Rose and SMWC share gift from area businessman

Rose-Hulman and Saint Mary-of-the-Woods College are the recipients of a gift totaling \$416,000 as designated in the estate of former Terre Haute businessman Thomas E. Walsh.

The gift will be divided evenly between the two colleges, according to John N. Royse, president of Merchants National Bank, which is the representative for the Walsh estate.

Dr. Barbara Doherty, S.P., president of St. Mary's, said, "Thomas E. Walsh must have appreciated exciting thinking. Because he acknowledged the commitment to academic excellence made by this city's

two private institutions of higher education in an eloquent way, a bequest of approximately \$200,000 to each," she added.

Rose-Hulman President Hulbert said, "We are gratified that Rose-Hulman's mission was of such importance to one of our former students. It is an investment in the future because it will insure the education of outstanding young engineers and scientists for decades."

Walsh was a graduate of the former Wiley High School and attended Rose Polytechnic Institute.

Robert Boyer, executive vice president of Merchants National

Bank, who worked closely with the donor stated, "I am sure that he would have been extremely pleased by the appreciation of the two institutions."

Both colleges will use the funds to provide student scholarships. According to Hulbert, Rose will establish the Thomas E. Walsh Memorial Scholarship Fund.

Doherty noted, "Saint Mary-of-the-Woods College will use the bequest to boost the number of scholarships we offer to academically talented young women who want what The Woods has to offer — a rigorous, integrated, education."

Dow President will lecture on free enterprise

Frank P. Popoff, president of Dow Chemical Europe and formerly of Terre Haute, will receive the Chauncey Rose Medal and deliver the annual Oscar C. Schmidt Memorial Lecture on free enterprise May 14 at Rose-Hulman Institute of Technology.

Popoff will discuss, "Free Enterprise: A Crash Course in Capitalism," at 11 a.m. during a special convocation in the Moench Hall Auditorium. He will also speak to students and faculty during a seminar following his public presentation.

As president of Dow Chemical Europe, Popoff is responsible for an organization consisting of 30

manufacturing locations in 14 countries that generates sales of nearly \$4 billion annually. He has

Frank P. Popoff

additional responsibilities as vice president and a member of the board of directors of The Dow Chemical Company.

The lecture series was established in 1952 by the Cincinnati Butchers' Supply Co., in memory of Oscar C. Schmidt, whose developments relating to the mechanization of the processing of meats form the foundation of that company's manufacturing business.

Previous Schmidt Memorial lecturers have included U.S. Senator Barry Goldwater, Indiana Lt. Gov. John Mutz, J. Erik Jonsson, formerly mayor of Dallas and chairman of the board of Texas Instruments, Inc.

Graduate may compete in Olympics

Tony Allen talks with President Hulbert back in 1978 when Tony competed for Rose in track.

Tony Allen could be the first Rose graduate to compete in the Olympic games.

Tony graduated from Rose in 1978 with a degree in civil engineering and is the college's only four time All-American. Tony will be competing in the Olympic trials next month with the hopes of making the three-man U.S. decathlon team.

Tony is a top candidate to make the team and is currently ranked third in the U.S. by Runner's World magazine.

In order to show our support for Tony, May 14-19 will be Tony Allen Week on campus. A display in the Hulman Union lobby will give students and faculty an opportunity to show their support for Tony. Everyone is urged to sign a telegram that will be sent to him and donations

are also being accepted to help support his effort in representing the United States in Los Angeles.

During next week's Spring Sports Banquet, a special track and field award will be named in his honor.

"Everyone at Rose should be proud of Tony's selection to compete in the Olympic trials. To represent the U.S. in the Olympics has been a dream of his for many years and he has worked extremely hard toward this goal," noted Rose Track Coach Bob Thompson.

Tony placed fifth in the 1980 Olympic trials and is the current U.S. and former world record holder in the indoor pentathlon. In 1981, he was the runner-up in the decathlon at the U.S. Championships.

SGA approves new budget

by Scott Haney

The SGA approved the 1984-85 budget at the May 3 meeting. Final determination of allotments was based on questionnaires completed by the representatives.

Thirty-four of the 61 representatives returned the questionnaires, according to Doug Byrer, SGA President. "A cut of \$300 or less was considered a 'small' cut, and more than \$300 was considered a 'large' cut," he said. The small cuts were averaged together and subtracted from all the clubs that originally had small cuts. The same procedure was followed for the large cuts.

More money ended up being removed from the budget than was necessary, so the Executive Council met and allotted more money to those organizations they felt were the most active and had the greatest need.

A breakdown of the budget follows. Anyone with questions concerning the budget should feel free to contact Byrer or their SGA representative.

NEWS BRIEFS

Thorn appoints new staff

Next year's THORN managing staff appointments were announced at a banquet Wednesday.

Geoffrey Lange, a three-year THORN veteran will serve as next year's THORN Editor. Geoff is a junior electrical engineering major from Erie, Pa. Geoff worked this year as News and Managing Editor.

Walter Rosenberger, a junior mechanical engineering student from Raleigh, N.C., will assist as Associate Editor. Walt has had five years experience in journalism including photo editor in high school and this

year's Features Editor.

Sports Editor will be Bill Lorenz, and Features Editor will be "Daffynitions" author John Rohlfing.

Top awards for journalism achievement were also announced. Bill Bradford received an award for Best News Reporting; Chuck Cooley, Best Feature Reporting; and Walter Rosenberger, Editor's Award.

Other awards went to John Rohlfing, Best Column; Nick Jokay, Best Photography; Joel Schneider, Most Improved Writing and Bill Lorenz, Best Page 5.

Students revive chemistry fraternity

by Bill Bradford

Several Rose-Hulman students are attempting to revive the Iota chapter of Alpha Chi Omega, a professional fraternity for those in chemical related fields.

A steering committee of Rose students, Dave Demeter, Rob Jacoby and Steve Stier, was elected and is currently making plans for organization, pledging and formal initiation and installation of the chapter.

Immediate goals of the students include inviting the 20 or 25 local members of Alpha Chi Omega (mostly from other chapters) to the pledging ceremony. They wish to write all living members of the Rose-Hulman chapter, informing them of the reinstatement, as well as set up a reception for them at

this fall's homecoming.

Long term goals of the fraternity are friendship, the advancement of chemistry as a science and profession, and aiding members in achieving their goals as chemists. They hope to enhance the profession through seminars and various other activities.

"The fraternity is a lifetime commitment, and thus those students who truly desire a profession in a chemical-related area are invited to join. Sophomore students may pledge, as well as second semester freshmen with their advisor's permission," said Dr. Frank Guthrie faculty sponsor of the club.

Undergraduate members are required to pay a one-time fee of \$75 to the national fraternity, and an annual \$25 dollar contribution is asked of alumni.

ARA contributes to Statue fund

Nationwide, ARA Food Service is attempting to raise one dollar for each person on their meal plan to contribute to the French-American Committee for Restoration of the Statue of Liberty.

According to Mr. Tim Siehl, Assistant Food Services Director, Rose's ARA has successfully raised \$600.60 from nearly 600 students on their board plan. The breakdown of the funds raised was as follows: \$412 from students giving up their meals, \$71.05 from the faculty and staff, \$28.95 from the WORX, \$27.90 from Mama Rosa and \$47.20 from ARA employees. It was noted that \$10 of the faculty funds were raised by the staff of the

business office.

From the figures it was evident that when each of the 330 students gave up his meal, \$1.25 was donated to the fund raiser. To alleviate skepticism among some of us, Mr. Siehl explained that, "food costs for that day were \$1.25 per meal;" the rest of the money associated with a standard meal price was spent in covering employee services.

Because of ARA's involvement with this fund-raising scheme for restoration of the Statue of Liberty, the Rose-Hulman community has had the opportunity to help preserve this characteristically American landmark for our progeny.

EDITORIAL

How does one alleviate stress during finals? Students need to realize that, in general, stress is proportional to the number and importance of finals. That is, a student taking four heavily weighted finals is more prone to feel the effects of stress than the student taking two finals of less weight.

It is important to determine the extent of that which a final exam may affect a final grade. You shouldn't plan to receive an "A" in a class if 105% is required on the final! So, don't make unrealistic demands on yourself.

Generally speaking, Rose students are more capable of coping with stress than the average John Doe. However, the anxiety to return home coupled with the intensity of finals creates more stress for a student than he cares to handle.

Here are a few simple ideas that may help reduce stress during finals week. Realize that stress basically is the result of tension, worry, and fatigue. The best prescription is a strong dose of relaxation — relax the body and mind, as a rule of thumb, about every two hours during studies. Once the mind has been cleared of unorganized and stagnate thought, it is free to function efficiently as a logical and imaginative machine.

Complete relaxation is not as easy to experience as it sounds — it takes a conscious effort. Here are a few techniques for relaxing: Basically anything that you consider fun helps relax the mind and the body: watch a short television program, go into town to eat, or do something physical — but don't think about studies. Talking with friends is a great way to relieve tension and relax the mind. Limit your break lengths — say 15-30 minutes, then get back to studying — be disciplined.

It is important to express your worries and fears to friends and professors. Get them out in the open and solve them, do not bottle them up.

Finally keep your mind and body strong by eating properly and, heaven forbid, sleeping occasionally.

Good luck on finals!

GJL

S.G.A. News

by Doug Byrer

The end of spring quarter is rapidly approaching. It has been a busy quarter for student government. The usual spring activities are winding down. The budget has been approved. Class officer elections are coming up on the 15th. Student/faculty committee appointments will be announced this week. Honor key points have been collected. There have also been some new activities.

The office of Administration and Finance is finishing its report on the audit of the S.G.A. books. The books were found to be in good shape. The people in Administration and Finance are making recommendations on simplifying our bookkeeping system. Another project that was started this quarter is the Outstanding Student Award. This award is co-sponsored by S.G.A. and the Thorn. Its purpose is to

honor outstanding students that are behind the scenes.

Next year promises to be as busy as this year. Starting in September the S.G.A. books will be put on the POISE Data Management System. The school uses this package to manage its finances. We also plan to put important information on floppy disk for ease of storage and recall.

A study on increasing the student activities fee will also be done. In addition to these administrative tasks, S.G.A. plans to continue close contact with students and the administration. It has been a good quarter. I hope next year is successful for everyone at Rose.

If anyone has anything to bring up before the Board of Managers, please contact John Rhoades or myself by May 18. John and I are your representatives to the Board.

Letter to the Editor

Dear Thorn:

Jim Jacobs indeed has a good idea in that a catalog of the software of the WCC is needed, and it does not exist.

Short of an on-line search (during a period when anyone can tell you how busy the computers are getting during prime time), or asking a busy System Manager (O K for one student, sometimes, but not 50) or other computing center employees, there is no source of comprehensive knowledge of the available software in the WCC. Indeed, various professors know of packages relevant to their departments, but there are packages relevant to no particular department (EZGRAF), that are very useful (just try writing your own plotting routines!), but a professor is not a system manager, and cannot be aware of all the available utilities, not with one new one a week and more planned.

The large increase in software investment envisioned in the WCC planning documents must be accompanied by an increase in the efforts to make that investment available to the students who are here to learn how to use it. The situation is analogous to a small, expanding library with librarians but no card catalog or other means for the uninitiated to find the books that need to figure out a problem.

It is true that a catalog of programs available will become out of date rather quickly, every time it leaves the computer it would be composed on, but silicon and ferrite change cheap. We are currently acquiring software, not throwing it away, and omissions would result, but even an incomplete catalog would be better than nothing. It will also entail some cost to compile such a catalog, but without it, we will be throwing away some major investments, never to be used because only a handful of us even know they exist.

I personally wish I had the time to contribute more, but I have classes like everyone else, and cannot afford the time involved, though I badly need the results.

Eric Christenson

Quotable quotes

by John Rohlifing

It's amazing just what some professors will say in class. (Even more amazing is what some newspapers will print.) Believe it or not, every one of these quotes is genuine, although the reader is left to his own imagination as to just what the professor really meant:

Dr. Warren Bowden: "Before I answer any questions, is there anything you want to ask?"

Dr. Maureen Krause: "I am not oriented in time or space."

Dr. Glenn Baca: "You can't catch just one fish and take 'em to court."

Dr. Paul Hogan: "Let me

go ahead and throw up."

Dr. Glen Richardson: "I'm not using differential equations; I have faith."

Dr. Bruce Allison: "We're going to ignore this part because we don't want to be confused by reality."

Dr. Charles Smith: "There are a lot of rubbers that provide protection."

Dr. Warren Bowden: "This is perfectly general."

Dr. Glen Richardson: "I don't want to leave you fellows without showing you how to get more beer for your money."

Dr. Charles Smith: "The shade of chocolate depends upon the environment."

Hard Bodies show skin

Starring Grant Cramer and Teal Roberts.

Hard bodies is a well-done teenage sex comedy set on the warm sunny beaches of California. The story appears to be taken from an article by the same name in the November 1983 issue of Penthouse magazine. The story centers on three middle-aged businessmen who come to California in hopes of meeting some "hard bodies." Hard bodies is the term given by the locals to "the impossibly perfect girls, 17 to 20 years old, with bodies as firm and filled out

as the sails on a Hobie Cat." This is what Scott, a native to the beach scene, tells the businessmen as they arrange a deal for Scott to show them how to meet some hard bodies.

Scott's description of the bathing beauties appears to be accurate even from the opening scene, as the camera pans the beach area, drifting from one roller skater to a jogger to a sun worshipper, each barely clad in bikinis. After Scott strikes a deal with the three men, they go off on their hunt for the hard bodies and the fun begins.

This movie is unlike many others of this type that claim to display unbelievable quantities of flesh and then do not. Not that Hard Bodies is all skin either, but it does have a good share. It also has a crazy plot similar to Porky's and appropriate to the Californian culture.

Hard Bodies is not a movie for those offended by sun, beaches, the ocean, parties, fast cars, fun, and most of all, beautiful women in bathing suits. But for Rose students, it is a great warmup and preview for the summer, and a must see. — Joel Schneider

Thorn Sports

Adams first ever as golf team finishes third in CAC

The Rose-Hulman golf team finished third place in the CAC tournament behind Centre College and Sewanee, who were both favored to win. Centre played outstanding the second day, with all of its players shooting in the 70's, to overcome Sewanee by only two strokes. Rose shot a team total of 654, which was 22 strokes behind second place.

Anchorman Mark Adams led Rose with a 78-82-160 stroke total. He was tied for the lead after the first day of play, and was in contention through the first nine holes of the second

day. But he lost ground coming down the stretch to finish sixth overall — still a good finish.

Senior Dave Bramer matched Adams' score with a 160, putting him in a tie for sixth place. Dennis Aldridge finished with a 166, Anthony Gilkison-170, Ron Neumeier-175 and Rob Haynes-176.

Mark Adams, who was top man for the Rose golf team in every tournament this year, has been invited to play in the NCAA Division III Golf Championships. Being the first golfer from Rose to participate in the championship, and since only a

few are invited nationwide, it is quite an honor for Adams to be asked. The four-day, 72-hole tournament, takes place in Syracuse, New York Tuesday-Friday, May 15-18. The tournament will determine the best Div. III golfer in the country, who will then go on to play in the Div. I championships. Coach Baca will attend the tournament with Adams.

Adams has a good record to show for his selection to the championships. Some of his accomplishments include first in the Hanover Invitational and seventh of 80 in the Franklin Invitational.

Baseballers split four

by Bill Lorenz

The Rose-Hulman baseball team concluded their season last Saturday with a third place finish in the College Athletic Conference double-elimination baseball tourney at Center College.

Rose-Hulman romped on Fisk in their opening game as the Engineers won 13-0. Freshman Bruce Clusky hurled a no-hitter and struck out nine Fisk batters in the five-inning contest. Mike Trench hit two homeruns in the second frame to pace the

Engineers to an 11-run inning. Jeff Ball, Ron Bender and Ed Canary each added homers in the second inning.

Rose suffered their first place loss to Principia who went on to tie for first place in the tourney with Centre. The Engineers jumped off to a 2-0 lead in the top of the first inning when Jim Short and Scott Lowe, who both walked, scored on Jeff Ball's two-out double. Principia came right back in the bottom half of the inning with a two-run homer

by Dean Corbitt

The Colonels won the game in the bottom of the fifth inning. Principia's Tim Sherwood drew a lead-off walk, moved to second on a fielder's choice, moved to third on a bunt single, and scored on a bases-loaded single by Corbitt with nobody out. Mark Kaiser took the loss for the Engineers.

Rose stayed alive in the tournament by defeating Southwestern 5-4 in extra innings. This time it was Rose playing catch-up as Southwestern jumped on pitcher Andrew Curosh for two runs in the opening inning. Rose retaliated with four runs of their own in the bottom half of the first inning. Dennis Wallen had a two-run single and Brent Mewhinney and Canary added RBI singles in the inning. Southwestern tied the game with single runs in the second and third innings.

Rose was finally able to put away Southwestern in the bottom of the sixth when Ball led off the inning with an opposite field homer to give Rose the 5-4 win. Curosh pitched all six innings and picked up the win.

The Engineers were knocked out of the loser's bracket as they

Track team sets record in romp

by Erik Schneckloth

The Rose-Hulman track and field team won its sixth consecutive College Athletic Conference championship last Thursday and Friday at Centre College. The Engineers easily outdistanced runner-up Southwestern by piling up a meet record of 281 points. Southwestern had 108 points, while third place Principia acquired 89. Rounding out the final standings were Centre with 50, Fisk with 33 and Sewanee with 21.

Rose got off to a good start on the first day of the competition by racking up 85 points. The Engineers won every event scored on the initial day of competition. Dave Beil took his third conference championship in the pole vault with a jump of 14-0. Gerard Tarantino repeated as Conference champ in the javelin with a toss of 187-3. Chris Trapp placed second with a throw of 185-3 while John Hanger was third at 179-1 to complete a Rose-Hulman sweep of the event.

Marty Jones took the shot put with a throw of 50-11 while Stacy Himes came in second at 48-7. Greg Hoffman finished fifth with a throw of 43-11½. Freshman Gary Martin won the long jump on his final attempt with a leap of 21-8½. Erik Schneckloth finished third with a jump of 20-7. Scott Orr won the final event of the day, the 10,000 meter run, with a time of 33:54.46. Kyle Farmer was fourth at 34:25.15 and Roger Hruskovich sixth with a clocking of 35:17.

The Engineers had some fine performances on the second day of competition also. Most notable was junior Steve Nerney's triple win. Nerney won the 100 meter dash with a time of 11.01 seconds and the 200 meter dash at 22.29 seconds. He was also the anchor in Rose's winning 4x100 meter relay team which also consisted of Rod Schrader, Bill Sears and Brian Cavagnini. The wins earned Steve the most valuable performer award by making him the high point scorer at the meet.

The second sweep of an event for the Engineers came in the 3000 meter steeplechase. Gene LeBoeuf set a meet record for a "dry" run (one with no water jump) with a time of 9:47.36. Bill Bandy, the record holder for the "wet" run, finished second at 10:00.89 and Dennis Dobbs was third at 10:06.02.

The third and final sweep of an event by the Engineers came in the discus. Stacy Himes repeated as conference champion by breaking his own meet record with a toss of 157-6. Marty Jones finished second at 154-5 and Gerard Tarantino was third with a throw of 136-8.

In the 110 meter hurdles freshman Bill Sears ran a 14.90 seconds to tie Tony Allen's school record. Craig Dargan was third at 15.52 seconds. Dargan also finished third in the triple jump with a leap of 43-8½ behind second place finisher Gary Martin. Martin had a jump of 44-2. Dargan placed in the high jump, too, with a tie for second with teammate Terry Martin. Both jumpers cleared 5-10.

The final Conference champion for Rose was Dean Kunz in the 5000 meter run. Kunz had a time of 15:56.52. Teammate Kyle Hayes finished second at 16:05.61 while freshman Carl Czarnick ran a fine race to finish fourth at 16:22.

FOREFRONT
OF TODAY'S
TECHNOLOGY
AS A
SCIENTIFIC-
ENGINEERING OFFICER

Our scientific-engineering officers are planning and designing tomorrow's weapon systems today. Many are seeing their ideas and concepts materialize. They have the finest, state-of-the-art equipment to test their theories. The working environment is conducive to research. And Air Force experience is second to none. You can be part of this dynamic team if you have a scientific or engineering degree. Your first step will be Officer Training School. Help us shape our future as we help you start yours. Be a scientific-engineering officer in the Air Force. Contact your Air Force recruiter at

Puzzle answer on P. 2

EARN OVER \$1000 A MONTH.
AND OPEN THE DOOR TO A TOP
ENGINEERING FUTURE

How many corporations would be willing to pay you over \$1000 a month during your junior and senior years just so you'd join the company after graduation? Under a special Navy program we're doing just that. It's called the Nuclear Propulsion Officer Candidate-College Program. And under it, you'll not only get great pay during your junior and senior years, but after graduation you'll receive a year of valuable graduate-level training that is not available from any other employer.

If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

For more information, call the Naval Management Programs Office at:
