### National Library of Poetry to sponsor contest

The Rho Phi Chapter of the International Fraternity of Phi Gamma Delta at Rose-Hulman was the first place winner of the Owen Cup at the fraternity's 22nd Fiji Academy (biennial leadership school) held at the Ohio State University in Columbus, Ohio, August 4-8, 1991.

The chapter also received third place in the Brightman Trophy and honorable mention in the Cheney Cup.

The Owen Cup is awarded to the undergraduate chapter which has shown the greatest improvement in scholarship for the preceding collegiate year over the previous year.

The Brightman Trophy is presented to the chapter which

has done the most to maintain and improve relations between its chapter and the graduate members of the Fraternity in the last year, and the Cheney Cup is presented to the undergraduate chapter which shows the greatest all-around efficiency in scholarship, fraternity relationships and general collegiate activities.

Founded in 1848 at Jefferson College in Canonsburg, Pennsylvania, the Fraternity of Phi Gamma Delta has 122 chapters and six colonies at leading colleges and universities throughout the United States and Canada, and a total living membership of more than 91,000.

### Hot off the press: Guide for campus environmentalists

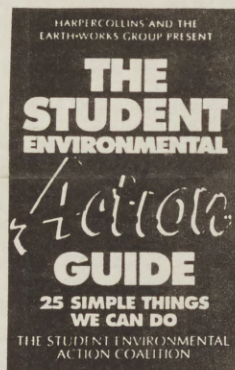

(CPS) — If you're interested in saving the Earth, you can start by saving your campus. So says the first environmental guidebook ever written by students for students.

"The Student Environmental Action Guide" will be published in September by the Student Environmental Action Coalition (SEAC), the largest student environmental group in the country.

The 96-page book, packed with practical "how to" information, lists of resources and tips like how to give an "eco party" (bring your own cup), draws on the research of environmentalists across the country, including members of the Natural Resources Defense Council, Greenpeace and the Environmental Defense Fund.

The pocket-size guide, printed on recycled paper, also contains stories about successful environmental efforts on the nation's campuses. For instance, students at James Madison University bought ceramic mugs to help reduce disposable waste on campus. Three-quarters of the 10,000 students purchased mugs. In another story, Mount Holyoke College students saved \$4,500 during an energy-saving competition between dormitories.

"Schools use large amounts of energy and generate large amounts of waste," says Chris Fox, one of SEAC's coordina-

tors, "The lessons we learn from making changes on campus is the first step in making other changes in the world."

The environment, according to the American Council on Education, is the number one issue among incoming college freshmen. SEAC, founded in 1988, is the largest student environmental organization in the country, with members in 1,500 campuses in 50 states.

The guide will be published by Earth Works Press in Berkeley, Calif., the publishing arm of Earth Works Group, an organization of writers involved in environmental activism. Another publication by Earth Works Press, "50 Simple Things You Can Do to Save the Earth," was among 1990's top best sellers in college bookstores.

### Rose Phi Gamma Delta receives national honors

\$12,000 in prizes will be awarded this year to over 250 poets in the North American Open Poetry Contest sponsored by the National Library of Poetry.

The deadline for the contest is Sep. 30, 1991. The contest is open to everyone and entry is free.

Any poet, whether previously published or not, can be a winner. Every poem entered also has a chance to be published in a deluxe, hard-

bound anthology.

To enter, send one original poem, any subject and any style, to the National Library of Poetry, 5-E Gwynns Mill Ct., P.O. Box 704-PC, Owings Mills, MD 21117. The poem should be no more than 20 lines and the poet's name and address should appear on the top of the page.

Entries must be postmarked by Sep. 30, 1991. A new contest opens Oct. 1, 1991.

## The ongoing pursuit of coeducation at Rose

The soul of the Rose-Hulman campus was shredded on May 24 as the Board of Managers once again rejected the option of becoming a coeducational campus.

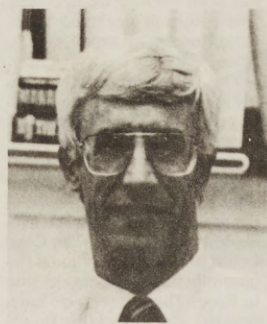

A minority of board members was able to defeat coeducation because it takes a vote of three-fourths of the board to change the College's Articles of Association to allow women.

"The resolution to become co-ed did not pass. We will remain all male for the time being," said B. Guille Cox, board vice chairman. "The board did agree to reconsider the co-ed issue at its October meeting this year."

Thad Smith is a faculty representative to the board of managers. "For them (majority of the faculty), it's a sad day. The vast majority of the faculty feels that it's either imprudent or immoral to bar women from Rose-Hulman."

Smith added that an all-male campus affects admissions, placement, development efforts, the academic and social quality of life on campus and faculty recruitment.

He said fewer students nationwide are choosing science and engineering as careers, and as a result the quality of the applicant pool is declining. Rose-Hulman will have to confront this dilemma, he said, and it shouldn't handicap itself even further by ban-

Thad Smith

ning highly qualified female students.

Students conducted a pink-ribbon protest during commencement ceremonies the day after the vote.

Student Government Association members set up a booth and passed out the ribbons. The rose ribbon campaign is a first step in a strategy to show the need for women at Rose.

"I think there will be a lot more direct expression of opinion on the part of faculty and students" to board members, media and anyone who is interested, said Jim Eifert, vice president for academic affairs. "I think you'll hear the volume turned up on this in the fall as the vote approaches."

"It's the right thing to do, from

an educational, moral and social point of view," added Eifert.

The Student Government Association recently conducted a student survey that showed overwhelming support for coeducation. Of 664 responding, 78 percent favored coeducation, 11 percent were neutral, and 10 percent wanted to remain all male.

Chadd Taylor, recently graduated student and chairman of the Coed Coalition, said the group now has 60 members. The coalition's efforts will focus on education, meetings, and strengthening the arguments to go coed with supporting data.

One opponent of the coed resolution, faculty member Al Schmidt, is unwilling to support the idea unless it can be shown that it will make Rose a better school.

"One must take into account the irreversibility of such a change," he said.

Schmidt expressed his concern about the availability of women who are interested in the disciplines Rose-Hulman offers. He understands that schools which have gone coed indicate that women should make up 20 or more percent of the student body in order for it to be effective, otherwise the women will feel isolated.

Long-term planning, a capital fund drive and the future direction of the school are somewhat on hold until the coeducation issue is decided.

## Rose prof and students watch history unfold during Soviet takeover

by Donald Stanton  
Editor-in-Chief

"I was leaving my apartment when an elderly Russian woman approached me with tears in her eyes and a sad expression on her face as she asked me if I had heard the news of the tanks moving into Moscow. This is how I heard of the latest news of the rise of the coup," said Peter Priest, a professor of Russian at Rose-Hulman.

"I went to downtown Moscow ... and I saw a column of ten tanks. It wasn't until then that I realized the seriousness of the situation," added Priest. "I was hit with feelings of sadness as I thought that this could be the beginning of the end of progress in the country."

When Priest arrived in Indianapolis, he received welcomed news that the coup had collapsed and Mikhail Gorbachev was back in power.

Priest had been accompanying five Rose-Hulman students in the Soviet Union since mid-July as part of a summer study program. While there, he was also helping arrange an international optics conference in Leningrad involving participants from Rose.

While Priest had made plans well before the coup to return early for personal reasons, two students decided to stay and watch the events take place inside the Soviet Union.

The two students, Kevin Neier and Todd Greener, stayed until the 28th of August while three others returned earlier that month.

Priest never felt that he or the students were in im-

mediate danger. "I was reassured by many Russian people that the troops wouldn't fire on Russian people," he said.

According to Priest, the two students speak Russian and had friends who would look out for them.

"This is truly an exciting time in Soviet history. Boris Yeltsin has opened up the country to a great future," added Priest. "This is the most important event of the 20th century as the Cold War is now really over."

Priest offers the analogy of a "farm" to describe the events

in Russia during the 20th century. With the revolution taking place in 1917, the Russian farm was devastated by the destruction of churches, teachers and scholars as the Communist Party took control.

Now, the communist farm is going through internal combustion with the toppling of the Communist Party. It is time for the world to help rebuild its neighbor's farm, Priest said.

America has the opportunity to influence the economic, political and religious restructuring of the Soviet Union.

## Opinion

## LETTERS to the EDITOR

### SGA forms coalition in the quest to become coed campus

On behalf of the Student Government Association, I would like to welcome all of the students back to campus, and congratulate the incoming freshmen. It's great to be back on campus, and we're expecting an exciting year from the Student Government standpoint.

The past year has seen Student Government become more active than it has ever been, especially on the subject of coeducation. Our activity and drive have led to student leadership in the pro-coed community, and the organization of the Coed Coalition. Led by students, this coalition includes faculty, staff and administrators, and is open to any interested party. And it has been busy this summer.

For the past three months, coalition members have been busy on three committees. The Case for Coed has been busy strengthening the arguments for coeducation, and compiling these arguments in a reference document for the Rose com-

munity.

The Education Committee has been working on an education program designed to inform Rose on all aspects of the issue.

The third committee, Implementation, has been assigned to study the implementation of coeducation, and display to the Board that Rose understands the implications of the transition. Some of the products of this summer include two issues of "The Coed Coalition Newsletter", and the possibility of speakers coming to Rose. There have also been several meetings with Board Members to determine the best avenues on the path of achieving coeducation.

The Student Government Association's stance on this issue is crystal clear. We believe in representing you, the student, in our endeavor, and it has been demonstrated through survey that we are accurately representing 79 percent of the student body. We have used the

news media actively, and will continue to do so to get our message across. But most importantly, we have every intention of pursuing this issue until it passes, and then beyond, to insure its success here at Rose-Hulman.

You can help us in our pursuit. Take a little time to become informed, so that you can make an educated decision on the issue.

Also, return the survey that will be distributed soon. Only by returning the survey and informing us of your position can we take an accurate stance. Your voice counts here, and we ask that all voices give themselves a chance to be heard with a response to the survey.

Once again, welcome back to Rose, and good luck in all aspects of student life here, from the Student Government Association.

Jeffery J. Haggerty  
SGA Vice-President

## No coeducation, no donation!

The following letter was prompted by a donation request from the Alumni Office. It was mailed to the Alumni Office along with copies of their request and the letter I received from the board informing me of their decision to remain a unisex institution.

I would appreciate your publishing a copy of it in the *Thorn*. I have sent similar mailings to President Hulbert and Chairman Titsworth.

Jeffery G. Smith

To Whom It May Concern,

I regret to inform you that because of the Board's decision concerning coeducation at Rose-Hulman, I would not feel comfortable supporting the school financially.

Aside from the fact that the trustees are being unfair and discriminatory to an important segment of the population, I do not believe it is wise to turn away qualified applicants at a time when this country is in need of more scientists and en-

gineers.

I am sure you are aware that this is a sentiment shared by a growing number of students and faculty as well as alumni. I hope that together we can correct this situation and once again turn our attention to the job of education.

Jeffery G. Smith  
Graduate Teaching Associate  
Rose-Hulman Class of 1989

## The components of man

Man is complex. Modern science keeps reiterating this simple fact. Medicine and psychology, with their breadth of findings, show how hard it can be to care for the whole man.

As the year begins, I would like you to consider caring for the whole you. The following list, using Jesus of Nazareth as an example, gives one possible breakdown of the components of a man.

**Mental.** Jesus was not only found in the temple at age twelve, discussing the law with the teachers (Luke 2), but He also taught the people. For example, His discussion with Nicodemus was almost purely intellectual (John 3).

**Physical.** Jesus also had physical needs. Satan tempted Him to break His fast in the desert (Matthew 4). Jesus slept in a boat while a storm raged about Him (Matthew 8). Even on the cross, he was thirsty (John 19).

**Emotional.** This appears on several occasions, including when Jesus had compassion on the crowd around Him (Mark 8), when He wept for the dead Lazarus (John 11), and when He drove the merchants from the temple (John 2). Jesus was not a stoic.

**Spiritual.** Few would argue that Jesus was not spiritual. He prayed. Not only in the garden, before his betrayal (Matthew 26), but also in His day-to-day life (Mark 1).

While you plan on spending this year at Rose, are you going to care for the whole man? The mental part should be relatively easy. As long as you are in class, learning something, you are going in the right direction.

The physical aspect should not be too hard; eating right, getting enough sleep, and getting a little exercise will do to take care of your physical needs.

It is the last two that may take some work. Men in our country are not known for being emotional. In fact, the role models given to us have generally been stoics. It can be potentially challenging to

## The Fish-Eye Lens

by Gregory Ford

care for the emotional man. The only advice I will give here is do not harden your heart.

And then there is the spiritual part. This can sometimes be the most neglected part of a man, especially if he denies that there is a God. I challenge you this year to take of the spiritual self. Attend church. Read the Gospel recorded by Mark. Set your mind on God. Endeavor to grow in every part of your humanity.

"Love the Lord your God with all of your heart and with all of your soul and with all of your mind and with all of your strength."

# Fenlon resigns as Rose-Hulman basketball coach; moves to Texas

Rose-Hulman head basketball coach Bill Fenlon resigned on July 29, 1991 to become the head coach at Southwestern University in Georgetown, Texas.

Fenlon had a 53-26 record in three seasons at Rose-Hulman. In his first year, the Engineers had a 19-8 record and finished third in the 1989 NCAA Division III South Regional Tournament. His teams compiled consecutive 17-9 records the past two seasons.

"The decision to leave Rose-Hulman was extremely difficult. I've greatly enjoyed the opportunity to coach so many gifted student-athletes," Fenlon said. "I also appreciate the tremendous support and friendships of everyone at Rose-Hulman and the fans in Terre Haute who made the past three years so memorable for me and my entire family," remarked

Fenlon, who had previously coached at the University of the South in Sewanee, Tenn., before assuming the Rose-Hulman post on Sept. 5, 1988.

"We always knew we were fortunate to have a coach of Bill's abilities and stature," said Rose-Hulman President Samuel F. Hulbert. "Bill leaves us with a good foundation for our basketball program. Several fine freshmen are planning to join the program this fall and we have some outstanding players returning for the upcoming season.

"We will begin a nationwide search immediately to select a new coach who will continue the success Rose-Hulman teams have achieved in the Indiana Collegiate Athletic Conference and the Division III," Hulbert said in the summer. The announcement should

Former basketball coach Bill Fenlon.

be made within days.

Southwestern University is a 1,200-student private college that is a member of the National Association of Intercollegiate Athletics (NAIA). The college has applied for membership as a NCAA Division III institution.

## Football team takes 6-game winning streak grudge into season opener

by Ken Koziol  
Sports Editor

Saturday, September 7, 1991. This date has been long awaited by the Rose-Hulman football team. This weekend the Engineers will march into the Lions' den at the College of Mt. St. Josephs in Cincinnati, OH. Motivation shouldn't be a factor for Scott Duncan's team.

Last year the team opened the 1990 season at home with a 31-10 loss to hand the Blue Lions its first win in as many games that the school has ever had. Both teams went on to own 1-3 records after four weeks of play, but the Engineers then went on to win six straight while the Lions lost six straight.

Entering Saturday's big game Rose owns a six-game winning streak, and the home team will look for only its second win ever following a nine-game losing skid. Despite five consecutive win-

ning seasons, Rose hasn't won a season opener since 1987, and is 2-4-1 over the past seven years. But Duncan doesn't worry about games of the past — even if that first loss last year was handed to him by his former coach. Mt. St. Joseph's coach John Pont was Duncan's mentor at Northwestern University in the late 1970s, but this year the student hopes to give the teacher a lesson which the team has been waiting a year for.

"I've done everything I can do to get us ready," Duncan said. The coaching staff is looking for the intensity and concentration that brought the team back last year to nearly win the Indiana Collegiate Athletic Conference Championship (Rose finished in second place with a 6-1 record).

With seven offensive starters returning, "Newton's Third Law of Offense", as the team calls it, should be in full force. The team struggled in its first four games

with it, but finished in a flurry in its last four games with it in 1990. The offense averaged 37 points and 460 yards and went 4-0 in those games.

The Lions aren't to be counted out, though. Surely, since Rose is the only team they defeated last year, Pont's squad will be looking for win number two in its very first game. Returning quarterback Rob Paff, tailback Jason Jackson, and defensive back Brian Harris will all try to duplicate the feats they accomplished in Terre Haute last September.

The game is set for a 1:30 p.m. kickoff. The junior varsity team will take on the DePauw Tigers in Greencastle on Sunday at 1 p.m.

## Soccer, cross country teams prepare for success in 1991

by Ken Koziol  
Sports Editor

The soccer team and the cross country team will begin what hopes to be big seasons for both teams this weekend. The soccer team will open the season Sunday at Albion College in Michigan. Coach Greg Ruark is hopeful in saying, "We've got more offensive weapons than ever before." Players to watch for include co-captains senior Andy Causey, junior Bryan Hales, and junior Jeff Dove. Sophomore Gary Oxford led the team last year in assists (6). Prospective freshmen include Clint Smith, Pat Goodwin, and Roland Pangan.

The soccer team finished the

1990 season with a 5-13-1 record, but with leadership from the upperclass, and new freshman talent, the 1991 season could be a turnaround year.

With seniors at the top, and freshmen challenging for their spots, Bill Welch may be a happy coach this fall. In the annual Engineer Stomp last Saturday, Chris Wilson once again led the way in 13:05 over the 4-kilometer course. Greg Dixon tied junior Brett Mazany for second place in 13:13, and senior Steve Lawrence took third in 13:25. Dixon's younger brother Lee, a freshman this year, was a strong fourth in 13:32. The team will compete Saturday in the Sycamore Pride 5-kilometer race at 11 a.m.
