on March 6-7-8, 1987.

**WIN A COMMEMORATIVE TDK/IAAF CHAMPIONSHIPS RUNNING SHIRT**

The next 1,000 coupons will receive a quality commemorative runner's shirt displaying the TDK emblem and IAAF Championships official logo.

**WIN A SOUVENIR TDK/IAAF CHAMPIONSHIPS PIN**

Then the next 5,000 coupons will receive a beautifully styled and detailed souvenir pin featuring the TDK/IAAF Championships' logo. Supplies are limited, one prize per person, first come first served. No purchase required.

**YOU CAN ALSO WIN WITH TDK AUDIO CASSETTES**

TDK audio cassettes are the long-standing—and long running—favorites for top quality music performance and reliability. And now you can qualify for \$1.00 off on your next purchase of two single packs or a two-pack of TDK SA-X90 high bias (Type II) audio cassettes with the special coupon provided in this ad. Simply complete the coupon and take it to the participating dealer listed below and the rest is history.

Then get a jump on quality, performance and value with TDK. Fill in the special prize coupon below and dash it off to us today; you could be a winner.

## National News

## Freshmen more liberal

LOS ANGELES, CA (CPS) — College freshmen generally who aim to go into business, harbor a curious blend of liberal and conservative ideologies and may — or may not — be getting as much help from Pell Grants as their predecessors of five years ago, a survey of 290,000 students from around the United States says.

Each year, UCLA and the American Council on Education survey entering freshmen, and issue reports that in recent years have become the source for most commonly held notions about student attitudes.

This year the study authors were most impressed by their finding that only 16.9 percent of this year's freshman class received Pell Grants, compared to almost a third of the freshman class of 1980.

By contrast, 25.4 percent of this year's freshmen have Guaranteed Student Loans, compared to the 1980 figure of 20.9 percent of the freshmen.

But the U.S. Department of Education's Bruce Carnes says the statistics are "seriously flawed," and that about 24 percent of all college students actually receive Pell Grants, which, of course, don't have to be repaid.

Carnes adds the Education Dept., which has helped fund the survey "for years and years," has found discrepancies in its financial aid statistics for the past several years.

Study director Professor Alexander "Astin's work is good when it comes to talking about what students think, but when it comes to questions about finances, their parents' income, that's unreliable," Carnes says.

The week before UCLA released its findings, a

congressional study found that — because there are fewer Pell Grants available — students who graduated in 1985 were five times more in debt than 1980 students.

But Carnes thinks the UCLA study didn't count Pell Grants going to students attending "proprietary schools like Joe's School of Cosmetology."

"We stand by our statistics," replies Dr. Kenneth C. Green, the study's associate director. "We've done validity studies that show students do know the sources of their aid and have a very good sense of parental income."

Green says Carnes' figures "don't reflect the same population of first-time and full-time college students" that the UCLA survey covers.

"The Department (of Education) has purchased our data for years to use in their own analyses. Their own independent reviews have confirmed our data over the years."

It found that a greater percentage of freshmen planned to have education and business careers, while fewer freshmen planned careers in computing and health-related fields.

Slightly more students than last year — 24 percent — defined themselves as politically "liberal" or "far left."

Slightly fewer students than last year — 20 percent — called themselves politically "conservative" or "far right."

Regardless of what they called themselves, however, big majorities of freshmen supported traditionally liberal positions like abortion rights, school busing for desegregation, a national health care plan and cohabitation prior to marriage.

## Enrollments refuse to drop

(CPS) — Defying predictions once again, enrollment on the nation's campuses rose last fall, the U.S. Department of Education reported last week.

The Education Dept. — as well as virtually every other agency and observer who ventured a guess — last summer predicted enrollment would hold steady or fall slightly this year.

The department's Center for Education Statistics said in a press release that some institutions attributed the year's increases to improved academic programs — some developed especially for women — and to more intensive recruiting of non-traditional students.

All told, 151,000 more students enrolled this year, bringing the total number of people taking classes last fall to 2.3 billion. It amounted to a one percent increase in the American student body, the department census showed.

A wide variety of schools enjoyed increases. Virginia's community colleges, the University of Maine System, the University of Minnesota System, Eastern New Mexico, and Western Michigan, among scores of others, all reported jumps.

On the other hand, schools like Montana State, the College of Santa Fe (N.M.) and Blue Ridge Technical College (N.C.), suffered population losses.

The biggest increases, though, were among two-year colleges, which had suffered the biggest enrollment losses in 1985-86.

Nationwide, two-year college enrollment rose a significant 2.5 percent.

Enrollment at four-year

schools held steady, partly because of "intensive" marketing efforts aimed at older and part-time students as well as traditionally-aged freshmen, the department found.

But the new Education Dept. census shows college enrollment nationwide has declined only once, in 1984. That decline, moreover, followed 1983's all-time record enrollment in 12.46 million students.

"The big story is that the projected decline has not occurred," says Dan Savage of the American Association of Community and Junior Colleges (AACJC) in Washington, D.C.

"The available pool (of college students) was to (shrink) by 50 percent because of fewer traditionally aged students," Savage explains, "but there are a whole lot of adults going to college, especially nontraditionally aged women."

## Budget cuts hit state schools

CHEYENNE, WYO. (COS) — Wyoming's seven state community colleges desperately need an extra \$3 million from the state. Faculty members, state Gov. Ed Herschler says, may soon start leaving if they don't get it.

To the north of here, Northern Montana College — similarly short of money — last week announced it will stop offering 22 degree programs and fire 12 administrators to try to save precious dollars.

At the same time, Texas educators held a dramatic press conference in Austin, asserting that recent cuts in state college funding were causing a "slow and painful demise" of the state's campuses.

It's happening, in fact, in probably a majority of states now, as state legislatures reconvene to start their new sessions.

While most observers are busy fretting about the massive, deep cuts in federal college funding proposed by President Reagan on January 5, the real crisis in college funding nationwide seems to be developing in the individual states.

"This year and in coming years, state funding for higher education will be very tight," predicts Dr. Edward Hines, director of Illinois State University's Grapevine Report, which tracks state education finding around the country.

"With state priorities for elementary and secondary education, increases for higher ed will be very hard to come by. In fact, in 10 to 15 states, decreases in higher education budgets could become a yearly occurrence."

As a result, campuses in Arizona, Nebraska and some other

states are cutting back the numbers of course sections they offer. Other schools are dropping whole degree programs, leaving some students stranded in mid-career in college.

To save money, some schools in Louisiana, Colorado, Montana, North Dakota, Alaska, Nebraska, Texas and Washington, D.C. are weighing proposals either to merge or to close down entirely by next fall.

Former University of Wisconsin at Madison Chancellor Irving Shainm for one, predicted in December that a five percent cut in the amount of money the state gives the UW system may force 13 percent of the student body to drop out.

Still others think public colleges will have to impose yet another new round of steep tuition hikes for fall to compensate for the new shortage of state funds.

# HOW TO ENRICH YOUR EDUCATION BY \$1,000 A MONTH.

If you're a math, engineering or physical sciences major, you could be earning \$1,000 a month during your junior and senior years.

This excellent opportunity is part of the Navy Nuclear Propulsion Officer Candidate Program. It's one of the most prestigious ways of entering the nuclear field — and rewarding, too. You get a \$4,000 bonus upon entrance into the program, and \$2,000 more when you complete your Naval studies.

You also receive a year of paid graduate-level training that's the most comprehensive in the world. And you'll acquire expertise with state-of-the-art

nuclear reactor and propulsion plant technology.

As a Navy officer, you'll lead the adventure while gaining high-level experience that will help make you a leader in one of the world's high-tech industries.

In addition to the professional advantages, nuclear-trained officers get an unbeatable benefits package, travel opportunities, promotions and a solid salary.

Find out more about the Navy Nuclear Propulsion Officer Candidate Program, and make your education start paying off today.

**A Navy Engineering Programs Specialist will be on campus February 12, 1987.**

For more information call toll-free 1-800-221-5932, Mon-Wed, 8:30am-2pm.

Roundballers fall on hard times

by Steve Uffell

The Engineer basketball team has fallen on tough times in recent days, losing to Wabash, Sewanee, Fisk and Earlham. The losses drop their record to 9-9 on the season.

On Tuesday, Jan. 20, Wabash College came to Shook Fieldhouse and defeated the Engineers 54-52. The win lifted Wabash's record to 3-11. The game saw the Engineers go 8½ minutes in the first half without a score. Jeff Rea led the scoring for Rose with 12 points. He was followed by Dave Urbanek and Doug Underwood, both with 11 each. Overall, Rose shot .326 from the field. They had 12 turnovers and were out rebounded by Wabash 38-35.

Coach Mutchner tried to get something going for Rose in the Sewanee game by changing the starting lineup. He replaced Jeff Rea and Mike Webster with Ron Steinhart and Jeff Harrison. The idea failed as Rose failed to score a point in the first six minutes of play. Sewanee went on to take a 44-41 half time lead. The Engineers battled back in the second half to take the lead 74-72 with only five minutes left. Turnovers proved to be fatal for the Engineers as they lost the contest 84-82. Dustin DeHaven led the Engineers in scoring with 24 points. Other high scorers for Rose included Dave Urbanek and Tim Cindric with 20 and 15 points respectively.

Last Saturday night Rose lost

their third straight game in a row. Fisk proved to be the better team in the contest as they defeated Rose 89-78. The Engineers went into the locker room at half time tied with Fisk 34-34. Fisk came out in the second half and took control of the game. Coach Mutchner showed his frustration late in the game by committing three consecutive technical fouls to contribute to the 11-point deficit. DeHaven again led the Engineers in scoring with 20 points. He was followed by Rea and Urbanek who had 19 and 17 points respectively.

The Engineers are in action on Saturday at Manchester College and are at home Monday night against MacMurray College.

Freshman guard Dustin DeHaven puts up two in the Engineers' 54-52 loss to Wabash College.

Tracksters turn in excellent performances

by Jason Lueking

The Rose-Hulman track team stayed at home last weekend to compete in two "all-comer" meets at Shook Fieldhouse.

In the field events on Friday night, Rose-Hulman's highest finisher was freshman Brett Starr with a second place shotput of 41 feet, 3.25 inches. Placing third and fourth behind Starr were Trent Payten and Brian Runkle, respectively. Junior Mike Garrison jumped a personal best of 19 feet, 11.75 inches. This was good enough to give him third place, ahead of freshman Mark Montgomery.

In the pole vault Scott Thomas placed fourth with an effort of 12 feet, six inches. Rose-Hulman's only competitor in the high jump was Brad Decker who finished in a tie for fourth place.

Several athletes captured first place in Friday's running events. Freshman Brian Bartley, despite falling in the trials, won the 60-yard high hurdles in 8.0

seconds. Brian Moench came from behind early to win the steeplechase in six minutes, 40 seconds. Taking second was junior Carl Troike. In the 300-yard dash Chris Cook placed first in a time of 33.8 seconds. Two places behind Cook in the 300 was Rick Kocker. Kocker also placed third in the 50-yard dash. Junior Greg Hiatt won the 600-yard dash with a two-second lead. Jerry Lyons won the 1,000-yard run in 2:26.2. Finishing second and third behind Lyons were Jason Lueking and D.R. Feley, respectively.

Saturday's meet was again marked by some excellent performances. Montgomery, Starr and Garrison once again placed in the field events. Montgomery jumped six feet, four inches to place second in the high jump. This jump gave him the second highest leap by a Rose-Hulman trackster this year. Senior Miles Fletcher jumped six feet, five inches in the Purdue Relays last

Friday. Starr and Garrison both placed third in the shotput and triple jump, respectively. Winning the 600-yard dash was freshman Bob Jacobs with a time of one minute, 16.7 seconds. This was only 1.1 seconds from breaking the school indoor record. Senior Kurt Kelso won the 1,000 with a 3.4-second lead over teammate Clark Pentico. Kelso's time was 2:20.7. In the 300-yard dash, Greg Hiatt led Rose-Hulman runners with his third-place finish.

Speaking on the 1987 track team, Coach Welch feels that it will be a "good solid team" as he has "40 to 45 guys practicing with a good attitude." He also states that "with a couple of more meets improvements should be seen in some of our guys' performances."

Next meet for the tracksters is this Friday at Eastern Illinois University in Charleston. Next home meet will be February 10 versus Vincennes University.

Engineers travel to Manchester

by Gary Hall

Tomorrow night, the Rose-Hulman Fighting Engineers travel to North Manchester to take on the Spartans of Manchester College.

So far this season, the Spartans are 3-18. The team is coached by Terry L. Heavilon, who is also the school's athletic director. Heavilon is in his sixth season with the Spartans, owning a 32-124 record.

The leading scorer for Manchester is Jere Eaton. The 6-1 senior guard is averaging 21.6 points per game. Second in scoring is 6-4 freshman center David Coil, who is scoring 9.3 points per game while leading the team in rebounds with 7.2 per

game.

The Engineers beat the Spartans last year in the first game of the Rose-Hulman Invitational Tournament by a score of 70-63. Overall, Manchester still holds the lead over Rose, beating the Engineers five times while only losing twice.

The probable starting lineup for the Spartans includes Eaton and Coil, along with 6-0 junior guard Brad Gore, 6-3 junior forward Joe Nadaline and 6-4 junior forward Tal Ryzewski.

Last year, the Spartans finished with a 2-27 record overall and a 1-11 record in the Hoosier/Buckeye conference (seventh in the conference).

1987 Track Schedule

Grapplers recuperating

by Ben Niccum

Last weekend the Rose-Hulman wrestling team traveled to Elmhurst where they placed 10th out of 16 teams. Senior Wes Davis won the 150 lb. weight class improving his career record to 72 wins and 17 losses.

Two wrestlers placed sixth — Derin Bluhm, Sr. in the 142 lb. weight class and Jeff Stegman, 126 lb. Coach Dan McGrath said that most of the team had tough draws against some of the top wrestlers making it difficult to score team points.

Coach McGrath said, "If we

win the duals coming up this weekend, it will be a good indication that we're making headway." The previously injured wrestlers are recuperating and will soon wrestle. McGrath said,

"This weekend's meet will be the first time in five years that we have had a full roster... We'll have to have the full team to do well."

This weekend the team will travel to Wabash College where 10 teams will be wrestling. At Wabash, Rose will be involved in a triple dual with Wheaton, Elmhurst, and Millikin.

SGA hopefuls speak out (from pg. 3)

organizational skills I would need as vice-president have been developed through my three years as a representative and one year on the Executive Committee as Secretary of the Student Congress. While working as Secretary, to get all the mailings out on time, I had to be organized. Also, while working with the vice-president I learned the organization it takes to get the important matters finished in the Executive Committee.

Though the vice-president does not have as much responsibility as the president, his leadership skills are still important. He has to help the president whenever called upon, and may even have to take the president's place in

certain situations when the president cannot be there. Also, while being chairman of a couple of S.G.A. committees, I learned how to run a meeting. A vice-president has to be able to do this because he has to keep the congress meetings going at a reasonable pace so that congress can do everything it is supposed to do in an acceptable amount of time. Finally, the vice-president has to realize that the S.G.A. can only work at its greatest potential when the president and vice-president work as a team.

Though leadership and organization are important skills, probably the most important skill is dedication because if the vice-president simply sits idle so

will congress. My dedication is shown in how actively involved I've been in the last three years. I have the time to put into the office of the vice-president, and with this time and dedication the Student Congress will, hopefully, reach its fullest potential.

In closing, Greg Smith and Brent Repp have done a fine job, and I would like to continue to build upon their accomplishments. With my experience on the S.G.A. I have acquired the skills needed to help the S.G.A. become the best it can be. Thank you again for your support in the primaries, and I would appreciate it during the final elections.

Thank you,  
Mark Dolan

## Teknic funding Contras

Though the exact amount of money sent to the Contras through the Teknic may never be

known, there is evidence that the sum is large.

In an attempt to thank the Rosem Teknic and Rosem-Hosem for their generosity (the Contras thought Rosem knew of the setup), a "Chauncey Rose" battalion has been established, bright young Contras are given Rosem admissions information, and the new battle uniform includes a red cap and a Diet Coke in one hand. Also, the official army saying has been changed to "Hey bud, how's it going?"

The password is "Sunshine"

Rosem-Hosem Response to AIDS  
(Recommended by the Page Nine Crew)

Rosem-Hosem should adopt the following general guidelines and policies in response to the disease known as AIDS.

The best knowledge available currently indicates that college students or employees with AIDS may or may not pose a health risk to other students or employees in a usual academic or residential setting.

The following guidelines will apply as long as there is no major change in medical consensus, modes of transmission or a number of potential AIDS carriers on campus.

Guidelines

1. The Institute will analyze and respond to each case of AIDS as required by the particular facts of the case as determined by a student vote.
2. Consideration of the existence of AIDS will be part of the initial admission decision for prospective students or a prospective employee's application for employment.
3. Students, faculty, and staff who have AIDS will be allowed regular classroom attendance and work employment in an unrestricted manner as long as they are physically able to attend classes, teach, or perform assigned duties. However, they are not allowed to exhale while other people are present.
4. Campus housing for students with AIDS will be restricted to a tent city to be erected by ROTC.
5. Access to common areas will be permitted to students, faculty or staff who have been positively diagnosed with AIDS under the condition that they be enclosed in a plastic bubble.
6. Persons with AIDS will be permitted to donate blood in campus-wide blood drives. Disqualifying AIDS patients would usually penalize a living unit in the spirit week competition.
7. The Institute will undertake programs of screening newly admitted, current students, or faculty and staff for the AIDS antibody. This may include blood test, polygraph, experimental surgery and limp wrist meter.
8. The Institute will not provide AIDS related medical information to any person, group or agency without the written permission of the student. Officers of the Institute understand that any unauthorized disclosure of confidential medical information may create legal liability. (One lawsuit is enough for now.)
9. No information concerning medical diagnosis of faculty or staff will be provided to other members of the administration, faculty or staff without the assumed permission of the faculty or staff member. However, the National Enquirer, Rose Thorn and WMUD will be notified as soon as possible.

Top Ten Sources of SAB funds

1. Scalp homecoming tickets
2. Iran arms deal
3. Illinois lottery
4. Extortion of freshmen
5. Aluminum cans
6. Loans from Tom
7. Make their own
8. Blackmailing Dr. Hulbert
9. Cash in Monopoly money at student bank
10. Recover "lost" items

Top Ten Uses for Spirit Week prize money

1. Fund the Contras
2. Bail Technic out of debt
3. Get Democrats out of congress
4. Have school named after me
5. Buy instruments for the band
6. Add Playboy channel to Rose cable
7. Bribe profs
8. Buy new uniforms for ARAT workers
9. Hold me over until I get a job
10. Downpayment on a new car

Do you enjoy listening to songs with third grade drabble for lyrics? Do you like guitar solos that sound like a moose looking for love? Would you sacrifice a virgin for backstage passes to an Iron Maiden concert? If so, join the Heavy Metal Scuzzheads, led by Rob Werner. Contact Rob through campus box 1195.

**Wanted:** Voice interpreter. Person seeking same has tendency to talk at 1,000 words per minute when excited. Will pay top dollar. Contact Gary Hall at box 1000.

**ATTENTION WOMEN.** I have been in Gasoline Alley at the Indy 500. I have seen famous drivers. I will be returning this year. If you want my other ticket, send \$25, your photograph, measurements and phone number to Steve Uffell at campus box 579.

**TUTOR SERVICE:** I am a GRE god. I know it all and am willing to sell my knowledge to YOU. Score high and be accepted by every grad school north of Grenada. Send \$500 and an application to Dan Tretter, box 1186.

Do you love listening to R.E.M., analyzing the lyrical content and sometimes being correct? Is the "Alternative Guy" your favorite TV show? Do you want to meet other people just like you. If so, join the Brian Evans fan club. Contact Brian Evans, founder, leader and president, at campus box 977.

Are you looking for an exciting career? Do you like knowing the real news but not telling anyone what it is? Could you make Chernobyl look like a promotional stunt for a tanning salon? If so, you may have a future in the field of public relations. I'll teach you all my secrets, including stonewalling, snowballing, misleading information and ducking calls from the press. Contact me, Dave Piker, through campus box 193.

Do you believe that the best is worth fighting for? That tomorrow's America is held in the grasp of today's educated, talented youth? Do you believe that no government at all is better than a government run by Democrats? If so, join Americans for Anarchy. If interested, contact Steve Slaughter, leader of the Rosem-Hosem chapter, at campus box 853.
